# NOTICE OF ANNUAL GENERAL MEETING

## Hulamin Limited

Incorporated in the Republic of South Africa

Registration number: 1940/013924/06

Share code: HLM

ISIN: ZAE000096210

("Hulamin" or "the Company")

Notice is hereby given that the 81st annual general meeting of shareholders will be held entirely via a remote interactive electronic platform Microsoft Teams on Thursday, 27 May 2021 at 15:00 ("Annual General Meeting"), to conduct the business set out below and to consider and, if deemed fit, adopt, with or without modification, the ordinary and special resolutions set out in this notice. Hulamin will be assisted by Computershare Investor Services Proprietary Limited ("the Company's Transfer Secretaries") who will also act as scrutineers.

## Salient dates

The following dates apply to the Annual General Meeting:

The Record Date for purposes of determining which shareholders are entitled to receive this notice is Friday, 16 April 2021. The Last Day to Trade in order to be eligible to participate and vote at the Annual General Meeting is Tuesday, 18 May 2021.

The Record Date for shareholders to be recorded in the securities register of Hulamin in order to be able to attend, participate and vote at the Annual General Meeting is Friday, 21 May 2021.

Shareholders to lodge Proxy Forms by Tuesday, 25 May 2021 at 15:00.

Shareholders or their duly authorised proxies who wish to participate in the Annual General Meeting, must register to do so by lodging a completed Electronic Participation Application Form by Tuesday, 25 May 2021 at 15:00.

## Annual financial statements

The annual financial statements of the Company for the year ended 31 December 2020, including the reports of the directors, the independent auditors and the Audit Committee will be presented at the meeting. The 2020 annual financial statements are set out in Annexure B of this notice.

## PROPOSED ORDINARY RESOLUTIONS

1. To authorise the directors to appoint Ernst & Young as the independent registered auditors of the Company who will undertake the audit of the Company for the ensuing year, with Mr Sifiso Sithebe as the individual designated auditor of the Company. The group Audit Committee has recommended their appointment as independent registered auditors of the Company.
2. To re-elect the following directors who retire in accordance with Article 33.11 of the Company's Memorandum of Incorporation and who, all being eligible, offer themselves for re-election. Motions for re-election will be moved individually. The profiles of the directors eligible for re-election appear below.

### 2.1 Richard Gordon Jacob (55) – Executive Director

- Chief Executive Officer
- Member of the Risk Committee and a member of the Social, Ethics and Sustainability Committee
- BSc (Engineering); MBA

After graduating with a BSc Engineering from the University of Cape Town and following a brief period as an officer in the South African Navy, Richard joined Hulamin in 1990 as an Industrial Engineer. In 1992 he was appointed Manager, Coil Coating Operation, followed by Market and Business Development Manager in 1996. In 2002, Richard was appointed to the Executive Committee and board of Hulett Aluminium, responsible for Coated Products, communication and investor relations. Richard was appointed to the board of Hulamin in 2007 and as Chief Executive Officer in July 2010.

### 2.2 Vusi Noel Khumalo (58) – Non-Executive Director

- Chairman of the Social, Ethics and Sustainability Committee and member of the Chairman's Committee.
- Senior manager: Industrial Development Corporation of SA Limited – IDC.
- BCom; BCompt (Hons); CA (SA); Global Executive Development Programme

Vusi, a senior manager at Industrial Development Corporation of South Africa Limited, is responsible for managing IDC's investment portfolio. He served articles at Ernst & Young and has held various financial management positions in Anglo American Corporation of South Africa Limited and Edcon Limited. He is also a non-executive director of Ernani Investments (Pty) Limited. He was appointed to the Hulett Aluminium board in 2006 and to the board of Hulamin in 2007.

## 2.3 Naran Maharajh (54) – Independent Non-Executive Director

- Chairman of the Audit Committee; member of the Risk Committee and a member of the Chairman’s Committee
- Director of BCA Inc
- CA(SA)

Naran is a practicing chartered accountant and a director of BCA Inc. He completed his training with PWC. He was then appointed as a lecturer in the department of Accountancy at the University of KwaZulu-Natal. He was one of the founding partners of KMMT Brey. In 1999 the firm merged with KPMG and Naran was appointed as a director of KPMG. In 2007 he left KPMG to set up BCA Inc. a firm specialising in providing audit, accounting and business advisory services. He currently serves as a director of Comair Limited. He has previously served as non-executive director of Mercedes-Benz South Africa Limited and Masonite Africa Limited. He was appointed to the Hulamin board on 1 September 2016.

## 2.4 Sibusiso Peter-Paul Ngwenya (67) – Non-Executive Director

- Member of the Social, Ethics and Sustainability Committee
- Executive Chairman: Makana Investment Corporation
- BCom (Hons)

Following his release from Robben Island in 1991, Peter-Paul joined Engen and later South African Breweries. In 1997 he joined Makana Trust, where he is a founding Trustee and former Chairman. He later co-founded Makana Investment Corporation of which he is the current executive Chairman. He is also the Chairman of South African AirlinK, Heart 104.9 and Igagasi 99.5 radio stations and Sebenza Forwarding and Shipping Consultancy. He was appointed to the Hulamin board in 2007 as an alternate director to Johannes Bhekumuzi Magwaza and was appointed as a full director on the Hulamin board in October 2009.

3. To elect the following independent non-executive directors as members of the group Audit Committee and to appoint Mr N Maharajh as Chairman of the group Audit Committee. Motions for election will be moved individually.

### 3.1 Mr N Maharajh (Chairman) (subject to the adoption of 2.3 above)

### 3.2 Mr CA Boles – Independent Non-Executive Director

### 3.3 Dr B Mehlomakulu – Independent Non-Executive Director

#### Charles Alexander Boles (51)

- Chairman of the Remuneration and Nomination Committee, a member of the Audit Committee and a member of the Chairman’s Committee
- CA(SA); Higher Diploma in Taxation; Higher Diploma in Company Law; MBA (Cum Laude)

Charles was formerly a partner at Price Waterhouse in the Corporate Finance division. He then worked for Investec Bank Limited before establishing his own business, Titanium Capital. He has a depth of experience in finance, investments and private equity. Charles was appointed to the Hulamin board on 1 October 2016.

#### Dr Bonakele Mehlomakulu (48)

- Member of the Risk Committee, Audit Committee and Social, Ethics and Sustainability Committee
- BSc (Chemistry and Applied Chemistry); BSc (Hons) (Chemistry); MSc (Organic Chemistry); PhD (Chemical Engineering)

Dr Boni Mehlomakulu holds a PhD in Chemical Engineering from the University of Cape Town. Her career started at Sasol before joining the Department of Science and Technology occupying various management roles. Her recent executive role was a Chief Executive Officer of the South African Bureau of Standards, the position she held for nine years. In addition to her non-executive directorship at Hulamin Limited she also serves as a non-executive director at Sappi Limited and Yokogawa (Pty) Ltd. Her past directorships include PBMR (Pty) Ltd, Nuclear Energy Corporation of South Africa, Eskom Holdings SOC Limited and the Technology Innovation Agency, as well as having served as the Deputy Chair of Unisa Council and a country representative on the Council of International Standards Organisation (ISO, Geneva).

# NOTICE OF ANNUAL GENERAL MEETING CONTINUED

## PROPOSED SPECIAL RESOLUTIONS

### 4. Approval of non-executive directors' fees

Directors' fees were approved at the annual general meeting held on 30 July 2020 and are applicable for the 12-month period ended 31 July 2021.

The Board, on the recommendation of the Remuneration and Nomination Committee, proposes that the directors' fees for the period commencing 1 August 2021, be as set out below.

#### Special resolution number 1

"Resolved as a special resolution that the proposed fees, set out below, payable to non-executive directors for their services as directors on the Board and on Board Committees and as invitees to Board committees, when invited by the Chairman of the Board Committee to attend a meeting as an invitee, for the 12-month period commencing 1 August 2021, be and are hereby approved."

Role	Present fees to 31 July 2021		Proposed fees from 1 August 2021	
	Annual Attendance Rand	Annual Retainer Rand	Annual Attendance Rand	Annual Retainer Rand
Chairman of the Board	477 410	40 920	491 730	42 150
Member of the Board	174 450	14 950	179 680	15 400
Chairman of the audit committee	125 550	17 930	129 320	18 470
Member of the audit committee	72 950	10 430	75 140	10 740
Invitee of the audit committee		10 430		10 740
Chairman of the risk committee	86 690	12 380	89 290	12 750
Member of the risk committee	47 580	6 800	49 010	7 000
Invitee of the risk committee		6 800		7 000
Chairman of the remuneration and nomination committee	86 690	12 380	89 290	12 750
Member of the remuneration and nomination committee	47 580	6 800	49 010	7 000
Invitee of the remuneration and nomination committee		6 800		7 000
Chairman of the social, ethics and sustainability committee	86 690	12 380	89 290	12 750
Member of the social, ethics and sustainability committee	47 580	6 800	49 010	7 000
Invitee of the social, ethics and sustainability committee		6 800		7 000
Chairman of an <i>ad hoc</i> Board committee		12 380		12 750
Member of an <i>ad hoc</i> Board committee		6 800		7 000
Invitee of an <i>ad hoc</i> Board committee		6 800		7 000
Fees for international NEDs (€)	31 320	2 680	31 570	2 700
Fees for international NEDs (\$)	31 790	2 720	31 950	2 740

As regards the attendance fee, the Board typically holds five meetings a year, and normally three meetings are held each year of the Remuneration and Nomination Committee and each of the other sub-committees of the Board.

Shareholders' approval is also requested to remunerate non-executive directors who participate in a specially constituted *ad hoc* Board sub-committee meeting as detailed in the table above, and to remunerate non-executive directors who attend a Board sub-committee meeting as an invitee at the request of the Chairman of the Board sub-committee.

### 5. Financial assistance

In terms of section 45 of the Companies Act, No 71 of 2008, as amended ("the Companies Act"), the Board may authorise the Company to provide financial assistance to a related or inter-related company or corporation, provided such assistance is approved by way of a special resolution of the shareholders adopted within the previous two years and certain requirements as set out in the Companies Act are met, amongst others, that the Company meets the solvency and liquidity test. The Board seeks such approval from shareholders in order to provide financial assistance to companies or corporations which are related or inter-related to the Company from time to time.

#### Special resolution number 2

"Resolved as a special resolution, subject to the provisions of section 45(2) of the Companies Act, that the provision of any financial assistance by the Company to any company or corporation which is related or inter-related to the Company (as defined in the Companies Act), on the terms and conditions which the directors may determine, be and is hereby approved."

## 6. General authority to repurchase shares in the company

The reason for Special Resolution Number 3 is to grant the Board a general authority in terms of section 48(8) of the Companies Act and the JSE Listings Requirements, up to and including the date of the following annual general meeting of the Company, to approve the acquisition by the Company of its own shares, or to permit a subsidiary of the Company or any trust controlled by the Company to acquire shares in the Company. The directors require this general authority in order to facilitate the repurchase of the Company's ordinary shares in circumstances where the directors consider this to be appropriate and in the best interests of the Company and its shareholders.

### Special resolution number 3

"Resolved as a special resolution that the board of directors is hereby authorised in terms of section 48(8) of the Companies Act by way of a renewable general authority, in terms of the provisions of the JSE Listings Requirements and as permitted by the Company's Memorandum of Incorporation, to approve the purchase by the Company of its ordinary shares, and/or the purchase of ordinary shares in the Company by any of its subsidiaries or any trust controlled by the Company, upon such terms and conditions and in such amounts as the Board may from time to time determine, but subject to the Memorandum of Incorporation of the Company, the provisions of the Companies Act and the JSE Listings Requirements, when applicable, and provided that:

- the general repurchase by the Company of ordinary shares in terms of this general authority may not, in the aggregate, exceed in any one financial year 5% of the Company's issued ordinary share capital as at the date of the grant of this general authority;
- any such repurchase of securities shall be implemented through the order book operated by the JSE trading system and without any prior understanding or arrangement between the Company and the counter party;
- this general authority shall only be valid until the Company's next annual general meeting, provided that it shall not extend beyond 15 months from the date this resolution is passed;
- the Company will only appoint one agent at any point in time to affect any repurchase(s) on its behalf;
- general repurchases by the Company and/or any subsidiary of the Company and/or any trust controlled by the Company in terms of this authority, may not be made at a price greater than 10% above the weighted average of the market value at which such ordinary shares are traded on the JSE, as determined over the five business days immediately preceding the date on which the repurchase of such ordinary shares is effected by the Company and/or any subsidiary of the Company and/or any trust controlled by the Company;
- the Company and/or any subsidiary of the Company and/or any trust controlled by the Company may not repurchase securities during a prohibited period, as detailed in the JSE Listings Requirements, unless the Company has a repurchase programme in place where the dates and quantities of securities to be traded during the relevant period are fixed (and not subject to any variation) and which has been submitted to the JSE in writing prior to the commencement of the prohibited period. The Company must instruct an independent third party, which makes its investment decisions in relation to the Company's securities independently of and uninfluenced by the Company, prior to the commencement of the prohibited period to execute the repurchase programme submitted to the JSE; and
- SENS and press announcements will be published giving such details as may be required in terms of the JSE Listings Requirements as soon as the Company and/or any subsidiary and/or any trust controlled by the Company has in terms of this general authority, repurchased ordinary shares constituting on a cumulative basis 3% of the number of ordinary shares in issue at the date of the passing of this resolution, and for each 3% in aggregate of the initial number of shares acquired thereafter."

### 6.1 Statement of directors

Shares repurchased by the Company and/or any subsidiary of the Company and/or any trust controlled by the Company may either be held in treasury or cancelled and restored to the status of authorised and unissued shares in the Company. The Board undertakes that it will not implement the proposed authority to repurchase shares, unless the directors have considered the effect of the maximum repurchase and are of the opinion that, for a period of 12 months after the date of the repurchase:

- the Company and the group will be able to pay its debts in the ordinary course of business;
- the assets of the Company and the group will be in excess of the liabilities of the Company and the group. For this purpose, the assets and liabilities will be recognised and measured in accordance with the accounting policies used in the latest audited consolidated annual financial statements which comply with the Companies Act;
- the share capital and reserves of the Company and the group will be adequate for ordinary business purposes;
- the working capital of the Company and the group will be adequate for ordinary business purposes; and
- a resolution by the Board has been passed authorising the repurchase and confirming that the Company and its subsidiaries have passed the solvency and liquidity test as defined in the Companies Act and that, since the test was performed, there have been no material changes to the financial position of the group.

### 6.2 Material changes

Other than the facts and developments reported on in the annual financial statements, there have been no material changes in the financial or trading position of the Company and its subsidiaries between 31 December 2020 (being the last financial year end) and the date of this notice.

# NOTICE OF ANNUAL GENERAL MEETING CONTINUED

## 6.3 Responsibility statement

The directors, whose names appear on the corporate information page of this notice, jointly and severally accept full responsibility for the accuracy of the information pertaining to special resolution number 3 and certify that to the best of their knowledge and belief, there are no facts that have been omitted which would make any statement false or misleading, and that all reasonable enquiries to ascertain such facts have been made and that this notice contains all information required by the Companies Act and the JSE Listings Requirements.

## 6.4 Additional disclosures in terms of the JSE Listings Requirements

Other disclosures in terms of the JSE Listings Requirements are contained in this notice as follows:

- Major shareholders of the Company page 118 of Annexure B
- Share capital of the Company page 112 and 113 of Annexure B

## 7. Amendments to Memorandum of Incorporation

### 7.1 Odd-lot offers

In terms of the JSE Listings Requirements, an “odd-lot” offer is an offer where the listed company intends reducing administrative costs resulting from a large number of “odd-lot” holders. The JSE interprets an “odd-lot” as a total holding of: (a) less than 100 securities; or (b) 100 or more securities, provided that it can be illustrated to the JSE that the cost associated with a holder disposing of such number of shares is equal to or exceeds the total value of such number of securities.

When a listed company proposes to make an odd lot offer in all instances a two-way election must be provided for in terms of which securities holders may: (i) elect to retain their odd-lot holding; or (ii) elect to sell their odd-lot holding.

In terms of paragraph 5.124 of the JSE Listings Requirements, expropriation of securities, being the default action applicable if securities holders do not make any election, is only allowed where the listed company’s memorandum of incorporation is amended to make provision for expropriation of odd-lots and where the specific odd-lot offer has been approved by shareholders at a general meeting.

The board proposes to amend the Company’s Memorandum of Incorporation as contemplated in clause 5.124 of the JSE Listings Requirements to permit the expropriation of odd-lots where securities holders do not make an election in the event of an odd-lot offer by the Company.

#### Special resolution number 4.1

“Resolved as a special resolution that the Memorandum of Incorporation of the Company be and is hereby amended by the insertion of the new clause 51 (Odd-Lot Offers) set out in paragraph 1 of Annexure A to the notice calling this meeting, into the Company’s Memorandum of Incorporation immediately after clause 50 (Signature of Documents)”.

### 7.2 Amendments to Schedule B

The Company’s Memorandum of Incorporation was amended on 17 December 2020, which amendment was accepted by the Companies and Intellectual Property Commission (the Commission). The amendment to the memorandum comprised *inter alia* the replacement of Schedule B thereto.

The board has identified certain patent errors in the replacement Schedule B adopted by the shareholders, introduced during the typesetting process, which errors it wishes to correct.

It is accordingly proposed that ‘Schedule B – Rights, Limitations and Other Terms of A1, A2, A3, B1, B2 and B3 Ordinary Shares’ of the Company’s Memorandum of Incorporation be amended in the manner set out in paragraph 2 of Annexure A to the notice calling this meeting.

#### Special resolution number 4.2

“Resolved as a special resolution that ‘Schedule B – Rights, Limitations and Other Terms of A1, A2, A3, B1, B2 and B3 Ordinary Shares’ of the Company’s Memorandum of Incorporation be and is hereby amended in the manner set out in paragraph 2 of Annexure A to the notice calling this meeting.”

## 8. Remuneration policy – non-binding advisory vote

The King IV Report on Corporate Governance and the JSE Limited Listings Requirements require that the Board (with the assistance of the Remuneration Committee) table the remuneration policy and the implementation report every year for separate non-binding advisory votes by shareholders at the Annual General Meeting. In accordance with the provisions of the JSE Listings Requirements, the Company shall give shareholders the right to express their views on the remuneration policy by casting an advisory vote in the manner set out below.

“Resolved that the Company’s remuneration policy for financial year-ended 31 December 2020, as contained in the remuneration report as set out in Annexure C of this notice, be and is hereby approved, through a non-binding advisory vote, in accordance with the JSE Listings Requirements and the recommendations of King IV.”

## 9. Implementation report – non-binding advisory vote

“Resolved that the Company’s implementation report, as contained in the remuneration report as set out in Annexure C of this notice, be and is hereby approved, through a non-binding advisory vote, in accordance with the JSE Listings Requirements and the recommendations of King IV.”

## 10. Other matters

- Report back from the Social, Ethics and Sustainability Committee in terms of Regulation 43(5)(c) of the Companies Act on social and ethics matters pertaining to the Company.
- To transact such other business as may be transacted at an annual general meeting.

## 11. Electronic participation arrangements

The Company’s Memorandum of Incorporation authorises the conduct of shareholders’ meetings entirely by electronic communication as does section 63(2)(a) of the Companies Act. In light of the measures put in place by the South African Government in response to the COVID-19 pandemic, the Board has decided that the Annual General Meeting will only be accessible through a remote interactive electronic platform as detailed below.

Shareholders or their duly appointed proxies who wish to participate in the Annual General Meeting are required to complete the Electronic Participation Application Form available immediately after the proxy form on page 11 and email same to the Company’s Transfer Secretaries at [proxy@computershare.co.za](mailto:proxy@computershare.co.za) and to Hulamin at [secretarial@hulamin.co.za](mailto:secretarial@hulamin.co.za) as soon as possible, but in any event by no later than 15:00 on Tuesday, 25 May 2021.

Shareholders or their duly appointed proxies are required to provide satisfactory identification before being entitled to participate in the Annual General Meeting.

Upon receiving a completed Electronic Participation Application Form, the Company’s Transfer Secretaries will follow a verification process to verify each applicant’s entitlement to participate in and/or vote at the Annual General Meeting. The Company’s Transfer Secretaries will provide the Company with the nominated email address of each verified shareholder or their duly appointed proxy to enable the Company to forward them a Microsoft Teams meeting invitation required to access the Annual General Meeting.

Fully verified shareholders or their duly appointed proxies who have applied to participate electronically in the Annual General Meeting are requested by no later than 14:55 on Thursday, 27 May 2021 to join the meeting by clicking on the “Join Microsoft Teams Meeting” link to be provided by Hulamin’s company secretary or by the secretarial office, whose admission to the meeting will be controlled by the company secretary/secretarial office.

Participants will be liable for their own network charges in relation to electronic participation in and/or voting at the Annual General Meeting. Any such charges will not be for the account of the Company’s Transfer Secretaries or Hulamin who will also not be held accountable in the case of loss of network connectivity or other network failure due to insufficient airtime, internet connectivity, internet bandwidth and/or power outages which prevents any such shareholder or their proxy from participating in and/or voting at the Annual General Meeting.

### Voting and proxies

For an ordinary resolution to be approved by the shareholders, it must be supported by more than 50% of the voting rights exercised on the resolution. For a special resolution to be approved by the shareholders, it must be supported by at least 75% of the voting rights exercised on the resolution.

Voting will be via a poll; every shareholder of the Company shall have one vote for every share held in the Company by such shareholder.

A shareholder entitled to participate and vote at the Annual General Meeting is entitled to appoint a proxy or proxies to electronically participate, speak and vote in his/her stead. A proxy need not be a shareholder of the Company.

The electronic platform (Microsoft Teams) to be utilised to host the Annual General Meeting does not provide for electronic voting during the meeting.

Accordingly, shareholders are strongly encouraged to submit votes by proxy in advance of the Annual General Meeting, by completing the Form of Proxy (found on page 11) and lodging this form with the Company’s Transfer Secretaries by no later than 15:00 on Tuesday, 25 May 2021 by:

- delivery to Computershare Investor Services Proprietary Limited, Rosebank Towers, 15 Biermann Avenue, Rosebank; or
- email to [proxy@computershare.co.za](mailto:proxy@computershare.co.za).

Any forms of proxy not submitted by this time can still be lodged by email to [proxy@computershare.co.za](mailto:proxy@computershare.co.za) prior to the commencement of the meeting.

Shareholders are reminded that they are still able to vote normally through proxy submission, despite deciding to participate either electronically or not at all in the Annual General Meeting.

Shareholders who indicate in the Electronic Participation Application Form that they wish to vote during the electronic meeting, will be contacted by the Company’s Transfer Secretaries to make the necessary arrangements.

# NOTICE OF ANNUAL GENERAL MEETING CONTINUED

## Dematerialised shareholders without ‘own name’ registration

Dematerialised shareholders, other than those with ‘own name’ registration, who wish to participate in the Annual General Meeting, should instruct their Central Securities Depository Participant (“CSDP”) or Broker to issue them with the necessary letter of representation to participate in the Annual General Meeting, in the manner stipulated in the relevant custody agreement. The letter of representation will need to be submitted together with the completed Electronic Participation Application Form to the Company’s Transfer Secretaries and to Hulamin in the manner and within the timeframe described above under the section titled “Electronic Participation Arrangements”.

If these shareholders do not wish to participate in the Annual General Meeting in person, they must provide the CSDP or broker with their voting instructions in terms of the relevant custody agreement entered into between them and the CSDP or broker.

## Certificated shareholders and dematerialised shareholders with ‘own name’ registration

Those Certificated Shareholders and Dematerialised Shareholders with ‘own name’ registration, who wish to participate in the Annual General Meeting (either in person or represented by proxy), must submit a completed Electronic Participation Application Form to the Company’s Transfer Secretaries and to Hulamin in the manner and within the timeframe described above under the section titled “Electronic Participation Arrangements”.

## Questions

Shareholders are encouraged to submit via email any questions in advance of the Annual General Meeting to the Company Secretary at [secretarial@hulamin.co.za](mailto:secretarial@hulamin.co.za). These questions will be addressed at the Annual General Meeting and will be responded to via email thereafter.

By order of the Board

## The Chairman of the Social, Ethics and Sustainability Committee feedback report

The Chairman of the Social, Ethics and Sustainability Committee, Mr VN Khumalo, advised that the following, inter alia, were discussed at the Social, Ethics and Sustainability Committee meetings held during 2020.

- The terms of reference incorporating the responsibilities prescribed for a Social and Ethics Committee in terms of the Companies Act, King IV Code of Corporate Governance and the annual workplan
- Strategy on how Hulamín will achieve its transformation, social and ethics goals
- Employment equity targets and the progress made in achieving same
- Hulamín's BEE scorecard report and the impact of the new B-BBEE codes on Hulamín's score
- Environmental sustainability performance and the underlying Resource Efficiency performance
- Hulamín's current carbon footprint and the strategies to reduce this in line with commitments made to Customers and the Science-Based Target for GHG reduction.
- The recycling content of our products and strategies for improvement
- Report on disputes and stakeholder engagement issues
- Report on Hulamín's contribution to the greater Pietermaritzburg area and Hulamín's granting of sponsorships, donations and charitable giving
- Report on the educational development of employees
- Report on labour regulatory compliance
- Review of safety, health and environmental performance and policies
- Assurance on the implementation of Hulamín's compliance policies in customer dealings
- Review of the following codes and policies:
  - » Stakeholder engagement policy
  - » Code of ethics incorporating code of conduct and ethics pertaining to the procurement staff
  - » Code of conduct for suppliers and service provider
  - » Corporate compliance policy
  - » Whistle blowing policy
  - » Crimes involving dishonesty
  - » Conflict of interest and gifts policy for employees.
- Noting the fraud policy and fraud prevention strategy approved by the Audit Committee.
- Risk Oversight

The committee is an integral component of the risk management process and specifically the committee shall oversee the risk management, activities relative to:

- » B-BBEE, Social and economic development, Good corporate citizenship, Environmental Management, Environmental Sustainability, Health and public safety, Consumer Relationships, Labour and employment, Ethics and Stakeholders (reputational risk)

In addition, the committee, whose terms of reference include the functions to be performed by a Social and Ethics Committee, as prescribed by the Companies Act of 2008, wishes to confirm that:

1. Compliance by the group with the United Nations Global Compact Principles and the OECD recommendations is mandatory, which in essence relate to social, labour, environmental and anti-corruption standards. Any non-compliance is therefore not tolerated by the group.
2. The group complies with the Employment Equity and Black Economic Empowerment Acts. Specific targets have been set for the company to increase its levels of compliance with these Acts over the short- to medium-term.
3. The group complies with its Code of Ethics. The Code of Ethics of the group requires all directors and employees to be committed to fair dealing, honesty and integrity in the conduct of its business. The Code of Ethics has been endorsed by the Board and distributed to all employees in the group. Compliance by all employees to the high moral, ethical and legal standards of the Code is mandatory, and if employees become aware of, or suspect, a contravention of the Code, they must promptly and confidentially report it in the prescribed manner.

# NOTICE OF ANNUAL GENERAL MEETING CONTINUED

## Annexure A

### Proposed Amendments to the Company's Memorandum of Incorporation

#### 1. Odd-Lot Offers

It is proposed that the following new clause 51 (Odd-Lot Offers) be inserted into the Company's Memorandum of Incorporation immediately after clause 50 (Signature of Documents):

"51. Odd-Lot Offers

51.1 For the purposes of this clause 51, "odd-lot" means a total holding of:

- (a) less than 100 ordinary shares; or
- (b) 100 or more ordinary shares, provided that it can be illustrated to the JSE that the cost associated with a holder disposing of such number of shares is equal to or exceeds the total value of such number of securities; or such other number of shares as may be permitted by the JSE.

51.2 The Company may make and implement odd-lot offers in accordance with the provisions of this clause 51, if approved by the shareholders in general meeting and in accordance with the restrictions and procedures imposed by the Listing Requirements or as otherwise permitted by the JSE.

51.3 If, upon implementation of any odd-lot offer made by the Company, there are shareholders holding an odd-lot in the Company ("odd-lot holders"), then the Company shall, save in respect of odd-lot holders who have elected to retain their odd-lots or to sell their odd-lots in the Company in accordance with the terms of the odd-lot offer:

- (a) cause the odd-lots to be expropriated by the Company from the odd-lot holders who have not made an election to retain their odd-lots in the Company on such terms and conditions as the board may determine; and
- (b) procure that the proceeds of such expropriation are paid to such odd-lot holders. [LR 5.124]"

#### 2. AMENDMENTS TO SCHEDULE B

It is proposed that Schedule B of the Company's Memorandum of Incorporation be amended as follows:

- 1) By the replacement in Article 1.1.5 of the reference to Article 6 with a reference to Article 7.
- 2) By the insertion, in article 1.3.1, of the words *'in accordance with the Act and this Memorandum of Incorporation and the'* between the words *'decided by the shareholders'* and *'A1 Ordinary Shares shall rank'*.
- 3) By:
  - (a) the renumbering of Article 2.1.1 to Article 2.1.2, of Article 2.1.2 to 2.1.3, and so on until Article 2.1.8 is renumbered Article 2.1.9; and
  - (b) the insertion of a new Article 2.1.1 to read *"A2 Ordinary Shares" means the A2 ordinary shares of no par'* prior to words *'value in the Company'*, such that Article 2.1.1 reads *"A2 Ordinary Shares" means the A2 ordinary shares of no par value in the Company, the terms of which shares are set out in this Article 2;'*
- 4) By the replacement:
  - (a) in Article 4.1, of the reference to Article 34 with a reference to Article 4;
  - (b) in Article 4.1.1, of the reference to Article 34 with a reference to Article 4;
  - (c) in Article 4.1.3, of the reference to Article 34.7 with a reference to Article 4.7;
  - (d) in Article 5.1, of the reference to Article 45 with a reference to Article 5;
  - (e) in Article 5.1.1, of the reference to Article 45 with a reference to Article 5; and
  - (f) in Article 5.4, of the reference to Article 55.7 with a reference to Article 5.7.

# FORM OF PROXY

**HULAMIN**  
Think future. Think aluminium.

## Hulamin Limited

Incorporated in the Republic of South Africa  
Registration number: 1940/013924/06  
Share code: HLM  
ISIN: ZAE000096210  
("Hulamin" or "the Company")

**Note:** All beneficial shareholders that have dematerialised their shares through a CSDP or broker, other than those which are in "own name", must not complete this form.

Certificated shareholders and/or dematerialised shareholders with "own name" registration must either provide their CSDP or broker with their voting instructions, or alternatively, should they wish to attend the annual general meeting in person, they should request the CSDP or broker to provide them with a letter of representation in terms of the custody agreement entered into between themselves and the CSDP or broker.

The Board requests that completed forms of proxy are received at the office of the company's Transfer Secretaries, Computershare Investor Services Proprietary Limited, Rosebank Towers, 15 Biermann Avenue, Rosebank, Johannesburg, 2001 (Private Bag x9000, Saxonwold, 2132), or via email to proxy@computershare.co.za by 15:00 on Tuesday, 25 May 2021. Any forms of proxy not lodged by this time may still be lodged by email to proxy@computershare.co.za prior to the commencement of the meeting.

A shareholder entitled to attend and vote at the meeting mentioned below is entitled to appoint a proxy or proxies to attend, speak and, on a poll, to vote in his stead. A proxy need not be a shareholder of the company.

# NOTES TO THE FORM OF PROXY

1. Shareholders' instructions to the proxy must be indicated in the appropriate box provided. Failure to comply with the above will be deemed to authorise the proxy to vote or abstain from voting at the annual general meeting as he/she deems fit. A shareholder may instruct the proxy to vote less than the total number of shares held by inserting the relevant number of shares in the appropriate box provided. A shareholder who fails to do so will be deemed to have authorised the proxy to vote or abstain from voting, as the case may be, in respect of all the shareholders' votes exercisable at the annual general meeting.
2. Documentary evidence establishing the authority of a person signing this form of proxy in a representative capacity (e.g. for a company, close corporation, trust, pension fund, deceased estate, etc.) must be attached to this form of proxy.
3. Any alteration or correction made to this form of proxy must be initialled by the signatory/ies.
4. A minor must be assisted by the minor's parent or guardian unless the relevant documents establishing the minor's legal capacity are produced or have been registered by the share registrars of the company.
5. The Chairman of the annual general meeting may accept any form of proxy which is completed other than in accordance with these notes if the Chairman of the annual general meeting is satisfied as to the manner in which the shareholder wishes to vote.

## **SUMMARY IN TERMS OF SECTION 58(8)(b)(i) OF THE COMPANIES ACT, 2008, AS AMENDED**

Section 58(8)(b)(i) provides that if a company supplies a form of instrument for appointing a proxy, the form of proxy supplied by the company for the purpose of appointing a proxy must bear a reasonably prominent summary of the rights established by section 58 of the Companies Act, 2008, as amended, which summary is set out below:

- A shareholder of a company may, at any time, appoint any individual, including an individual who is not a shareholder of that company, as a proxy, among other things, to participate in, and speak and vote at, a shareholders' meeting on behalf of the shareholder.
- A shareholder may appoint two or more persons concurrently as proxies and may appoint more than one proxy to exercise voting rights attached to different securities held by the shareholder.
- A proxy may delegate the proxy's authority to act on behalf of the shareholder to another person.
- A proxy appointment must be in writing, dated and signed by the shareholder; and remains valid only until the end of the meeting at which it was intended to be used, unless the proxy appointment is revoked, in which case the proxy appointment will be cancelled with effect from such revocation.
- A shareholder may revoke a proxy appointment in writing.
- A proxy appointment is suspended at any time and to the extent that the shareholder chooses to act directly and in person in the exercise of any rights as a shareholder.
- A proxy is entitled to exercise, or abstain from exercising, any voting right of the shareholder without direction.

# APPLICATION FORM FOR ELECTRONIC PARTICIPATION AT THE ANNUAL GENERAL MEETING

## Hulamin Limited

Incorporated in the Republic of South Africa  
Registration number: 1940/013924/06  
Share code: HLM  
ISIN: ZAE000096210  
("Hulamin" or "the Company")

## ANNUAL GENERAL MEETING – 27 MAY 2021 ("AGM")

Capitalised terms which are not defined herein shall bear the meanings assigned in the notice of annual general meeting (the "AGM Notice") to which this form is attached and forms part.

### Instructions

Shareholders or their proxies, have the right, as provided for in the Company's Memorandum of Incorporation and the Companies Act, to participate in the AGM by way of electronic communication.

Shareholders or their duly appointed proxies who wish to participate in the AGM must complete this application form and email it (together with the relevant supporting documents referred to below) to the Company's Transfer Secretaries at proxy@computershare.co.za and to the Company at secretarial@hulamin.co.za as soon as possible, but in any event by no later than 15:00 on Tuesday, 25 May 2021.

Upon receiving a completed Electronic Participation Application Form, the Company's Transfer Secretaries will follow a verification process to verify each applicant's entitlement to participate in and/or vote at the AGM. The Company's Transfer Secretaries will provide the Company with the email address of each verified shareholder or their duly appointed proxy (each, "a Participant") to enable the Company to forward the Participant a Microsoft Teams meeting invitation required to access the AGM.

Hulamin will send each Participant a Microsoft Teams meeting invitation with a link to "Join the Microsoft Teams Meeting" on 27 May 2021 to enable Participants to link up and participate electronically in the AGM. This link will be sent to the email address nominated by the Participant in the table below.

### Please note

The electronic platform to be utilised for the AGM does not provide for electronic voting during the meeting. Accordingly, shareholders are strongly encouraged to submit votes by proxy in advance of the AGM, by completing the Form of Proxy (found at page 11) and lodging the completed proxy form together with this Electronic Participation Application Form with the Company's Transfer Secretaries.

Participants who indicate in this form that they wish to vote during the electronic meeting, will be contacted by the Company's Transfer Secretaries to make the necessary arrangements.

Participants will be liable for their own network charges in relation to electronic participation in and/or voting at the AGM. Any such charges will not be for the account of the Company's Transfer Secretaries or Hulamin who will also not be held accountable in the case of loss of network connectivity or other network failure due to insufficient airtime, internet connectivity, internet bandwidth and/or power outages which prevents any such Participant from participating in and/or voting at the AGM.

By signing this application form, the Participant indemnifies and holds the Company harmless against any loss, injury, damage, penalty or claim arising in any way from the use of the telecommunication lines to participate in the AGM or any interruption in the ability of the Participant to participate in the AGM via electronic communication, whether or not the problem is caused by any act or omission on the part of the Participant or anyone else, including without limitation the Company and its employees.

### Information required for participation by electronic communication at the AGM

Full name of shareholder:
Identity or registration number of shareholder:
Full name of authorised representative (if applicable):
Identity number of authorised representative:
Email address: *Note: this email address will be used by the Company to share the Microsoft Teams invitation required to access the AGM electronically
Cell phone number:
Telephone number, including dialling codes:
*Note: The electronic platform to be utilised for the AGM does not provide for electronic voting during the meeting. Accordingly, shareholders are strongly encouraged to submit votes by proxy in advance of the AGM, by completing the proxy form found at page 11.
Indicate (by marking with an 'X') whether: <input type="checkbox"/> votes will be submitted by proxy in advance of the AGM (in which case, please enclose the duly completed proxy form with this form); or <input type="checkbox"/> the Participant will not be submitting votes by proxy in advance of the AGM and wishes to cast votes during the AGM. If this option is selected, the Company's Transfer Secretaries will contact you to make the necessary arrangements.
By signing this application form, I consent to the processing of my personal information above for the purpose of participating in Hulamin's AGM.
Signed at _____ on _____ 2021
Signed:

# APPLICATION FORM FOR ELECTRONIC PARTICIPATION AT THE ANNUAL GENERAL MEETING CONTINUED

Documents required to be attached to this application form

1. In order to exercise their voting rights at the AGM, shareholders who choose to participate electronically may appoint a proxy, which proxy may participate in the AGM, provided that a duly completed proxy form has been submitted in accordance with the instructions on that form, and as envisaged in the notice of the AGM, a copy of which proxy form follows Annexure A of the AGM notice.
2. Documentary evidence establishing the authority of the named person, including any person acting in a representative capacity, who is to participate in the AGM, must be attached to this application.
3. A certified copy of the valid identity document/passport/ of the person attending the AGM by electronic participation, including any person acting in a representative capacity, must be attached to this application.

Applications to participate by electronic communication will only be considered if this application form is completed in full, signed by the shareholder, its proxy or representative, and delivered as detailed above. The Company may in its sole discretion accept any incomplete application forms.

# DIRECTORS' STATEMENT OF RESPONSIBILITY AND APPROVAL OF THE ANNUAL FINANCIAL STATEMENTS

The Directors are required by the Companies Act, 2008 of South Africa, to maintain adequate accounting records and are responsible for the content and integrity of the annual financial statements of Hulamin Limited and its subsidiaries and related financial information included in this report. It is their responsibility to ensure that the annual financial statements fairly present the state of affairs of the Company and the Group as at the end of the financial year and the results of its operations and cash flows for the year then ended in conformity with International Financial Reporting Standards, the Companies Act, No 71 of 2008, as amended, and the JSE Listing Requirements. The external auditors are engaged to express an independent opinion on the annual financial statements.

In preparing the annual financial statements, the Company and the Group have used appropriate accounting policies, supported by reasonable and prudent judgement and estimates, and have been prepared in accordance with International Financial Reporting Standards. The directors are of the opinion that the annual financial statements fairly present the financial position of the Company and the Group at 31 December 2020 and the results of its operations and cash flows for the year then ended. The directors have considered the group's past results, expected future performance and reasonable changes thereto, and access to its funding, material and other resources, and in light of this review and the Group's current financial position, are satisfied that the Company and Group have access to adequate resources to continue in operational existence for the foreseeable future as a going concern.

The directors are responsible for the systems of internal control. These are designed to provide reasonable, but not absolute, assurance as to the reliability of the annual financial statements, to adequately safeguard, verify and maintain accountability of assets, and to prevent and detect material misstatement and loss.

Based on the results of a formal documented review of Hulamin's system of internal controls and risk management by the internal audit function during the year, the information and explanations given by management and the comment by the independent auditors on the results of their statutory audit, nothing other than detailed in the Chief Executive Officer and Chief Financial Officer statement has come to the attention of the directors which indicates that, in all material aspects, Hulamin's system of internal controls and risk management is not effective and that the internal financial controls do not form a sound basis for the preparation of reliable annual financial statements. The opinion of the directors is supported by the Group's Audit Committee.

The financial statements have been audited by the independent auditing firm, Ernst & Young Inc., which was given unrestricted access to all financial records and related data, including minutes of all meetings of the shareholders, the Board of Directors and committees of the Board. The directors believe that all representations made to the independent auditors during the audit were valid and appropriate. Their unqualified report appears on pages 13 to 16.

The annual financial statements of the Group and Company set out on pages 17 to 117, which have been prepared on the going-concern basis, were approved by the Board of Directors on 13 April 2021 and were signed on its behalf by:

**Thabo Patrick Leeuw**  
Chairman

Pietermaritzburg, KwaZulu-Natal  
13 April 2021

**Richard Gordon Jacob**  
Chief Executive Officer

## CERTIFICATE BY COMPANY SECRETARY

I certify that, to the best of my knowledge and belief that the requirements as stated in terms of section 88(2) of the Companies Act, No 71 of 2008, as amended, have been met and that all returns, as required of a public company in terms of the aforementioned Act, have been submitted to the Companies and Intellectual Property Commission and that such returns are true, correct and up to date.

Willem Fitchat  
Company Secretary

Pietermaritzburg, KwaZulu-Natal  
13 April 2021

# DIRECTORS' STATUTORY REPORT

Dear shareholder

The directors have pleasure in presenting their report for the year ended 31 December 2020.

## Nature of business

Hulamin Limited ("Hulamin") is the holding company of two main operating segments, Hulamin Rolled Products and Hulamin Extrusions. Their activities are dealt with separately in note 2.1 of the group financial statements.

The activities of Isizinda Aluminium Proprietary Limited ("Isizinda"), which supplied slab to Hulamin Rolled Products, are integrated into the Hulamin Rolled Products segment. Hulamin, through its wholly-owned subsidiary, Hulamin Operations Proprietary Limited ("Hulamin Operations") has ownership of 38.74% in Isizinda, with the remaining shares being held 58.74% by Bingelela Capital Proprietary Limited ('Bingelela') and 2.53% by the Isizinda Employee Share Trust ('the Isizinda Trust').

On 22 May 2019, Hulamin Operations agreed a term sheet with Isizinda, Bingelela, the Isizinda Trust, Bingelela Alloys Proprietary Limited and Bingelela Extrusion Billets Proprietary Limited. The agreement gives effect, inter alia, to the purchase by Hulamin Operations from Isizinda the slab business ('the Sale of Business Agreement'), the provision of funding by Hulamin to Isizinda ('the funding agreement') and an evergreen lease agreement between Hulamin and Isizinda for the lease of a portion of the property on which the slab business is located ('lease agreement'). This transaction is more fully described below in the section entitled 'Isizinda transaction'.

## Financial results

The net loss attributable to shareholders of the group for the year ended 31 December 2020 amounted to R230 million (2019: R1 204.5 million). This translates into a loss per share of 75 cents (2019: loss per share of 380 cents).

The group's results were impacted by impairment charges totalling R8.5m million (2019: R1 302.9 million), largely relating to the reduction in the carrying amounts of the net assets of the Hulamin Extrusions cash-generating units to their estimated value in use. These impairments reflect both a reduction in the five-year forecast cash flows of these cash-generating units due to the softer outlook in market conditions, as well as an increase in Hulamin's weighted average cost of capital which takes account of increased uncertainty in the macro environment and the associated rise of risk indicators.

A metal price lag gain (after hedging) of R112 million (refer note 2.1(b)) was recorded in 2020 (2019: loss of R68 million), as the Rand aluminium price increased during 2020. In anticipation of tight liquidity due to Covid disruptions, the programme to hedge the metal price lag by 50% was suspended at the end of March 2020 to reduce cash flow volatility from the commodity and currency derivative instruments. Once liquidity headroom improves during 2021, Hulamin will consider the timing and quantum of restoring this hedging programme. Any restoration also requires reliable sales forecasting rather than a resurgence of disruptions.

The group recorded a headline loss per share of 68 cents (2019: headline loss per share of 76 cents) based on the weighted average number of shares in issue during the year.

Factors impacting the decline in headline earnings per share for the current period are:

### Hulamin Rolled Products operating performance

Hulamin Rolled Products experienced challenging conditions in 2020, with Covid-19 causing significant market and operational disruption both locally and internationally. The ban on alcohol sales within RSA had a particularly significant impact on local aluminium can sales. These effects were compounded by the anti-dumping petition on imports into the USA from many countries including RSA prior to the release of the preliminary findings as outlines in notes 1.9 (ii) and 1.10. As a result, Hulamin Rolled Products sales volumes declined 24% to approximately 155 000 tons. Due to the high fixed manufacturing cost base of the business, the impact on operating profit of this sharp reduction in volume has been severe.

### Hulamin Extrusions operating performance

Following the restructuring of the business in H2 of 2019, and the closure of the Olifantsfontein plant, 2020 was to be the year of rebuilding the business. Unfortunately, this was severely disrupted with the national Covid-19 lockdown with the business losing seven weeks of output. Even when operations restarted in May, operating at capacity was disrupted by infections and Covid-19 protocols.

Business performance improved significantly in the second half of the year as the business and economy recovered. The business enjoyed a strong order book through this period and business performance improved in line with this strong order book.

## Group

In addition to the items noted above, the financial results were impacted by:

- A positive metal price lag of 112 million (2019: negative of R68 million) (refer note 2.1(b)), resulting from an increase in the aluminium price during 2020 (this was partially offset by the Rand strengthening against the US Dollar in the second half of the financial year);
- A negative R114 million relating to aluminium futures and currency hedges not qualifying for hedge accounting in 2020;
- A cost associated with the BEE Extension Transaction amounting to R15 million;
- A receipt of the employee surplus account for the Tongaat Hulett Pension Fund amounting to R16 million; and
- A derecognition of previously recognised deferred tax asset of R76.9 million.

# DIRECTORS' STATUTORY REPORT CONTINUED

## Solvency and liquidity

The group's net borrowings were R751 million (2019: R225.9 million) and net debt was R818.8 million (2019: R272.4 million) as at 31 December 2020. This represents a net debt to equity ratio of 35% (2019:10.6%).

The annual financial statements presented on pages 17 to 117 set out fully the financial position, results of operations and cash flows for the year.

## Isizinda transaction

Hulamin produces the majority of its rolling slab requirements at its Pietermaritzburg plant and sourced the balance from Isizinda. The operation of slab casting facilities is therefore one of Hulamin's core business competencies and a strategic element of the business. Bingelela wished to exit the slab casting business to pursue the production of rim alloys and extrusion billet on the property. Accordingly, it was agreed on 22 May 2019 that, *inter alia*, Hulamin Operations would purchase the slab business from Isizinda, effective 1 January 2020, and that Isizinda would use the proceeds from the disposal of the business assets to reduce its loan from Hulamin.

As reported previously in 2019 Hulamin agreed to a funding agreement between Hulamin and Isizinda in terms of which Hulamin advanced R50 million to Isizinda, which has been used by Isizinda to declare a dividend of R35 million to Bingelela, with a further dividend of R15 million to be declared and paid upon Hulamin completing a long-term metal supply agreement with Hillside Aluminium Proprietary Limited.

This transaction was concluded on 1 January 2020 resulting in Hulamin gaining full ownership and control of the production of rolling slab at Bayside. Upon the effective date of sale, the "relevant activities" of Isizinda, in terms of IFRS 10 changed materially and as of 1 January 2020, management determined that Hulamin no longer controls Isizinda in terms of the requirements of IFRS 10. This loss of control in Isizinda resulted in the group acquiring a 38.7% investment in joint venture. Full details of the accounting implications of the Isizinda Transaction have been disclosed in note 6.1(d) of the group financial statements.

## Impact of new accounting standards

The group adopted amendments to various accounting standards which were effective for the year ended 31 December 2020. These amendments did not have a material impact on the group results.

Full details of the impact of the adoption of these amendments have been disclosed in note 10 of the group financial statements.

## Dividends

No dividends were declared for the year ended 31 December 2020 (2019: No dividends declared).

## Share capital

There were minor changes in the authorised and issued share capital during the year under review due to the BEE Extension transaction, which is disclosed in note 8.1(d) of the group annual financial statements.

During the year, Hulamin Operations purchased 7 638 806 shares (2019: 8 183 539 shares) on-market to hold treasury shares to settle share scheme obligations in terms of a share repurchase programme approved by shareholders at the annual general meeting held on 15 May 2019.

Details of the authorised, issued and unissued ordinary shares, the share repurchase and the group's share incentive schemes are set out in notes 3.5 and 8.1 of the group financial statements.

## Subsidiaries

Details of Hulamin Limited's interest in its subsidiaries are set out in note 6.1 (d) of the group financial statements.

## Directorate

Brief curricula vitae of the directors are listed on the company's website. Details of directors' remuneration are reflected in note 8.3.1 of the group financial statements.

# DIRECTORS' STATUTORY REPORT CONTINUED

## Directors' and prescribed officer's shareholdings

At 31 December 2020, the present directors and prescribed officer of the company beneficially held a total of 1 100 749 ordinary no par value shares, equivalent to 0.34 percent, in the company (2019: 1 192 359 ordinary no par value shares, equivalent to 0.37 percent, were held by directors).

Their associates held no ordinary par value shares in the company. Details of the directors' and prescribed officer's shareholdings and interests in the share incentive schemes are set out in notes 8.3.2 and 8.3.3 of the group financial statements.

There has been no change in the directors' and prescribed officer's shareholdings between 31 December 2020 and 31 March 2021.

## Holding company

Hulamin Limited is the ultimate holding company at 31 December 2020.

## Auditors

Ernst & Young Inc. continued as auditors of Hulamin Limited and its subsidiaries during the current financial year. At the annual general meeting of 27 May 2021, shareholders will be requested to appoint Ernst & Young Inc. as auditors of Hulamin Limited for the 2021 financial year and it will be noted that Mr S Sithebe will be the individual registered auditor that will undertake the audit.

## Secretary

The Company Secretary of Hulamin Limited is Mr W Fitchat. His business and postal address appears in the corporate information section.

## Events after the reporting period

Events between the end of the financial year and the date of this report have been detailed in note 1.9 of the group financial statements. The most noteworthy events are:

- a) The sale of the Hulamin Extrusions site in Gauteng and receipt of the proceeds. This follows the closing of this site (as detailed in the prior year report) and concentration of extrusion activity at the Pietermaritzburg site;
- b) The economic impact of the foreign trade duties imposed on aluminium imported into RSA; and
- c) 4 721 600 A3 ordinary shares arising from the BEE Extension Transaction were issued to the ESOP trust in January 2021.

## Going concern

The consolidated financial statements have been prepared using appropriate accounting policies, supported by reasonable judgements and estimates. The directors believe that the group has adequate resources to continue as a going concern for the foreseeable future.

Despite the deterioration in the group's liquidity position during 2020 to the date of this report, the directors believe that cash generated by Hulamin's operations, identified cash preservation activities, Hulamin's committed unutilised debt facilities as well as additional funding opportunities will enable the group to continue meeting its obligations as they fall due. The consolidated financial statements for the year ended 31 December 2020, therefore, have been prepared on the going concern basis.

In making this assessment, the board has considered the potential impact of the uncertainties surrounding the group which relate to matters a) and b) listed in the section above, together with a consideration of management's scenarios and forecasts to the end of 2021 set out in note 1.10 of the group financial statements. It is recognised, however, that a more adverse impact of the uncertainties than included in these scenarios, or a different combination thereof, could further deteriorate the group's forecasted liquidity position and may require the group to further increase operational flexibility and reduce costs. The group may also, if necessary, be required to consider raising additional loan facilities or equity capital.

Whilst, the board do not consider it likely that either a lack of approval of the Long-Term Negotiated Pricing Agreement Policy by the Department of Mineral Resources and Energy or an adverse adjudication by NERSA of the electricity supply agreement entered into between South32 and Eskom will prevent the continuation of the metal supply agreement entered into between Hulamin and South32, the impact of such an event would be substantial for Hulamin, with annual negative cash flows of between R300 million and R400 million.

# DIRECTORS' STATUTORY REPORT CONTINUED

## Approval

The annual financial statements of the group and company set out on pages 17 to 117 have been approved by the board. Signed on behalf of the board of directors by:

**Thabo Patrick Leeuw**  
*Chairman*

**Richard Gordon Jacob**  
*Chief Executive Officer*

Pietermaritzburg, KwaZulu-Natal  
13 April 2021

# THE CEO AND CFO'S RESPONSIBILITY STATEMENT

The directors, whose names are stated below, hereby confirm that:

- the annual financial statements set out on pages 17 to 117, fairly present in all material respects the financial position, financial performance and cash flows of the issuer in terms of IFRS.
- no facts have been omitted or untrue statements made that would make the annual financial statements false or misleading;
- internal financial controls have been put in place to ensure that material information relating to the issuer and its consolidated subsidiaries have been provided to effectively prepare the financial statements of the issuer; and
- the internal financial controls are adequate and effective and can be relied upon in compiling the annual financial statements, having applied the combined assurance model pursuant to principle 15 of the King Code. Where we are not satisfied, we have disclosed to the audit committee and the auditors the deficiencies in design and operational effectiveness of the internal financial controls and any fraud that involves directors, and have tabled the planned remedial action.

**Richard Gordon Jacob**  
*Chief Executive Officer*

**Meganathan Gounder**  
*Chief Financial Officer*

# REPORT OF THE AUDIT COMMITTEE

## Introduction

The Hulam Group Audit Committee (“the committee” or “Audit Committee”) presents its report in terms of section 94(7)(f) of the Companies Act, No 71 of 2008, as amended (“Companies Act”), and as recommended by King IV, for the financial year ended 31 December 2020.

The Audit Committee is an independent statutory committee appointed by the shareholders. Further duties are delegated to the committee by the Board of Directors of the company.

## Membership and meetings

The committee comprises three independent non-executive directors. All members of the committee have the requisite financial knowledge and commercial skills and experience to contribute effectively to committee deliberations. The members were appointed by shareholders at the 2020 annual general meeting of the company in terms of section 94(2) of the Companies Act. For the year under review, the Audit Committee comprised:

- N Maharajh (Chairman)
- NNA Matyumza (resigned as director with effect 30 June 2020)
- CA Boles
- Dr B Mehlomakulu (appointed as a member of Audit Committee with effect from 1 August 2020)

The Chief Financial Officer, Head of Internal Controls and representatives from the external and internal auditors attend meetings by invitation.

Other members of the Board and management team attend as required. The committee meets separately with the external and internal auditors at least once a year without management present, to ensure that all relevant matters have been identified and discussed without undue influence.

The Audit Committee had three scheduled meetings during the year.

Full details of membership of the committee and attendance at committee meetings during the financial year are also set out in the Corporate Governance report available on the Hulam website at [www.hulam.co.za](http://www.hulam.co.za).

## Role and responsibilities

The role and responsibilities of the committee include statutory duties per the Companies Act, and further responsibilities assigned to it by the Board. The committee executed its duties in terms of the requirements of King IV. The Audit Committee fulfils an oversight role regarding financial reporting risks, internal financial controls, fraud risk and information technology risks as it relates to financial reporting.

The key responsibilities of the committee are as follows:

- Ensuring the integrity of the financial reporting process, including sound systems of internal control and financial risk management;
- Review of integrated annual reports, annual financial statements, interim reports and other financial announcements, including the accounting principles and policies adopted therein and compliance with JSE regulations;
- Monitoring the performance and effectiveness of the independent external auditors and evaluating the qualifications, expertise, resources, fees, scope of work and independence of the external auditors prior to recommending their appointment to the Board and shareholders;
- Approving the internal audit workplan and overseeing the conduct of the internal audit and the implementation of internal control enhancements;
- Approving any non-audit services provided by the external auditors;
- Considering the appropriateness of the expertise, resources and experience of the finance function and of the Chief Financial Officer;
- Approving the appointment of an external assurance provider in respect of the sustainability report;
- Performing statutory duties in terms of the Companies Act, as well as to report to the shareholders in respect of the financial year, including those matters in terms of section 94(7)(f) of the Companies Act;
- Ensuring that the combined assurance model introduced by the King IV Code is applied to provide a coordinated approach to assurance activities;
- Providing oversight of the risk management through monitoring the implementation of the group risk policy and group risk plan as approved by the Board;
- Oversee the governance of technology and information by setting the direction on how technology and information should be approached and addressed, and recommend to the Board the policy that gives effect to the set direction of technology and information; and
- Review and recommend to the Board for authorisation the group’s treasury policy, authority limits and funding, investment and treasury risk management strategies.

# REPORT OF THE AUDIT COMMITTEE CONTINUED

## Performance of duties

The Audit Committee is satisfied that, during the year under review, it complied with its legal, regulatory and other responsibilities, conducted its affairs in compliance with Board-approved terms of reference, and discharged its responsibilities contained therein.

The committee is therefore pleased to report that it discharged the following responsibilities for the period under review:

## External auditor appointment and independence

The committee has satisfied itself that the external auditor was independent of the company, as set out in section 94(8) of the Companies Act, which includes consideration of previous appointments of the auditor, the extent of other work undertaken by the auditor for the company and compliance with criteria relating to independence or conflicts of interest as prescribed by the Independent Regulatory Board for Auditors.

The committee ensured that the appointment of the auditor complied with the Companies Act, and any other legislation relating to the appointment of auditors.

In respect of the 2020 financial year, the committee was satisfied with the quality and effectiveness of the audit process of Ernst & Young Inc. and that Ernst & Young Inc. and the designated audit partner, Mr S Sithube, were accredited as such on the JSE list of auditors and their advisors. As required by the JSE Listings Requirements, the company received a summary from Ernst & Young of its latest IRBA inspection report, responses thereto and any remedial actions in respect thereof, as well as the quality control monitoring system applied by Ernst & Young.

The committee, in consultation with executive management, agreed to the engagement letter, terms, audit plan and audit fees for the 2020 year as disclosed in note 2.4.5 of the financial statements of the group.

There is a formal procedure that governs the process whereby the auditor is considered for non-audit services. The committee considers the approval of non-audit services where the approval will add value to the external audit process or the anticipated engagement is superior to other service providers. The committee approved all engagements for the provision of non-audit services by the external auditor, in terms of the established policy for non-audit services. In terms of the policy, the cumulative fee for non-audit services should not exceed 25% of the annual audit fee without the specific approval of the Audit Committee.

## Internal audit

The committee is responsible for ensuring that the company's internal audit function is independent and has the necessary resources, standing and authority within the company to enable it to discharge its duties in terms of the established internal audit charter. Furthermore, the committee oversees cooperation between the internal and external auditors and serves as a link between the Board of Directors and these functions.

The internal audit function reports centrally and is responsible for reviewing and providing assurance on the adequacy of the internal control environment across the group's operations.

An internal audit charter is in place which defines the function, responsibility and authority of the group's internal audit activity. The internal audit function's 2020 annual audit plan was approved by the committee.

The Head of Internal Audit had direct access to the committee and was responsible for reporting the findings of the internal audit work against the agreed internal audit plan to the committee.

During the year, the committee satisfied itself that the Head of Internal Audit was competent and possessed the appropriate expertise and experience to act in this capacity, and believes that the group's internal audit function met its objectives and that the adequate procedures were in place to ensure that the group complies with its legal, regulatory and other responsibilities.

During the year under review, the committee met with the internal and external auditors without management being present.

# REPORT OF THE AUDIT COMMITTEE CONTINUED

## Internal financial controls

The committee has overseen a process guided by principle 15 of the King Code, by which Hulamın management and internal audit performed a written assessment of the effectiveness of the company's system of internal control and risk management, including internal financial controls. This process enabled the committee to ensure that Hulamın's internal assurance services and functions enable an effective control environment, and that these services and functions support the integrity of information for both Hulamın's internal decision-making and for Hulamın's external reports.

The following information was assessed to substantiate the committee's views on the effectiveness of the design and implementation of financial controls, and of the nature and extent of any significant weaknesses in the design, implementation or execution of those internal financial controls.

### Internal Control Review Assessment

The CEO and CFO's evaluation of controls included:

- The identification and classification of risks including the determination of materiality.
- Testing the design and determining the implementation of controls addressing high and low risk areas as determined by management.
- Utilising internal audit to test the operating effectiveness of controls addressing these identified high risk areas.

The CEO, CFO and the internal auditor, reviewed the controls over financial reporting, and presented their findings to the Audit Committee. During the current financial year management identified 8 significant deficiencies in internal control over financial reporting of the 697 controls tested throughout the year.

These significant deficiencies relate to certain controls within the group's financial statement closing process, entity level controls with respect to performance management and operational controls with respect to asset management. Investigations by management indicated that these significant deficiencies arose largely due to staff capacity constraints in the group finance and operational team's due to the restructuring process the group embarked on in 2018/2019 and the impact of lockdowns experienced under COVID 19 in 2020 which impacted negatively on these internal controls.

A formal remediation plan has been developed to address all control deficiencies identified including the significant deficiencies which will be remediated over the course of 2021. Management will report regularly to the audit committee with respect to their progress over the course of 2021.

The Committee satisfied itself that none of these deficiencies had a material effect for the purposes of the preparation and presentation of the financial statements for the year under review and believe that Hulamın's internal controls can be relied upon as a reasonable basis for the preparation of the Annual Financial Statements.

## Governance of risk

The Board has assigned oversight of the company's risk management function to the Risk Committee. The chairman of the Audit Committee attended meetings of the Risk Committee as a member thereof for the year under review to ensure that information relevant to these respective committees was transferred regularly. The Audit Committee fulfils an oversight role regarding financial reporting risks, internal financial controls, and fraud and information technology risks as they relate to financial reporting.

## Evaluation of the expertise and experience of the financial director and finance function

The committee has satisfied itself during the year under review that both the Chief Financial Officer and subsequent Acting Chief Financial Officer have the appropriate expertise and experience. The committee is of the view that the finance function needs to be strengthened and has commenced the process to effect this.

## Financial statements and accounting practices

The committee has reviewed the accounting policies and the financial statements of the company and the group for the year ended 31 December 2020 and is satisfied that they are appropriate and comply with International Financial Reporting Standards.

The committee has considered and discussed the annual financial statements and associated reports with both management and the external auditors.

# REPORT OF THE AUDIT COMMITTEE CONTINUED

## Financial statements and accounting practices continued

During this process, the committee:

- evaluated significant judgements and reporting decisions;
- determined that the going-concern basis of reporting is appropriate;
- evaluated the material factors and risks that could impact on the annual financial statements and associated reports;
- evaluated the completeness of the financial and sustainability discussion and disclosures; and
- discussed the treatment of significant and unusual transactions with management and the external auditors.

The significant audit and accounting matters considered by the Committee in relation to the 2020 annual financial statements were:

- Impairment of property, plant and equipment and related fair value less costs to sell assessments;
- Accounting for the sale of the Isizinda slab assets and the resultant loss of control of Isizinda;
- The financial impact of the BEE Extension Transaction;
- The derecognition of deferred tax assets;
- The appropriateness of going concern in light of the continued impact of Covid 19

The auditors have issued an unmodified audit opinion.

## Integrated reporting, sustainability and combined assurance

The committee fulfils an oversight role regarding the company's integrated report and the reporting process. The integrated report is a separate report to these financial statements.

The committee considered the company's sustainability information as disclosed in the integrated report and separate sustainability report of the group for the year ended 31 December 2020 and has assessed its consistency with operational and other information known to committee members, and for consistency with the annual financial statements. The committee discussed the sustainability information with management and has considered the conclusion of the external assurance provider. The committee is satisfied that the sustainability information is reliable and consistent with the financial results.

The committee recommended to the Board the appointment of KPMG Services (Pty) Ltd to perform an assurance engagement on key performance indicators included in the company's 2020 sustainability reporting. The committee determined the scope of this assurance engagement and satisfied itself as to the independence and competency of the external assurance provider.

The committee ensures the combined assurance model is appropriate to address the significant risks facing the business and is satisfied that the company has optimised the assurance coverage obtained from management, and internal and external assurance providers for the year under review.

The committee recommended the 2020 integrated report for approval by the Board of Directors. This report will be made available on the Hulamín website at [www.hulamin.co.za](http://www.hulamin.co.za).

## Technology and information

The committee oversees the governance of technology and information by setting the direction on how technology and information should be approached and addressed.

The committee reviewed the governance structure, key risks, internal controls and activities of the technology and information function during the year. The key matters which are being attended to relate to a cybersecurity control and resilience improvement programme, and an updated IT strategy, which includes the modernisation of Hulamín's application environment and a digitalisation programme.

## Treasury

The committee has reviewed and recommended to the Board for approval the group's treasury strategy, policy and authority limits. The committee has reviewed the risk management activities report as provided by the Treasury Committee and has found the risk management activities to be sufficient to mitigate risk.

# REPORT OF THE AUDIT COMMITTEE CONTINUED

## Going concern

The committee has reviewed a documented assessment, including key assumptions, prepared by management of the going concern status of the company and the group as at 31 December 2020 and has made a recommendation to the Board in this respect. The Board's statement on the going-concern status of the company and the group, as supported by the committee, is detailed on page 5.

On behalf of the Audit Committee

**Naran Maharajh**

*Chairman of the Audit Committee*

Pietermaritzburg, KwaZulu-Natal

13 April 2021

## INDEPENDENT AUDITOR'S REPORT

### TO THE SHAREHOLDERS OF HULAMIN LIMITED

---

#### Report on the Audit of the Consolidated and Separate Financial Statements

##### *Opinion*

We have audited the consolidated and separate financial statements of Hulamín Limited (the "Company") and its subsidiaries ('the group') and company set out on pages 17 to 117, which comprise of the consolidated and separate statements of financial position as at 31 December 2020, and the consolidated and separate statements of profit or loss and other comprehensive income, the consolidated and separate statements of changes in equity and the consolidated and separate statements of cash flows for the year then ended, and notes to the consolidated and separate financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated and separate financial statements present fairly, in all material respects, the consolidated and separate financial position of the group and company as at 31 December 2020, and its consolidated and separate financial performance and consolidated and separate cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa.

##### *Basis for Opinion*

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the consolidated and separate financial statements section of our report. We are independent of the group and company in accordance with the Independent Regulatory Board for Auditors' Code of Professional Conduct for Registered Auditors (IRBA Code) and other independence requirements applicable to performing audits of financial statements of the group and company and in South Africa. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code and in accordance with other ethical requirements applicable to performing audits of the group and company and in South Africa. The IRBA Code is consistent with the corresponding sections of the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards). We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

##### *Key Audit Matters*

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of our audit of the consolidated and separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's Responsibilities for the Audit of the consolidated and separate financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated and separate financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated and separate financial statements.

The Key Audit Matters applies equally to the audit of the consolidated and separate financial statements.

Key Audit Matter	How our audit addressed the key audit matter
<b>Impairment assessment of the rolled products cash generating unit (CGU)</b>	
<p>At year end, the value of the rolled products cash generating unit (CGU) amounted to R3 billion (2019: 2.5 billion) representing 74% (2019: 60%) of total assets.</p> <p>IAS 36 Impairment of assets requires an impairment test of non-financial assets to be performed when there are indicators that these may be impaired. The Group's market capitalization was below its net asset value as at 31 December 2020, indicating that the carrying value of the Group's assets may be impaired.</p> <p>Management performed the impairment assessment using the discounted cash flow (DCF) valuation model to determine the recoverable amount of the rolled products CGU. The determination of the recoverable amounts involves significant judgments made by management about the inputs in the DCF.</p> <p>We considered the impairment test management performed of the rolled products CGU to be a key audit matter that required significant audit attention due to the size of the balances and due to the complexity, estimation and sensitivity of the following inputs to the DCF:</p> <ul style="list-style-type: none"> <li>• the discount rate;</li> <li>• the forecast USD / ZAR foreign currency exchange rate;</li> <li>• the forecast metal prices,</li> <li>• the forecast sales volume and sales mix;</li> <li>• the forecast rolling margins, considering current and anticipated changes in the market conditions and product mix; and</li> <li>• the forecast operating costs including the inflation rate;</li> </ul> <p>The discount rate determined by management is based on capital asset pricing model which includes inputs that are subjective.</p> <p>COVID-19 has had a significant impact on the assumptions listed above, and more specifically reduced our ability to rely on historical trends and required additional audit effort to assess the assumptions made about the future outlook in the macro-economic environment as well as requiring the use of our valuation specialists.</p> <p>Management's disclosure on impairment consideration are detailed in <i>Note 2.4.4 Impairment of Non-financial assets</i> of the Annual Financial Statements.</p>	<p>Our audit procedures for the impairment assessment of the rolled products CGU amongst others, included:</p> <ul style="list-style-type: none"> <li>• We evaluated management's assessment of the presence of indicators of impairment against the applicable requirements of IAS 36 <i>Impairment of assets</i>;</li> <li>• With the support of our internal valuation specialists, we assessed the methodology applied by management in determining the recoverable amount of the CGU against acceptable industry methods and accounting standards;</li> <li>• We involved our internal valuation specialists to evaluate the reasonableness of the market data inputs including the forecasted exchange rates, metal prices, and inflation rates by comparing the market data inputs to independently sourced forward-looking external market data based on our knowledge of the industry; we further evaluated the reasonableness of the methodology used by management in forecasting the exchange rates beyond a two year period premium;</li> <li>• We involved our internal valuation specialists to assess the reasonability of the discount rate applied by agreeing the base rate to external sources, evaluating the market risk premium applied by management to the base rate and recalculating the discount rate;</li> <li>• With regards to the forecast revenue volumes, sales mix, rolling margins and operating costs:</li> <li>• We compared the forecast sales volumes, sales mix and operating costs to historical actuals (specifically, we focused on the FY20 actuals given the impact of COVID-19 on the business) and management's plans since the start of the COVID-19 pandemic with regards to the board approved business plans;</li> <li>• We agreed the assumptions used in managements forecasts for sales volumes, sales mix, estimated demand and production capacity to the terms and conditions of open customer contracts;</li> <li>• We independently performed sensitivity analyses over the impact of changes in the salient inputs into the DCF model which includes the discount rate, the exchange rate and the rolling margins.</li> <li>• We tested the mathematical accuracy of the discounted cash flow valuation model;</li> <li>• We assessed the adequacy of disclosures of the disclosures made in the Annual Financial Statements in accordance with IAS 36 - Impairment of assets.</li> </ul>

### ***Other Information***

The directors are responsible for the other information. The other information comprises the information included on pages 2 - 12, of the document titled "Hulamin Limited Annual Financial Statements for the year ended 31 December 2020", which includes the Directors' Statement of Responsibility and Approval of the Annual Financial Statements, Directors' Statutory Report, the CEO and CFO's Responsibility Statement, the Audit Committee's Report and the Company Secretary's Certificate as required by the Companies Act of South Africa. The other information does not include the consolidated or the separate financial statements and our auditor's report thereon.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### ***Responsibilities of the Directors for the Consolidated and Separate Financial Statements***

The directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the directors are responsible for assessing the group and company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group and company or to cease operations, or have no realistic alternative but to do so.

### ***Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements***

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the group and company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the group and company's ability to continue as a going concern. If we conclude that

a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the group and/or the company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

#### ***Report on Other Legal and Regulatory Requirements***

In terms of the IRBA Rule published in Government Gazette Number 39475 dated 4 December 2015, we report that Ernst & Young Inc. has been the auditor of Hulamin Limited for 3 years.

# NOTES TO THE STATEMENT OF CHANGES IN EQUITY

for the year ended 31 December 2020

## A: Stated capital and consolidation shares

Stated capital represents the group's issued share capital held by outside shareholders. Consolidation shares represent shares held under various BEE transactions. Further information of the group's stated capital and consolidation shares is presented in note 3.5.

## B: Treasury shares

Shares in the company held by wholly-owned group companies are classified as treasury shares. These shares are treated as a deduction from the issued and weighted average number of shares and the cost of the shares is deducted from group equity. Dividends received on treasury shares are eliminated on consolidation. No gains and losses are recognised in the group statement of profit or loss or the statement of comprehensive income on the purchase, sale, issue or cancellation of treasury shares. During the year the group purchased 7 638 806 shares (2019: 8 183 539 shares). The total cost of R13 816 000 (2019: R22 000 000) including after tax transactions costs and excluding the vesting of A1 ordinary shares, was deducted from shareholder equity. The total deduction in paid-up capital was R35 863 000 (2019: R22 000 000).

## C: Hedging reserve

The hedging reserve includes the cash flow hedge reserve and the costs of hedging reserve. The cash flow hedge reserve is used to recognise the effective portion of gains or losses on derivatives that are designated and qualify as cash flow hedges. Amounts are subsequently transferred to revenue as part of the hedging relationship or reclassified to profit or loss as appropriate. The group defers the changes in the forward element of forward contracts and the time value of option contracts in the costs of hedging reserve. These deferred costs of hedging are included in revenue when it is recognised. Further analysis of the reserve is presented in note 7.1(d)(iii).

## D: Employee share-based payments reserve

The share-based payments reserve is used to recognise the grant date fair value of options issued to employees. On settlement, the value of the reserve is transferred to retained earnings. A deferred tax asset on outstanding grants is recognised where the grants are in-the-money, with the deferred tax on the portion above the fair value of the option being recognised directly in retained earnings. Further details of share options outstanding are provided in notes 8.1(c) and 8.1(d)(ii).

## E: BEE reserve

The BEE reserve is used to recognise the grant date fair value of options issued to identified BEE participants and Isizinda BEE participants. Further details of these transactions are provided in notes 8.1(d)(i) and 8.1(d)(iii).

## F: Retained earnings

The retained earnings represent the cumulative historic profit and loss reinvested in the group. No restrictions exist on the use of the retained income.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 31 December 2020

## 1. General

### 1.1 Basis of preparation

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS), IFRIC interpretations, SAICA Financial Reporting guides as issued by the Accounting Practices Committee, Financial Pronouncements as issued by Financial Reporting Standards Council, the requirements of the Companies Act, no 71 of 2008, as amended, and the Listing Requirements of the JSE Limited.

The basis of preparation is consistent with the prior year, except for new and revised standards and interpretations adopted per note 1.2(a) to the financial statements.

The consolidated financial statements are prepared using the historical cost basis except for certain items as set out in the accounting policies which follow (see the accounting policies relating to derivative financial instruments, share-based payments, retirement benefit assets and obligations and non-current assets held for sale). The consolidated financial statements are presented in South African Rands and all values are rounded to the nearest thousand (R'000), except when otherwise indicated.

The consolidated financial statements are prepared on the going-concern basis using accrual accounting (refer to note 1.10).

Assets and liabilities and income and expenses are not offset unless specifically permitted by an accounting standard. Financial assets and financial liabilities are offset and the net amount reported only when a legally enforceable right to offset exists and the intention is either to settle on a net basis or to realise the asset and settle the liability simultaneously.

The group presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle;
- Held primarily for the purpose of trading;
- Expected to be realised within twelve months after the reporting period; and
- All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in the normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period or there is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period; and
- The group classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

Assets and liabilities classified as held for sale are presented separately as current items in the statement of Financial position.

Accounting policies (as shown throughout this report) are the specific principles, bases, conventions, rules and practices applied in preparing and presenting financial statements. Changes in accounting policies resulting from the initial application of a standard or an interpretation are accounted for in accordance with the transitional provisions in the accounting standard. If no such guidance is given, they are applied retrospectively.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 1. General continued

#### 1.2 New accounting standards

##### (a) New and revised standards and interpretations in issue and effective which are applicable to the group

Pronouncement	Effective date	Impact
<i>Definition of a Business – Amendments to IFRS 3</i>	Annual periods beginning on or after 1 January 2020	<p>The IASB issued amendments to the definition of a business in IFRS 3, 'Business Combinations' to assist entities determine whether an acquired set of activities and assets is a business or not. The amendment aims to:</p> <ol style="list-style-type: none"> <li>clarify the minimum requirements for a business,</li> <li>remove the assessment of whether market participants are capable of replacing any missing elements,</li> <li>add guidance to help entities assess whether an acquired process is substantive,</li> <li>narrow the definitions of a business and of outputs, and</li> <li>introduce an optional fair value concentration test.</li> </ol> <p>The amendments apply prospectively to transactions or other events that occur on or after the date of first application. This had no material impact on the group financial statements.</p>
<i>Definition of Material – Amendments to IAS 1 and IAS 8</i>	Annual periods beginning on or after 1 January 2020	<p>In October 2018, the IASB issued amendments to IAS 1, 'Presentation of Financial Statements' and IAS 8 to align the definition of 'material' across the standards and to clarify certain aspects of the definition. The new definition states that, 'Information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity.'</p> <p>The amendments clarify that materiality will depend on the nature or magnitude of information, or both. An entity will need to assess whether the information, either individually or in combination with other information, is material in the context of the financial statements.</p> <p>The amendments must be applied prospectively. This had no material impact on the group financial statements.</p>
<i>The Conceptual Framework for Financial Reporting</i>	Annual periods beginning on or after 1 January 2020	<p>The revised Conceptual Framework for Financial Reporting (the Conceptual Framework) is not a standard, and none of the concepts override those in any standard or any requirements in a standard. The purpose of the Conceptual Framework is to assist the Board in developing standards, to help preparers develop consistent accounting policies if there is no applicable standard in place and to assist all parties to understand and interpret the standards.</p> <p>The Conceptual Framework includes some new concepts, provides updated definitions and recognition criteria for assets and liabilities and clarifies some important concepts.</p> <p>This had no material impact on the group financial statements.</p>
<i>Interest rate Benchmark Reform – Amendments to IFRS 9, IAS 39 and IFRS 7</i>	Annual periods beginning on or after 1 January 2020. The effective date reflects the urgency of the issue.	<p>Interest rate benchmarks such as interbank offered rates (IBORs) play an important role in global financial markets. These benchmarks index a wide variety of financial products worth trillions of dollars and other currencies, ranging from mortgages to derivatives.</p> <p>Market developments have undermined the reliability of some existing benchmarks. In this context, the Financial Stability Board has published a report setting out recommendations to reform some major benchmarks.<sup>1</sup> Some jurisdictions have already made clear progress towards replacing existing benchmarks with alternative, nearly risk-free rates.</p> <p>This work has, in turn, led to uncertainty about the future of some existing interest rate benchmarks, which may affect companies' financial reporting.</p> <p>The amendments made provide relief from the potential effects of the uncertainty caused by the reform.</p> <p>This amendment is not applicable to Hulamín as some of the hedging instruments currently held are linked JIBAR and there has been no reform to this benchmark rate in the current year nor is it expected in the near future.</p>

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 1. General continued

#### 1.2 New accounting standards continued

##### (b) New and revised IFRS in issue but not yet effective

Hulamin will adopt these standards on their effective dates:

Pronouncement	Effective date	Impact
<i>Amendments to IFRS 16, 'Leases' – COVID-19 related rent concessions</i>	Annual periods beginning on or after 1 June 2020 (published May 2020)	<p>As a result of the coronavirus (COVID-19) pandemic, rent concessions have been granted to lessees. Such concessions might take a variety of forms, including payment holidays and deferral of lease payments.</p> <p>On 28 May 2020, the IASB published amendments to IFRS 16 that provides an optional practical expedient for lessees from assessing whether a rent concession related to COVID-19 is a lease modification. Lessees can elect to account for such rent concessions in the same way as they would if they were not lease modifications. In many cases, this will result in the accounting for the concession as a variable lease payment in the period(s) in which the event or condition that triggers the reduced payment occurs.</p> <p>Hulamin does not expect this to have a material impact on the group financial statements.</p>
<i>IFRS 17, 'Insurance contracts'</i>	<p>Annual periods beginning on or after 1 January 2023</p> <p>Early application is permitted for entities that apply IFRS 9, 'Financial Instruments', and IFRS 15, 'Revenue from Contracts with Customers', at or before the date of initial application of IFRS 17.</p>	<p>The IASB issued IFRS 17, 'Insurance contracts', and thereby started a new epoch of accounting for insurers. Whereas the current standard, IFRS 4, allows insurers to use their local GAAP, IFRS 17 defines clear and consistent rules that will significantly increase the comparability of financial statements. For insurers, the transition to IFRS 17 will have an impact on financial statements and on key performance indicators.</p> <p>Under IFRS 17, the general model requires entities to measure an insurance contract at initial recognition at the total of the fulfilment cash flows (comprising the estimated future cash flows, an adjustment to reflect the time value of money and an explicit risk adjustment for non-financial risk) and the contractual service margin. The fulfilment cash flows are remeasured on a current basis each reporting period. The unearned profit (contractual service margin) is recognised over the coverage period.</p> <p>Aside from this general model, the standard provides, as a simplification, the premium allocation approach. This simplified approach is applicable for certain types of contract, including those with a coverage period of one year or less.</p> <p>For insurance contracts with direct participation features, the variable fee approach applies. The variable fee approach is a variation on the general model. When applying the variable fee approach, the entity's share of the fair value changes of the underlying items is included in the contractual service margin. As a consequence, the fair value changes are not recognised in profit or loss in the period in which they occur but over the remaining life of the contract.</p> <p>The impact is currently being assessed by Hulamin and we do not expect this to have a material impact on the group financial statements.</p>
<i>Classification of liabilities as Current or Non-current – Amendments to IAS 1</i>	Annual periods beginning on or after 1 January 2023	<p>The International Accounting Standards Board ('IASB') issued Amendments to IAS 1 – Classification of Liabilities as Current or Non-current in January 2020. The amendments had originally been issued as an exposure draft in February 2015. The IASB considered the feedback received in December 2015 but in April 2016 it decided to delay the issuance of the amendments pending completion of the IASB's project on the Conceptual Framework, which included the definition of a 'liability'. The Board's work on the amendments to IAS 1 restarted in September 2018 and were completed in the third quarter of 2019.</p> <p>The IASB noted that these amendments are intended to be clarifications of the requirements of IFRS, rather than fundamental changes. Diversity in practice had emerged in a number of areas due to perceived inconsistencies in IAS 1, where certain paragraphs appeared to contradict one another. Therefore, depending on how IAS 1 has been interpreted in the past, the clarification of the requirements may result in significant changes to how entities classify liabilities.</p> <p>The amendments to IAS 1 are broad, and may impact entities in many different ways, some of which may be unexpected. It is important that entities carry out an analysis of the impact of the revised requirements on the recognised liabilities in their statements of financial position.</p> <p>No material impact is expected upon the adoption of this standard by Hulamin as the current classification of liabilities is in line with the additional clarity now provided by IASB. Hulamin does not expect this to have a material impact on the group financial statements.</p>

### 1. General continued

#### 1.2 New accounting standards continued

##### (b) New and revised IFRS in issue but not yet effective continued

Pronouncement	Effective date	Impact
<i>A number of narrow-scope amendments to IFRS 3, IAS 16, and some annual improvements on IFRS 1, IFRS 9, IAS 41 and IFRS 16</i>	Annual periods beginning on or after 1 January 2022	<p><b>Amendments</b> to IFRS 3, 'Business Combinations' updated a reference in IFRS 3 to the Conceptual Framework for Financial Reporting without changing the accounting requirements for business combinations.</p> <p><b>Amendments</b> to IAS 16, 'Property, plant and equipment' prohibit a company from deducting from the cost of property, plant and equipment amounts received from selling items produced while the company is preparing the assets for its intended use. Instead, a company will recognise such sales proceeds and related costs in profit or loss.</p> <p><b>Amendments</b> to IAS 37, 'Provisions, contingent liabilities, contingent assets' specify which costs a company includes when assessing whether a contract will be loss-making.</p> <p>Annual <b>improvements</b> make minor amendments to IFRS 1, 'First-time adoption of IFRS', IFRS 9, 'Financial Instruments', IAS 41, 'Agriculture' and Illustrative Examples accompanying IFRS 16, 'Leases'.</p> <p>Hulamin is currently assessing the impact of these pronouncements on the group financial statements and we do not expect this to have a material impact on the group financial statements.</p>
<i>Interest rate Benchmark Reform- Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 (the amendments) (Phase 2)</i>	The effective date is for annual periods beginning on or after 1 January 2021, but earlier application is permitted.	<p>On 27 August 2020, the International Accounting Standards Board published phase two of the interest rate benchmark reform.</p> <p>Phase 1 (as discussed above) addressed issues affecting financial reporting in the period before the replacement of an existing interest rate benchmark with an RFR.</p> <p>Phase 2 on the other hand focused on issues that affect financial reporting when an existing interest rate benchmark is replaced with an RFR. Publication of the phase two amendments completes the IASB's work to amend IFRS in response to IBOR reform.</p> <p>Publication of the phase two amendments completes the IASB's work to amend IFRS in response to IBOR reform.</p> <p>This amendment is again not applicable to Hulamin as some of the hedging instruments currently held are linked to JIBAR and there has been no reform to this benchmark rate in the current year nor is it expected in the near future.</p>

#### 1.3 Fair value measurement

The group measures financial instruments such as derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability; or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 1. General continued

#### 1.3 Fair value measurement continued

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

External valuers are involved for valuation of significant assets. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained.

For the purpose of fair value disclosures, the group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy.

Fair-value related disclosures for financial instruments and non-financial assets that are measured at fair value or where fair values are disclosed, are summarised in the following notes:

- Non current assets classified as held for sale (note 6.2)
- Derivative assets and liabilities (note 7.1)
- Impairment of non-financial assets (note 2.4.4)
- Non- current borrowings (note 3.1)

#### 1.4 Accounting for assets and liabilities

##### (i) Recognition

Assets and liabilities are recognised when it is probable that future economic benefits associated with them will flow to and from the group respectively, and when their costs or fair values can be measured reliably.

Financial instruments are recognised when the company becomes a party to the contractual provisions of the instrument. Financial assets are recognised based on trade dates.

##### (ii) Derecognition

Financial assets, or parts thereof, are derecognised when the contractual rights to receive the cash flows have expired, been transferred and/or control has passed.

All other assets are derecognised on disposal or when they no longer meet the definition of an “asset” as prescribed by the Framework. Financial liabilities are derecognised when the relevant obligation has either been discharged, cancelled or has expired.

#### 1.5 Financial instruments – initial recognition and subsequent measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

##### (i) Financial assets

###### Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI) and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset’s contractual cash flow characteristics and the group’s business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the group has applied the practical expedient, the group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the group has applied the practical expedient are measured at the transaction price as disclosed in note 2.3 Revenue from contracts with customers.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 1. General continued

#### 1.5 Financial instruments – initial recognition and subsequent measurement continued

##### (i) Financial assets continued

###### Initial recognition and measurement

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows while financial assets classified and measured at fair value through OCI are held within a business model with the objective of both holding to collect contractual cash flows and selling.

###### Subsequent measurement

Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

The group's financial assets at amortised cost includes trade receivables.

###### Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the group's consolidated statement of financial position) when the rights to receive cash flows from the asset have expired or The group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the group has transferred substantially all the risks and rewards of the asset, or (b) the group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

###### Impairment

For trade receivables, the group applies the simplified approach permitted by IFRS 9, which requires expected lifetime losses to be recognised from initial recognition of the receivables. Therefore, the group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

##### (ii) Financial liabilities

###### Initial recognition and measurement

Financial liabilities are classified, at initial recognition, at amortised cost, financial liabilities at fair value through profit or loss, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The group's financial liabilities include trade and other payables, loans and borrowings and derivative financial instruments.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 1. General continued

#### 1.5 Financial instruments – initial recognition and subsequent measurement continued

##### (ii) Financial liabilities continued

###### Subsequent measurement

For purposes of subsequent measurement, financial liabilities are classified in two categories:

- Financial liabilities at fair value through profit or loss, or
- Financial liabilities at amortised cost (loans and borrowings).

Financial liabilities at amortised cost (loans and borrowings) is the category most relevant to the group. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

###### Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

The accounting policy on derivatives is detailed in note 7.1.

#### 1.6 Significant accounting judgements, estimates and assumptions

The preparation of the group's consolidated financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. In the process of applying the group's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the consolidated financial statements:

##### (i) Methods of depreciation, useful lives and residual values of assets

Items of property, plant and equipment are depreciated over their useful lives taking into account residual values. The estimated useful lives and residual values are assessed annually taking into account technological innovation, product life cycles, maintenance programmes and projected disposal values. Refer note 5.1 and 5.3.

##### (ii) Post-retirement benefit obligations

Actuarial valuations of post-retirement benefit obligations are based on assumptions which include employee turnover, mortality rates, discount rate, expected long-term rate of return on retirement plan assets, health care costs, inflation rates and salary increments.

Management experts are used to assist with valuations of post employment benefit obligations. Refer note 8.2.

##### (iii) Share-based payment transactions

The critical estimates and assumptions used in the IFRS 2 calculations are disclosed in note 8.1 of the group financial statements. Management experts are used to determine the grant date fair value of options granted. Management assesses the likelihood of achieving non-market performance measures based on approved budgets and the five-year business plan.

##### (iv) Impairment of non-financial assets

The recoverable amounts of the assets (or cash-generating units to which they belong) disclosed in notes 5.1 and 5.2 of the group financial statements were estimated at period end in terms of IAS 36.

The critical estimates and assumptions used in the recoverable amount calculations in respect of the assets of the group are disclosed in note 2.4.4 of the group financial statements. Forward-looking financial information is based on board-approved business plans.

##### (v) IFRIC 23 Uncertainty of Income Tax Treatment

Interpretation IFRIC 23 clarifies the accounting treatment for uncertainties in income taxes as part of the application of IAS 12. The interpretation specifically addresses whether an entity considers each uncertain tax treatment separately or together with one or more other uncertain tax treatments. In applying IFRIC 23 the group assessed the risk profile of all uncertain tax matters based on the following criteria:

- the outcome of similar historical or current audits within the group;
- consensus opinions from expert advisers regarding areas and levels of tax risk; and
- changes in tax law impacting existing or future tax matters.

Based on this assessment, the potential cash tax outflow for each uncertain tax matter is quantified using the applicable statutory tax rate and applying a risk probability factor (exercising judgement on the most likely outcome). The impact on current and deferred tax is also taken into consideration. The probalised risk values are consolidated in arriving at the group's total estimated uncertain tax provision.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 1. General continued

#### 1.6 Significant accounting judgements, estimates and assumptions continued

##### (vi) Investment in Isizinda Aluminium (Pty) Ltd (“Isizinda”)

The group holds a 38.7% (2019: 38.7%) interest in Isizinda. Management have previously assessed the investment in Isizinda to represent control in terms of the requirements of IFRS 10. Hulamin acquired the rolling slab casting business and assets from Isizinda, effective 1 January 2020, and entered into a lease agreement with Isizinda to continue operating this casting facility. Upon the effective date of sale, the “relevant activities” of Isizinda, in terms of IFRS 10, have changed materially. Accordingly, as of 1 January 2020, management assessed that Hulamin no longer control’s Isizinda in terms of the requirements of IFRS 10.

The significant judgements applied in determining whether Hulamin has control or joint control over Isizinda were determined with reference to Isizinda’s relevant activities and which parties could direct those activities as outlined in the memorandum of incorporation and the shareholders agreement. The relevant activities are those that significantly impact the economic performance or returns over Isizinda.

The contractual arrangement provides the group with only the right to the net assets of the joint arrangement, with the voting rights to the assets and obligation for liability of the joint arrangement resting primarily with Hulamin Operations Proprietary Limited. Under IFRS 11 this joint arrangement is classified as a joint venture and has been included in the consolidated financial statements using the equity method. For more detail on the investment in joint venture refer note 6.1 (d).

##### (vii) Determining the lease term of contracts with renewal and termination options

The group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised. The group has several lease contracts that include extension and termination options. The group applies judgement in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination.

The group included the renewal period as part of the lease term for leases of buildings. The group typically exercises its option to renew for these leases because these buildings are required for staff occupation. For more details on leases refer notes 3.3 and 5.2.

##### (viii) Non current assets classified as held for sale

Critical assumptions and estimates have rendered certain assets belonging to the group to meet the criteria to be classified as held for sale at that date for the following reasons:

- The assets are available for immediate sale and can be sold to the buyer in its current condition;
- The actions to complete the sale were initiated and expected to be completed within one year from the date of initial classification; and
- A potential buyer has been identified and negotiations as at the reporting date are at an advanced stage. For more details on the assets held for sale refer to note 6.2.

##### (ix) Taxes

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that taxable profit will be available against which these can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits, together with future tax planning strategies.

Further details on the recognised and unrecognised portion of the deferred tax is disclosed in note 9.2.

##### (x) Leases – Estimating the incremental borrowing rate

The group cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the group ‘would have to pay’, which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The group has used its incremental borrowing rate with reference to the revolving loan facility. Refer note 3.3.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 1. General continued

#### 1.6 Significant accounting judgements, estimates and assumptions continued

##### (xi) Provision for expected credit losses of trade receivables

The group uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns. The provision matrix is initially based on the group's historical observed default rates. The group will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., gross domestic product) are expected to deteriorate over the next year which can lead to an increased number of defaults in the manufacturing sector, the historical default rates are adjusted. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The group's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future. Refer note 4.3(c).

##### (xii) Revenue recognition – Estimating variable consideration for returns and volume rebates

The group estimates variable considerations to be included in the transaction price for the sale of goods with volume rebates. Refer to note 2.3.

#### 1.7 Foreign currencies

The functional currency of each entity within the group is determined based on the currency of the primary economic environment in which that entity operates. Transactions in currencies other than the entity's functional currency are recognised at the exchange rate ruling on the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of these transactions and from translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of profit or loss in the period in which they arise, except when deferred in equity as qualifying cash flow hedges. The company and group's functional currency and presentation currency respectively is the South African rand.

#### 1.8 Contingent liabilities

The group has no contingent liabilities as at 31 December 2020 (2019: RNil).

#### 1.9 Events after the reporting period

Events after the reporting period are those events, favourable and unfavourable, that occur between the end of the reporting period and the date when the financial statements are authorised for issue. Management has considered the relevant events during this period and concluded that they are non-adjusting events as determined in accordance with IAS 10, 'Events after the reporting period'. Details of material non-adjusting events are provided below.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 1. General continued

#### 1.9 Events after the reporting period continued

##### (i) Continuing economic impact of COVID-19

###### Impact on sales and operations

The group has historically generated approximately 55% – 60% of its sales in international markets. North America and Europe represent the most material export markets and have, in a similar manner to the local South African market, been significantly negatively impacted by the ongoing COVID-19 pandemic. These markets have had various degrees of lockdowns implemented which constrained consumer demand.

###### Impact on derivatives and hedge accounting

The ongoing COVID-19 pandemic has continued to have an adverse impact, not only on operations and sales volumes, but also on commodity prices and currencies.

The metal price lag (“MPL”) hedging programme (see further detail for the groups hedging strategy in note 7.1(a) and 7.1(b)) was suspended at the end of March 2020 in order to reduce potential cash flow volatility from commodity and currency hedges. This will be re-evaluated during 2021 once the outlook becomes more stable.

###### Liquidity and cash preservation

Hulamin closed 2020 with a strong balance sheet, with net borrowings of R751 million, lease liabilities of R67.8 million and a net debt to equity ratio of 35% (2019: 10.6%) (refer note 7.4) and adequate headroom in its debt facilities of, of approximately R450 million (refer note 7.3). In terms of the covenant definition with Hulamin’s bankers, the net debt (including letters of credit) to equity (adjusted for intangibles and deferred tax asset) ratio was 38.8% (2019: 16.3%) on 31 December 2020, against a covenant level of 50%.

The second wave and prospect of a third wave of the pandemic in 2021, and its continued consequential economic impacts, requires unprecedented and strong actions. Accordingly, Hulamin has put on hold all uncommitted non-urgent capital expenditure, sharply reduced metal procurement, eliminated variable costs and reduced fixed costs where possible to preserve and protect cash flow and the balance sheet. Presently, the group can operate up to full production capacity, whilst practicing the required protective measures to limit the spread of the virus on site, and is therefore able to capitalise on opportunities available, although demand side risk continues to exist.

This uncertainty and its impact on the going concern assumption has been further detailed in note 1.10.

###### Statement of financial position

Certain line items in the statement of financial position may be impacted in the 2021 financial statements. Below are indications of how material line items in the statement of financial position may be affected:

###### *Impact on trade and other receivables*

We have seen a delay in customer payments as most local customers only resumed operations during the government lockdown level 3. The group also covers trade receivables through the Credit Guarantee Insurance Company (CGIC) (refer to note 4.3). We are actively engaging with customers regarding outstanding balances in conjunction with CGIC.

###### *Impact on retirement benefit assets*

At the end of March 2020, the net asset position was 8.6% lower than at December 2020, but the market has subsequently recovered significantly. This is a long-term asset and will be held for a further estimated 19 years.

###### *Impact on the impairment assessment of property, plant and equipment, intangibles, right-of-use asset and deferred tax assets*

The above factors (and those detailed in note 1.10) may impact both on the future impairment assessments of property, plant and equipment, intangibles and the right-of-use asset. However, these impacts are uncertain. The continued impact of COVID-19 is expected to be most pronounced on near-term cash flows, which have a lower effect on possible asset impairment.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 1. General continued

#### 1.9 Events after the reporting period continued

##### (i) Continuing economic impact of COVID-19 continued

The exchange rate assumptions used in the impairment assessment are explained in note 2.4.4 and reflect a forecast for the South African Rand that is considerably stronger than the exchange rates of the second quarter of 2020. The positive effect on profits of a stronger Rand may largely be offset by lower sales volumes and lower USD-denominated prices during the same timeframe. The exchange rate, sales volumes and USD prices would also likely affect the value of working capital, with the lower USD aluminium price also offsetting the effect of a weaker Rand. The combined off-setting effect of these factors on future cash flows is uncertain and may lead to a higher market risk premium within the discount rate for the next impairment assessment. However, any higher risk premium may be offset by lower interest rates, resulting in an uncertain movement in the future weighted average cost of capital.

The extent to which these areas are impacted will depend on future developments relating to the above uncertainties which cannot be predicted at this time.

##### (ii) US Anti-dumping petition against imports of common alloy sheet

On 9 March 2020, a petition was filed in the United States ("US") by domestic US producers against imports of aluminium common alloy sheet from 18 countries, including South Africa. The petition claims material harm to the US aluminium industry and seeks tariff relief in the form of anti-dumping countervailing duties. The total US common alloy sheet market is approximately 2 million tons per annum of which domestic US producers have historically supplied less than 65% of the market. Hulamin's share of this market is less than 2%.

Hulamin sells a range of products into the US, including common alloy sheet. On average, over the past three years, Hulamin's sales of common alloy sheet into the US amounted to approximately 12% of the total sales of Hulamin Rolled Products. Hulamin's share of the US common alloy sheet market is less than 2%. Preliminary investigations by the International Trade Commission ("ITC"), a department within the US Government were initiated in 2020 and these findings were published in the Federal register on the 15 October 2020.

The preliminary duties levied on Hulamin is 8.98% and this level of duty is considered favourable when compared to Hulamin's main offshore competitors located in Germany, Indonesia, Bahrain and Romania.

The final phase of the investigation is underway, and the final dumping order is expected to be published in April 2021.

##### (iii) Metal supply

The primary metal supply agreement with South32 was due for renewal in December 2019. Hulamin and South32 concluded an agreement for the supply of molten and solid primary aluminium for the next 5 years (January 2020 to December 2024) on 30 January 2020.

The initial term of the agreement terminates on 31 August 2020 but will be extended to 31 December 2024 if Eskom and South32 obtain the necessary approvals in relation to their agreement on electricity supply by this date.

The boards of Eskom and South32 have approved conditional pricing and terms and submitted an application to the National Energy Regulator of South Africa ("NERSA") to review the new pricing for Hillside in August 2019. The final processing of the application is subject to the approval of the Long-Term Negotiated Pricing Agreement Policy by the Department of Mineral Resources and Energy, where after NERSA will be able to finalise the application.

Due to the current extraordinary period, it is likely that delays in progressing the NERSA approval process can be expected. This uncertainty and its impact on the going concern assumption has been further detailed in note 1.10.

##### (iv) Sale of Olifantsfontein site

The sale of the Hulamin Extrusions site in Gauteng and receipt of the proceeds. This follows the closing of this site (as detailed in the prior year report) and concentration of extrusion activity at the Pietermaritzburg site. Refer note 6.2(ii) for details on conclusion of this sale.

##### (v) Issue of A3 ordinary shares

4 721 600 A3 ordinary shares arising from the BEE Extension Transaction were issued to the ESOP trust in January 2021. The notes to the Statement of Changes and Equity provide more detail in this regard.

### 1. General continued

#### 1.10 Going concern

The financial statements of the Hualamin Group for the year ended 31 December 2020 have been prepared on the going concern basis. The factors that have been considered in reaching this conclusion are as follows:

- Hualamin's 2020 financial performance and position as documented in detail throughout these financial statements
- Trading conditions in 2021 and outlook
- Liquidity and access to funding facilities
- Indicators of uncertainty
- Scenarios and forecasts
- Litigation and claims

These matters are considered below:

#### (a) 2020 financial performance and position

The Group's performance and position has been summarised in the table below:

<b>EARNINGS</b>		<b>2020</b>	<b>2019</b>
Operating loss before interest and tax	R'000	( 72 490)	(1 421 404)
Net loss	R'000	( 230 439)	(1 204 540)
Loss per share (Basic)	cents	( 75)	( 380)
Headline (loss)/earnings per share (Basic)	cents	( 68)	( 76)
Normalised EBITDA (refer note 2.1(b))	R'000	( 89 421)	313 327
<b>Cash flow and financial position</b>			
Cash flow from operating activities	R'000	( 360 495)	533 287
Cash flow before financing activities ("free cash flow")*	R'000	( 484 675)	221 970
Net debt	R'000	818 772	272 369
Equity	R'000	2 368 446	2 570 308
Net debt/equity ratio	%	34.6	10.6
Net current assets	R'000	1 569 957	1 799 935
Current ratio	times	1.8	2.3

\* Refer the cashflow statement.

#### Profit and earnings performance

##### Hualamin Rolled Products

Cost reductions, tighter working capital controls and a weaker exchange rate partially offset the substantial negative impacts of the coronavirus pandemic on Hualamin Rolled Products in H1 2020. The Covid-19 lockdown regulations in South Africa, along with the waves of infections resulted in substantial disruptions to manufacturing operations and significant demand shocks during H1 2020, particularly in the South African market, where the bans on alcohol sales resulted in substantially lower demand for beverage can products.

Operational performance levels began to recover during H2 2020, with consistent improvements through the period, particularly in Q4 2020. Notwithstanding this recovery in H2 2020, the sales volumes for Hualamin Rolled Products ended the year at approximately 155,000 tons, or 24% lower than the 2019 volume of 204,000 tons, due to the various negative impacts of Covid-19. As a result of the substantially lower sales volumes, and despite significantly lower capital expenditure, debt levels increased through 2020 and have remained elevated into 2021, although within facility limits and with sufficient headroom.

In October 2020, the US Department of Commerce announced preliminary anti-dumping and countervailing duties against the 18 countries included in the investigation. The outcome for Hualamin was relatively positive, which resulted in increased demand for Hualamin's products in the US market in Q4 2020, along with higher pricing levels. This trend has continued into 2021.

In December 2020, the South African government announced that a 15% import duty on rolled aluminium products would be imposed from January 2021. Given the timing of this announcement, there was no impact on 2020 sales volumes, however demand for local Rolled Products has increased in 2021 and the order book is full.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 1. General continued

#### 1.10 Going concern continued

##### (a) 2020 financial performance and position continued

###### Hulamin Extrusions

Following the national Covid-19 lockdown, the business lost seven weeks of output. Even when operations resumed in May, operating at capacity was disrupted by infections and Covid-19 protocols.

Business performance improved significantly in the second half of the year as the business and the market recovered from the lockdown. The business enjoyed a strong order book through this period and business performance improved in line with this strong order book.

Following the restructuring of the business in 2019, a sale of the Olifantsfontein plant and equipment was concluded for R55 million with final transfer happening in January 2021.

###### Group

In addition to the factors detailed above, the following items contributed to a net loss of R230 million (2019: net loss of R1 204.5 million):

- A positive metal price lag of R112 million (2019: negative of R68 million) refer note 2.1(b), resulting from an increase in the aluminium price during 2020 (this was partially offset by the Rand strengthening against the US Dollar in the second half of the financial year);
- A negative R114 million relating to aluminium futures and currency hedges not qualifying for hedge accounting in 2020;
- A cost associated with the BEE Extension Transaction amounting to R15 million;
- A receipt of the employee surplus account from the Tongaat Hulett Pension Fund amounting to R16 million; and
- A derecognition of previously recognised deferred tax asset of R76.9 million.

These impairments recognised in the prior year relate to both a reduction in the 5-year forecast cash flows of the primary cash-generating units, reflecting the softer outlook in market conditions, as well as an increase in the Company's weighted average cost of capital which takes account of increased uncertainty in the macro environment and the associated rise of risk indicators.

###### Liquidity and solvency

The group's net borrowings were R751 million (2019: R225.9 million) and net debt was R818 million (2019: R272.4 million) at 31 December 2020. This represents a net debt to equity ratio of 35% (2019: 10.6%).

##### (b) Trading conditions in 2021 and outlook

The pandemic-induced changes in behaviour in South Africa and globally continued to disrupt operations and those of our customers during January and February 2021 Domestic market.

Sales in the local market have, in recent years, been hampered by the slow growth in the local economy and increased import competition with lower local sales levels anticipated than in previous business plans.

However, the conversion of the local beverage can market to the all-aluminium can has supported demand for local can body stock, which has also allowed Hulamin to increase its purchases of can maker's scrap and used beverage cans (UBCs) to reduce its metal procurement costs.

On 31 December 2020, ITAC announced a ruling in support of Hulamin's application for local import tariff. The 15% duty will have a significant positive impact on Hulamin's local sales volumes, particularly additional can body stock, foil and local distributor products.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 1. General continued

#### 1.10 Going concern continued

##### (b) Trading conditions in 2021 and outlook continued

###### Domestic market

Underlying demand for aluminium rolled products in various industries has seen noticeable improvement following the lockdowns and economic impacts arising from Covid-19.

Sales of material for the heat exchanger market remain an important element of local sales.

These sales are anticipated to remain under pressure through 2021, with recovery to 2017/2018 levels only during 2022.

The foil business remains challenging, however a perpetuation of the current Rand weakness to the US dollar and the successful outcome to Hulamin's duty application may result in further local foil supply opportunities.

###### International market

Hulamin's export sales include canstock, heat-treated plate for general engineering applications, and a substantial volume of lower value, more commoditised products referred to as common alloy.

Even before the pandemic significant curtailment in demand in the US for both common alloy sheet/coil and heat-treated plate throughout 2019 had a severe impact on Hulamin Rolled Products. Although sales of heat-treated plate have improved, the impact of coronavirus on fabrication, automotive and aerospace markets may have a negative impact on these sales for the remainder of 2021.

The US Aluminium Association petitioned for anti-dumping and countervailing duties to be imposed on 18 countries, including South Africa, and a preliminary finding by the US authorities was announced late in 2020 (refer note 1.9). This finding was relatively positive for Hulamin which may support Hulamin's sales of common alloy products into this market in 2021. The ruling is likely to be finalised towards the middle of 2021.

##### (c) Liquidity and funding

Hulamin's facilities of R1.5 billion comprise a committed working capital facility of R1.0 billion and a borrowing facility ("GBF") of R500 million. The GBF\* is comprised of direct facilities of R200 million and indirect facilities (letters of credit and guarantee) of R300 million. This committed working capital facility was renewed in September 2019 and remains in place until September 2022.

The utilisation of the working capital facility is restricted to the underlying eligible inventory and receivables.

The following financial covenants are measured at each 6-month reporting period in respect of the Hulamin Group:

Covenant	Required level
Current ratio	>1.25 times
Debt to equity ratio	<0.50 times

The following additional security ratios are measured monthly in respect of Hulamin Operations Proprietary Limited:

Covenant	Required level
Stock cover ratio	>1.50 times
Collateral cover ratio	>1.20 times

\* The GBF will become an on demand facility as of 1 October 2021.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 1. General continued

#### 1.10 Going concern continued

##### (c) Liquidity and funding continued

As noted above, Hualamin closed 2019 with a strong balance sheet, with net debt of R272 million and a net debt to equity ratio of 10.6% and considerable headroom with respect to its financial covenants and in relation to its direct borrowing facilities of, in excess of R1 billion.

As detailed in note 1.9, due to the severe impact of Covid-19, net debt increased rapidly to R818.8 million at 31 December 2020, with a net debt to equity ratio of 35% (in terms of the banking covenant definition).

Headroom in facilities reduced to R427 million, impacted both by the increase in debt and the reduction in the level of eligible inventory and receivable security, following the sharp decrease in activity levels.

Hualamin has implemented the following measures to improve its liquidity position while it ramps up performance following the return to alert level 3 in South Africa:

- Management of the cash cycle by way of increased sales to customers offering supply chain financing programmes and metal procurement on short commitment cycles;
- Deferral of non-urgent operational and capital expenditure; and

##### (d) Indicators of uncertainty

Hualamin's sales are largely based on or denominated in US Dollars or Euros, whilst most of Hualamin's operating costs are incurred in Rand. As such, the Group's results and financial condition will be impacted if there is a material change in the Rand/US dollar exchange rate.

Unlike in 2020, Hualamin Rolled Products has not hedged its US Dollar and Euro conversion margins and will therefore benefit from undue Rand weakness in 2021.

High levels of volatility in currency levels and aluminium prices may also impact on cash flow and profitability through the metal price lag ("MPL") and related hedging activities. As detailed in note 1.9, Hualamin suspended its MPL hedging programme at the end of March 2020 in order to reduce potential further cash flow volatility from the commodity and currency hedges.

Further, Hualamin's operations may be adversely affected by demand disruptions or production stoppages caused by supply shortages, Covid-19 quarantining and deep cleaning activities, or labour absenteeism.

An uncertainty in the 12-month horizon which could impact demand, production, currency and commodity levels relates to the combination of the following:

##### (i) Continuity of primary aluminium supply from South32

Whilst, management consider it unlikely that either a lack of approval of the Long-Term Negotiated Pricing Agreement Policy by the Department of Mineral Resources and Energy or an adverse adjudication by NERSA of the electricity supply agreement entered into between South32 and Eskom will prevent the continuation of the metal supply agreement entered into between Hualamin and South32, the impact of such an event would be substantial for Hualamin, with annual negative cash flows of between R300 million and R400 million.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 1. General continued

#### 1.10 Going concern continued

##### (d) Indicators of uncertainty continued

###### (ii) The outcome of the US Anti-dumping (“AD”) petition against imports of common alloy sheet

The outlook for common alloy sales in the USA from 2021 onwards will depend on the final ruling of the anti-dumping investigation (note 1.9 (ii) provides insights on the preliminary ruling), which could result in one of these possible outcomes:

- The investigation concludes that there is no material harm to US aluminium industry and thus no dumping order is implemented;  
or
- AD duties are implemented with Hulamin receiving a relatively low dumping margin, thus providing a relative advantage against its competitor importers for sales on common alloy in the USA. Hulamin is unable to determine at this stage what the impact of any duties imposed might be.

###### (iii) The economic impact of Covid-19

Although Hulamin is currently able to operate fully under alert level 1, a number of uncertainties prevail as a result of the impact of Covid-19 on local and international economies. These uncertainties include:

- Turmoil in the world economy and the possible adverse impact over the short to medium term on the demand for Hulamin’s products, particularly alcoholic beverage packaging and automotive heat exchange products;
- Possible further extensions of the lockdown periods and/or a delay in ramping up South African operations with an impact on local market demand;
- Extended lockdown and delayed return to normal capacity by our key international customers and the economies in which they operate;
- Ongoing health and wellbeing of our employees; and
- Financial market disruptions and access to funding. The background to these matters is set out in note 1.9.

These uncertainties have been included in management’s scenarios and forecasts detailed below.

##### (e) Scenarios and forecasts

Management considered various scenarios through to the end of 2021, which included operational and demand limitations in

South Africa as well as in international markets, combined with different outcomes relating to the US anti-dumping duty investigation and the local application for duties on imports of rolled products. Recent developments have reduced the uncertainties facing the business making many of the scenarios redundant. Most notably:

- A final outcome imposing 15% duty on local imports of rolled aluminium products;
- A final determination of 8.85% anti-dumping duty on common alloy aluminium imports into the USA from South Africa. This is marginally lower than the 8.98% preliminary finding (October 2020) with similar minor adjustments affecting most other countries. The relatively low rate on RSA represents a pricing advantage to Hulamin unless it is concluded in April 2021 that there has been no harm to the USA aluminium industry. A no harm finding will level competition at nil anti-dumping duty for all countries included in the petition (with other duties on imports into the USA being consistent with the position at 31 December 2019).
- A better understanding of the disruptive possibilities of Covid-19 combined with established measures to partly suppress contagion and global rolling out of vaccination. Although the pandemic remains a significant cause of uncertainty, more is understood than at the same time last year.

##### (f) Litigation and claims

The company is not engaged in any significant legal action nor has it any material contingent liabilities which could have bearing on the ability to continue operations in the forecast period.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## 2. Performance: measures used to assess performance

### 2.1 Reportable segment analysis

#### (a) Accounting policies and significant judgements

##### Description of segments and principal activities

The group's reportable segments have been determined in accordance with how the Hulamini Executive Committee, which is the group's most senior operating decision-making body, allocates resources and evaluates performance and are predominantly based on business segment hierarchy which is representative of the internal reporting used for management purposes.

The group is organised into two major operating divisions, namely Hulamini Rolled Products and Hulamini Extrusions.

The Hulamini Rolled Products segment, which comprises the Hulamini Rolled Products and Hulamini Containers businesses, manufactures and supplies fabricated and rolled semi-finished aluminium products as well as aluminium foil containers and related products.

The Hulamini Extrusions segment manufactures and supplies extruded aluminium products.

Isizinda Aluminium (Pty) Ltd ('Isizinda') sold its slab assets to Hulamini Rolled Products and as such these activities remain integrated within the Hulamini Rolled Products segment. Reportable segments are based and managed in South Africa.

All segment revenue and expenses are directly attributable to the segments. Segment assets include all operating assets used by a segment, as well as current assets. Segment liabilities include all operating liabilities. These assets and liabilities are all directly attributable to the segments. Transactions between segments are carried out at arm's length and are eliminated on consolidation. Transactions which represent the sale of a particular segment's finished goods to another segment do not occur and as such no inter-segment revenue is earned.

Finance costs, finance income, other income, and fair value gains and losses on financial assets are not allocated to individual segments as the underlying instruments are managed on a group basis.

Current taxes, deferred taxes and certain financial assets and liabilities are not allocated to those segments as they are also managed on a group basis.

Capital expenditure consists of additions of property, plant and equipment and intangible assets.

Sales to the largest ten customers of the Hulamin Rolled Products segment accounts for 57% (2019: five largest constituted 47%) of total group revenue.

\* Earnings before interest and taxation

\*\* Earnings before interest, taxation, depreciation and amortisation and impairment of property, plant and equipment and intangible assets.

#### A: Normalised EBIT, normalised EBITDA, headline earnings and normalised headline earnings

Headline earnings per share is calculated using the weighted average number of ordinary shares in issue during the year and is based on the earnings attributable to ordinary shareholders, after excluding those items as required by Circular 1/2019 issued by the South African Institute of Chartered Accountants (SAICA).

Normalised EBIT, normalised EBITDA and normalised headline earnings per share are measures which the Hulamin Executive Committee uses in assessing financial performance. These are calculated in a consistent manner as per the 2019 annual financial statements.

Normalised headline earnings per share is calculated by dividing normalised headline earnings by the weighted average number of ordinary shares in issue during the year. Normalised headline earnings is defined as headline earnings excluding (i) metal price lag and

(ii) material non-trading expense or income items which, due to their irregular occurrence, are adjusted for in order to better present earnings attributable to the ongoing activities of the group. Normalised EBIT and EBITDA are similarly derived.

The presentation of normalised EBIT, normalised EBITDA, headline earnings per share and normalised headline earnings per share is not an IFRS requirement and these may not be directly comparable with the same or similar measures disclosed by other companies.

## 2.2 Earnings per share

### Earnings per share, headline earnings per share and normalised headline earnings per share

Basic earnings per share is calculated by dividing the profit for the year attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares outstanding during the year.

Diluted EPS is calculated by dividing the profit attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on conversion of all the dilutive potential ordinary shares into ordinary shares.

Potential ordinary shares shall be treated as dilutive only when their conversion to ordinary shares would decrease earnings per share or increase loss per share from continuing operations.

## CONTINUED

for the year ended 31 December 2020

## 2. Performance: measures used to assess performance continued

### 2.2 Earnings per share continued

#### Information concerning the classification of securities

##### (i) Options

Options granted to employees under the various Hulamin group schemes as presented in note 8.1 are considered to be potential ordinary shares. They have been included in the determination of diluted earnings per share if the required performance condition would have been met based on the company's performance up to the reporting date, and to the extent that they are dilutive. The options have not been included in the determination of basic earnings per share.

54 197 400 (2019:47 214 968) options were not included in the calculation of diluted earnings per share because they were antidilutive for the year ended 31 December 2020. These options could potentially dilute basic earnings per share in the future.

##### (ii) Bonus shares

Rights to deferred shares granted to senior management under the group's short-term incentive scheme are included in the calculation of diluted earnings per share assuming all outstanding rights will vest. The rights are not included in the determination of basic earnings per share.

### 2.3 Revenue from contracts with customers

#### (a) Accounting policies and significant judgements

##### (i) Sale of goods

Revenue from contracts with customers of the group comprises revenue from the sale of fabricated and semi-fabricated aluminium products.

Sales are recognised when control of the products has transferred to the buyer. The delivery of products and the transfer of risks are determined by the terms of sale, and specifically by the guidance provided under International Chamber of Commerce Terms of Trade, where applicable. This is typically when the goods are handed to the carrier nominated by Hulamin.

As assessment of the concept of "control" as defined in IFRS15 and "risk" as defined in the Inco terms was performed and the point at which "risk" passes from Hulamin is the same point at which "control" is transferred.

Products are often sold with retrospective volume discounts, rebates and early-settlement terms. These rights give rise to a variable consideration. Revenue from these sales are recognised based on the price specified in the contract, net of the estimated volume discounts, rebates and early settlement discounts.

If the consideration in a contract or sale of goods includes a variable amount, the group estimates the amount of consideration to which it will be entitled in exchange for transferring the goods to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

The group provides retrospective volume rebates to certain customers once the quantity of products purchased during the period exceeds a threshold specified in the contract. Rebates are offset against amounts payable by the customer. To estimate the variable consideration for the expected future rebates, the group applies the most likely amount method for contracts with a single-volume threshold and the expected value method for contracts with more than one volume threshold. The selected method that best predicts the amount of variable consideration is primarily driven by the number of volume thresholds contained in the contract. The group then applies the requirements on constraining estimates of variable consideration and recognises a refund liability (included in trade and other payables) for the expected future rebates.

No element of financing is deemed present as the sales are not made on extended credit terms.

A receivable is recognised when control passes as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

## 2. Performance: measures used to assess performance continued

### 2.3 Revenue from contracts with customers continued

#### (a) Accounting policies and significant judgements continued

##### (ii) Transportation services

Certain International Chamber of Commerce Terms of Trade used include multiple deliverables such as the sale of goods and the provision of transportation services. For some of these specific terms, control of the goods sold passes before the transportation service has been provided. The revenue is recognised based on the actual service provided to the end of the reporting period as a proportion of the total service to be provided, because the customer receives and uses the benefit simultaneously. This is determined based on the actual shipping days incurred relative to the standard time to ship to the specified destination. Where revenue is earned on multiple performance obligations the transaction price is allocated to each performance obligation based on the stand-alone selling prices.

##### (iii) Time value of money

The group does not have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. Consequently, the group has applied the practical expedient provided in IFRS 15.63 and does not adjust any of the transaction prices for the time value of money.

#### (b) Disaggregation of revenue from contracts with customers

Revenue has been disaggregated into categories that depict how the nature, timing and uncertainty of revenue and cash flows are affected by economic factors. The group presented disaggregated revenue based on the type of goods or services provided to customers and the geographical region.

## CONTINUED

for the year ended 31 December 2020

## 2. Performance: measures used to assess performance continued

### 2.3 Revenue from contracts with customers continued

#### (c) Transportation services

There are contracts with customers which require that the group provides transportation services as a separate performance obligation. The group acts as a principal in these transactions. The performance obligation is satisfied and payment is due upon the final delivery of the goods to the customer.

The transaction price allocated to the remaining performance obligations (unsatisfied or partially unsatisfied) as at 31 December are, as follows:

	2020 R'000	2019 R'000
Within one year	857	3 543

### 2.4 Material profit or loss items

The group has identified a number of items which are material due to the significance of their nature and/or amount. These are listed separately here to provide a better understanding of the financial performance of the group.

#### 2.4.1 Expenses by nature

	2020 R'000	2019 R'000
Aluminium and other material costs	5 061 218	6 757 735
Utilities and other direct manufacturing costs	1 145 312	1 263 731

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

## 2. Performance: measures used to assess performance continued

### 2.4 Material profit or loss items continued

#### 2.4.1(a) Employee benefit costs

The cost of short-term employee benefits is recognised in the statement of profit or loss in the period in which the service is rendered and is not discounted.

The expected cost of profit-sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

Past service cost is recognised in profit or loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset. Defined benefit costs are categorised as service cost, net interest expense or income and remeasurement.

The group presents service cost and net interest expense or income in profit or loss. Curtailment gains and losses are accounted for as past service costs.

	2020 R'000	2019 R'000
Employment costs		
Salaries and wages	1 002 092	1 103 179
Retirement benefit costs:	54 372	59 403
Defined contribution schemes (note 8.2)	59 662	68 167
Defined benefit scheme (note 8.2)	(5 290)	(8 764)
Post retirement medical aid costs (note 8.2)	15 082	23 757
Retirement gratuities (note 8.2)	4 881	7 206
Share incentive costs	22 756	6 968
	<b>1 099 183</b>	<b>1 200 513</b>

#### 2.4.1(b) Termination benefits

The business turnaround plan for the Hulammin Rolled products and Hulammin Extrusions divisions in 2019 included a strategy to reduce costs which resulted in the loss of 250 jobs. An agreement was reached with the local union representatives in November and October 2019 respectively, which specifies the number of staff involved and the voluntary redundancy compensation package offered by the group, as well as amounts payable to those made redundant. Of the total cost of restructuring raised in 2019 of R114 million, R105 million was settled in 2019 and the balance was settled in the current year.

	2020 R'000	2019 R'000
Termination benefits can be attributable as follows:		
Hulammin Rolled Products	7 839	75 757
Hulammin Extrusions	-	38 639
	<b>7 839</b>	<b>114 396</b>

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

## 2. Performance: measures used to assess performance continued

### 2.4 Material profit or loss items continued

#### 2.4.2 Gains and losses on financial instruments related to trading activities

The group is exposed to fluctuations in aluminium prices and exchange rates and hedges these risks with derivative financial instruments. The group applies hedge accounting to gains and losses arising from certain derivative financial instruments.

Hedges of forecast sales transactions are, where effective, accounted for as cash flow hedges.

The effective portion of cash flow hedge gains and losses are recorded initially in the hedge reserve and released to revenue from contracts with customers when the sale occurs.

Other gains and losses include, *inter alia*, the fair value adjustments arising from fair value hedges, non-hedge accounted derivative financial instruments (including the ineffective portion of cash flow hedge gains and losses), non-derivative financial instruments and forward point gains.

	2020 R'000	2019 R'000
Foreign exchange gains on debtors and creditors balances	24 526	(9 200)
Foreign currency denominated cash balances	(14 973)	(8 862)
Valuation adjustments on non-derivative items	9 553	(18 062)
Foreign exchange contracts: firm commitments, debtors and creditors balances	(124 179)	76 527
Commodity futures	44 384	21 106
Valuation adjustments on derivative items	(79 795)	97 633
<b>Gains and losses on financial instruments related to trading activities</b>	<b>(70 242)</b>	<b>79 571</b>

In 2019, Hulamin adopted the hedge accounting provisions of the new financial instruments standard, IFRS 9, which overcomes the limitations in IAS 39, which resulted in the commodity hedges being effective for hedge accounting purposes, thereby allowing profit and losses to be recognised in the same year as the underlying revenue (Refer to note 10 (b)).

#### 2.4.3 Other gains and losses

	2020 R'000	2019 R'000
Loss on disposal of property, plant and equipment	13	(26 455)
Loss arising from loss of control in Isizinda	(11 207)	-
Gain on liquidation of pension fund	16 000	-
Gain on disposal of investment in Almin Metal Industries (note 6.2(i))	-	2 655
Other	187	-
Settlement of share-based payment – Isizinda (note 6.1.(d))	-	(65 000)
	<b>4 993</b>	<b>(88 800)</b>

The gain on liquidation of the pension fund is a receipt awarded to Hulamin in respect of the employee surplus account for the Tongaat Hulett Pension Fund.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

## 2. Performance: measures used to assess performance continued

### 2.4 Material profit or loss items continued

#### 2.4.4 Impairment of non-financial assets

At each reporting date, the carrying amount of the tangible and intangible assets are assessed to determine whether there is any indication that those assets may have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated to determine the extent of the impairment loss. Where it is not possible to estimate the recoverable amount of an individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is estimated.

The recoverable amount is the higher of an asset's fair value less cost of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are considered. If no such transactions can be identified, an appropriate valuation model is used.

These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be lower than its carrying amount, its carrying amount is reduced to the higher of its recoverable amount and zero. Impairment losses are recognised in the statement of profit or loss. After the recognition of an impairment loss, the depreciation or amortisation charge for the asset is adjusted to allocate its remaining carrying value, less any residual value, over its remaining useful life.

If an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount but limited to the carrying amount that would have been determined had no impairment loss been recognised in prior years. A reversal of an impairment loss is recognised in the statement of profit or loss.

#### (a) Impairment assessment – Individual assets

##### (i) Isizinda Aluminium property, plant and equipment (Rolled Products Segment)

The current economic downturn in the property market served as an indicator for impairment (see note 6.1(d)). An impairment test was conducted, and it was determined that the carrying amount of land and buildings did not exceed the recoverable value of the property and as such the property was not impaired. The recoverable amount was determined to be R81.5 million (2019: R68.7 million). The fair value of the property is level 3 in the valuation hierarchy. The fair value of the property was determined with reference to market related rental prices per square metre, accepted vacancy rates and maintenance costs per square metre. An independent valuator was used to determine the fair value less costs to sell.

##### (ii) Extrusions Olifantsfontein property, plant and equipment (Extrusions Segment)

In 2019, Hulamin Extrusions restructured its business operations, which included the disposal of its Olifantsfontein operation (refer note 2.4.1(b)(i)). This served as an indicator of impairment. An impairment test was conducted and it was determined that the carrying amount of plant and equipment exceeds its recoverable amount of R14.2 million, which represents fair value less costs of disposal. Accordingly, an impairment charge of R6 million was recognised in the prior year. The fair value of the property, plant and equipment is level 1 in the valuation hierarchy and was determined with reference to an agreement of sale entered into with a third-party buyer for these assets (refer note 6.2(ii)).

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

## 2. Performance: measures used to assess performance continued

### 2.4 Material profit or loss items continued

#### 2.4.4 Impairment of non-financial assets continued

##### (b) Impairment assessment – Cash generating unit

The group's shares continued to trade on the Johannesburg Stock Exchange at a discount to underlying net asset value during the year under review. In the circumstances, and as required by IAS 36, management have assessed the recoverable amounts of the assets (or cash-generating units to which they belong) net of liabilities at the period end. The recoverable amount was determined to be the value in use. The assessment compared the estimated value in use based on forecast future cash flows to the carrying amount.

##### (i) Rolled Products Cash Generating Unit

The key economic and business assumptions used in the value-in-use calculation are consistent with those used in the budget and the five-year business plan approved by the board of directors. Adjustments were made to the business plan forecasts to ensure compliance with the value in use methodology required by IAS 36. The group forecasts that free cash flows will improve in future periods.

Key assumptions include:

		2020	2019		
<b>Comparison of key assumptions</b>					
Weighted average cost of capital					
– before tax		21.5%	22.4%		
– after tax		16.1%	16.9%		
		In year five		Compound annual growth rate	
		2020	2019	2020	2019
Annual average	(ZAR/USD)	16.94	16.04	0.6%	2.0%
Sales volume	(tons)	235 000	235 000	8.7%	2.9%
Rolling margins indexed against 2019	(USD/ton)	107	98	1.9%	1.8%
Total manufacturing costs indexed against 2019	(USD)	98	93	5.8%	1.1%
Working capital investment indexed against 2019	(USD)	130	120	3.7%	5.0%

A pre-tax discount rate of 21.5% (post-tax 16.1%) was used in the calculation and this rate has decreased from the pre-tax 22.4% (post-tax 16.9%) used in 2019. The decrease in the discount rate is due to:

- Decreases in the component elements of the discount rate, particularly a decrease in the government bond rate and an increase in debt/equity reflecting higher peer gearing levels in recent times.
- These factors were partly offset by an increase in the market risk premium due to the higher level of uncertainty that exists across most market participants in current times.

Currency exchange rates are based on the median of forecasts by major financial and other institutions to 2022 and with reference to inflation differentials thereafter, with the ZAR: USD rate rising from an annual average of R15.50 in 2021 to R16.94 in 2025.

Although sales volumes are forecast to peak at levels similar to what was forecast in December 2019, the recovery from the lower Covid-19 2020 volumes will reduce cash flows in the next five years.

Rolling margin forecasts include anticipated changes in both market conditions and the product mix. The pressures on sales volume also impact selling prices and the sales mix. Selling prices will be maintained in the next few years while sales volume recovers in a post-Covid19 world economy amidst the finalising of anti-dumping duties levied on rolled aluminium into the USA. The preliminary anti-dumping findings confer a relative advantage for Hulamin over most competing imports into the USA and forecast volumes assume that the final ruling will have a similar effect.

Partially offsetting the lower volumes in the period of recovery from Covid19 is the effect of import duty on aluminium imports into RSA that is effective from 2021. This duty is expected to improve domestic sales volume for much of the next five years.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

## 2. Performance: measures used to assess performance continued

### 2.4 Material profit or loss items continued

#### 2.4.4 Impairment of non-financial assets continued

##### (b) Impairment assessment – Cash generating unit continued

These combined factors support that no impairment is necessary at year end.

##### Sensitivity analysis

The determination of the value in use for Hulamin Rolled Products, and any resulting impairment, is particularly sensitive to:

**Discount rate:** A 1% increase in the post-tax discount rate may result in an impairment charge, before tax, of up to R218 million\*

**Rolling margins:** A reduction in average rolling margins of 5,0% for each year in the forecast period may result in an impairment charge, before tax, of up to R1 312 million\*.

**Rate of exchange:** A R1,00 strengthening in the ZAR/USD rate for each year in the forecast period may result in an impairment charge, before tax, of up to R1 141 million.

*\* The recognition of impairment charges is subject to the limitation that individual assets in the CGU cannot be reduced to below each asset's recoverable amount. The cumulative recoverable amount limit is R701 million (2019: R646 million).*

##### (ii) Extrusions Cash Generating Unit

Following the restructuring of the business in H2 of 2019, and the closure of the Olifantsfontein plant, 2020 was the year to rebuild the business. Unfortunately, the Extrusions cash generating unit experienced difficult trading conditions in the first half of 2020 as the country went into lockdown to curb the infection rate of Covid-19. However, this changed significantly in the second half of 2020 as the business and economy recovered. The market uncertainty impacting the achievement of these cash flows remains high and this is reflected in the discount rate. The carrying value of the assets therefore exceeds the recoverable amount by R34 million. The impairment charge was NIL based on the fair value less costs of disposal of individual assets.

The recoverable amount is the higher of value in use and fair value less costs of disposal. Value in use was estimated using a pre-tax discount rate of 23.3% (2019: 23.6%), post tax 16.8% (2019: 17.4%). The fair value less costs of disposal was determined by an independent valuator, utilising the market approach whereby comparable asset pricing was obtained in the second-hand market, adjusted as required for location, age and specification, less costs of disposal. The fair value level of the non-current assets represents level 2 in the valuation hierarchy.

##### Sensitivity analysis

The determination of the value in use for Hulamin Extrusions, and any resulting impairment, is particularly sensitive to:

**Discount rate:** A 1% increase in the pre-tax discount rate may result in an additional impairment charge, before tax, of up to R8.6 million\* (2019: R12 million).

**Earnings before tax:** A 5% decrease in earnings before tax may result in an additional impairment charge, before tax, of up to R12 million\* (2019: R10 million).

*\* The recognition of impairment charges are subject to the limitation that individual assets in the CGU cannot be reduced to below each asset's recoverable amount. The cumulative recoverable amount limit is R22 million (2019: R18 million).*

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Fees for other services	-	-
Expenses	147	193

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 3. Debt/equity: measures to assess group leverage

#### 3.1 Non-current borrowings

	2020 R'000	2019 R'000
Nedbank loan facility	-	54 000
Less: Current portion included in current borrowings (note 3.2)	-	(54 000)
	-	-
Effective interest rate	(%) -	9.70

The Nedbank long-term loan was secured against a mortgage bond of R405 million (2019: R405 million) over land and buildings disclosed in note 5.1 with a carrying amount after impairments of R65.7 million (2019: R67.1 million).

The loan was repayable in quarterly instalments over five years commencing in March 2016. As the loan was repaid in full in 2020 (2019: R54 million) no amount is due within twelve months from reporting date. This loan was reclassified to current borrowings (note 3.2) in 2019.

The fair values of the non-current borrowings approximate their carrying value since the interest payable on these borrowings approximates current market rates. The fair value of the borrowings is classified as level 3 fair values in the fair value hierarchy due to the use of unobservable inputs, including own credit risk.

#### 3.2 Current borrowings

	2020 R'000	2019 R'000
Nedbank revolving facilities	789 053	298 083
Current portion of term loan (note 3.1)	-	54 000
Pension fund loan (note 9.4)	-	-
	789 053	352 083
Effective interest rates are as follows:		
Nedbank revolving facility (%)	(%) 5.98	8.96
Pension fund loan (%)	(%) -	0.49

The Nedbank revolving facilities comprise gross borrowings of R789 million (2019: R298 million) which has been offset by bank balances of RNil million (2019: RNil million) in terms of the loan agreements with Nedbank. A new agreement was signed with Nedbank in 2019 and under this agreement, there is no restriction on credit balances in the receivable account. Therefore, no cash will offset debt.

The Nedbank revolving facilities are secured against inventories, trade receivables, bank balances, moveable items of property, plant and equipment and also against credit insurance on trade receivables and against insurance on fixed assets.

The terms of the Nedbank revolving facilities require prior notification for the following specified events:

- Encumbering any assets to secure financial indebtedness in excess of R20 million;
- Making loans or guarantees in excess of R20 million;
- Disposing of assets for which the higher of market value or sales price thereof exceeds R20 million;
- Entering into a merger or corporate restructuring; Amendments to the aluminium price and exchange rate hedging strategy; and/or
- Pre-approval is required when incurring additional financial indebtedness in excess of R50 million. The Nedbank Revolving Facility requires that the group comply with the following financial covenants:

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 3. Debt/equity: measures to assess group leverage continued

#### 3.2 Current borrowings continued

	2020	2019
Current ratio	>1.25	>1.25
Debt to equity ratio*	<0.50	<0.50

\* As defined in the contractual agreements.

The group has complied with the financial covenants of its borrowing facilities during the 2020 and 2019 reporting period.

The obligations of the revolving credit facility have been guaranteed by each of Hulam Limited, Hulam Extrusions Proprietary Limited and Hulam Containers Proprietary Limited. The debt package is held through Hulam Operations Proprietary Limited.

The fair values of the current borrowings approximate their carrying value based on the short-term nature of these borrowings.

#### 3.3 Lease liabilities

At the commencement date of the lease, the group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments and variable lease payments that depend on an index or a rate. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the group. Variable lease payments that do not depend on an index or a rate are recognised as expenses in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

The group leases various buildings, forklifts and IT-equipment. Rental contracts typically extend for fixed periods of 1 to 5 years but may have further extension options. Rental periods vary between monthly and quarterly. Lease payments for some contracts include CPI increases.

Set out below are the carrying amounts of lease liabilities (included under interest-bearing loans and borrowings) and the movements during the period:

The maturity analysis of lease liabilities is disclosed in note 7.3.

	2020 R'000	2019 R'000
As at 1 January 2020	46 493	47 299

#### 3.5 Stated capital, consolidation shares and treasury shares

Transactions relating to the acquisition and sale of shares in the company, together with their associated incremental direct costs, are accounted for in equity. Other transactions are accounted for directly in equity only if permitted by IFRS.

Consolidated shares represent the A and B class ordinary shares issued to the BEE investor company and the ESOP Trust. Accordingly, the subscription value of these shares is deducted from equity attributable to the equity holders of the company until the shares are cancelled, disposed of or reissued.

##### (a) Authorised

800 000 000 ordinary shares of no par value (2019: 800 000 000 ordinary shares)

31 477 333 A ordinary shares of no par value (2019: 31 477 333 A ordinary shares)

36 072 000 B ordinary shares of no par value (2019: 36 072 000 B ordinary shares)

The A ordinary shares consist of 26 755 733 A2 shares and 4 721 600 A3 shares.

The B ordinary shares consist of 9 018 000 B1 shares, 9 018 000 B2 shares and 18 036 000 B3 shares.

for the year ended 31 December 2020

### 3. Debt/equity: measures to assess group leverage continued

#### 3.5 Stated capital, consolidation shares and treasury shares continued

##### (e) Treasury shares

During the year a wholly-owned group company purchased 7 638 806 shares (2019: 8 183 539) shares on-market in order to hold treasury shares to settle share scheme obligations. The buy-back was approved by shareholders at the annual general meeting held on 15 May 2019. The shares were acquired at an average price of 178 cents per share (2019: 267 cents per share), with prices ranging from 220 to 125 cents per share (2019: 470 to 192 cents per share). The total cost of R13 816 000 (2019: R22 000 000) including after-tax transaction costs and excluding the vesting of the A1 ordinary shares of R47 000, was deducted from shareholder equity. The total reduction in paid-up capital was R35 816 000 (2019: R22 000 000).

#### 3.6 Dividends per share

Dividends to equity holders are only recognised as a liability when approved by the board of directors and are included in the statement of changes in equity.

	2020 R'000	2019 R'000

Final dividend: Nil cents of 4 721 600 A1 ordinary shares prior to conversion to ordinary shares (2019: Nil cents on 4 721 600 A1 ordinary shares)	-	-
<b>Total</b>	<b>-</b>	<b>-</b>

No dividend was declared in respect of the 2020 financial year.

### 4. Working capital: measures used to assess liquidity

#### 4.1 Cash and cash equivalents

Cash and cash equivalents are measured at amortised cost and includes cash on hand and deposits held with local banks with original maturities of three months or less.

	2020 R'000	2019 R'000
Bank balances	38 031	110 182
Overnight call deposits	-	16 000
Cash on hand	14	25
	<b>38 045</b>	<b>126 207</b>
Effective interest rate on credit balances (%)	-	1.38

Bank balances with a carrying value of R13.5 million (2019: R30.9 million) were pledged as security for borrowing facilities (note 3.2). For further information on the credit quality of cash, refer to the Financial Risk Management section (note 7).

The group has sufficient liquidity available through its working capital facilities in place with Nedbank Limited. Committed undrawn facilities available at year-end are further detailed in note 7.3.

Included in bank balances are the following foreign currency denominated accounts:

	Closing rates		2019 R'000
	2020	2020 R'000	
Euro	17.97	7 433	-
Pound Sterling	19.91	4 213	50
US Dollar	14.62	4 450	672

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 4. Working capital: measures used to assess liquidity continued

#### 4.2 Inventories

Inventories are stated at the lower of cost and net realisable value. Costs represents the costs incurred in bringing each product to its present location and condition. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and costs necessary to make the sale.

The cost is determined on the following basis:

Consumable stores: Weighted average.

Raw materials, work in progress and finished goods: First-in-first-out. The inventory balance consists of:

	2020 R'000	2019 R'000
Raw materials	407 695	352 349
Work-in-progress	632 568	520 040
Finished goods	998 380	1 023 437
Consumable stores	295 185	280 582
	<b>2 333 828</b>	<b>2 176 408</b>

Inventories with a carrying value of R1 886 million (2019: R1 998 million) are encumbered as security for borrowing facilities (note 3.2).

Inventories recognised as an expense during the year ended 31 December 2020 amounted to R7 850 million (2019: R10 000 million). Certain items of inventory were written down to net realisable value. These were recognised as an expense and included in cost of sale of goods in the statement of profit or loss as follows:

	2020 R'000	2019 R'000
Inventory net realisable value adjustment	23 022	18 649

#### 4.3 Trade and other receivables

##### (a) Accounting policies and significant judgements

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within 60 days and therefore are all classified as current. Trade receivables are recognised initially at the amount of the consideration that is unconditional. Details of the group's impairment policies are provided in section (c) below.

Due to the short-term nature of the current receivables, the carrying amount approximates their fair value.

Trade receivables are written off when there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include, amongst others, the failure of an overdue debtor to engage in a repayment plan within the group, and a failure to make contractual payments for a period greater than 120 days past due.

Sundry receivables generally arise from transactions outside of the usual trading activities of the group.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 31 December 2020

### 4. Working capital: measures used to assess liquidity continued

#### 4.3 Trade and other receivables continued

##### (b) Financial and non-financial assets

	2020 R'000	2019 R'000
<b>Financial assets</b>	<b>964 350</b>	<b>702 160</b>
Trade receivables – net of settlement discounts	903 899	695 727
Less: Loss allowance	(9 959)	(7 001)
Net Trade receivables	893 940	688 726
Sundry receivables	70 410	13 434
<b>Non-financial assets</b>	<b>132 985</b>	<b>102 255</b>
Prepayments	53 523	40 786
Value-added taxation receivable	79 462	61 469
	<b>1 097 335</b>	<b>804 415</b>

Included in trade receivables is an amount of R17.8 million (2019: R16.6 million) relating to claims from customers on current year sales for which it is probable that credit notes will be issued in the following financial year.

Included in sundry receivables is a R16 million accrual arising from the liquidation of the Tongaat Hulett Pension Fund, R20m due from the sale of liquid metal of which does not form part of Hulamín's core business and sundry deposits placed with customs of R20m.

##### (c) Impairment of trade receivables

The group applies IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables.

To measure expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and days past due. The group has trade receivables for sales of inventory and the provision of services. The sale of goods and provision of services have substantially the same risk characteristics for the same type of customer. The group has therefore concluded that the expected loss rate relating to sale of goods are a reasonable approximation of the loss rate for the provision of services. The group also covers all trade receivables through the Credit Guarantee Insurance Company (CGIC) and cover is subject to an uninsured portion of 20% (2019: 10%) and a franchise loss. The CGIC cover is taken out at the inception of the sale and is integral to the enactment of the sale. Therefore, the CGIC cover is included in the calculation of the loss allowance.

The group performs an assessment at the end of each reporting period of the change in credit risk from when the trade receivables were recognised. This includes an assessment of default. As the trade receivables are insured, as detailed above, historical assessment indicates a low risk of default.

The group has determined that it is appropriate to group trade receivables into local and export receivables. The aggregation of trade receivables in this manner is consistent with the way in which the executive committee monitors sales and market demand. Further the cover obtained through CGIC quotes a premium based on the two categories of trade receivables, local and export, further indicating the similarity of trade receivables within these two categories.

The expected loss rates are based on the payment profile of sales over a period of 24-months before 31 December 2020 or 1 January 2020 respectively and the corresponding historical credit losses experienced within this period. As debtors' days are on average 30 days for local debtors and 45 days for export debtors a 24-month period reflects sufficient data points over the life of the asset to determine historical credit losses. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customer to settle the receivables. Current forward-looking information considered by the Hulamín Credit Risk Committee includes regional growth and political stability. If forecast economic conditions are expected to deteriorate over the next year, which can lead to an increased number of defaults, affected trade receivables are specifically provided for.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 4. Working capital: measures used to assess liquidity continued

#### 4.3 Trade and other receivables continued

##### (c) Impairment of trade receivables continued

The assessment of the correlation between historical observed default rates, forecast economic conditions and expected credit losses requires judgement. The amount of the expected credit loss is sensitive to changes in circumstances and forecast economic conditions. The group's historical credit loss experience and forecast economic conditions may also not be representative of the customer's actual default in the future.

On that basis, the loss allowance as at 31 December 2020 was determined as follows for trade receivables:

		Current	30 days	60 days	90 days	120 days	More than 120 days	Total
<b>Export debtors at 31 December 2020</b>								
Expected loss rate (%)	(%)	-	0.3	1.3	1.9	2.0	1.8	
Gross carrying amount (R'000)	(R'000)	373 499	98 149	18 924	5 939	2 664	2 431	501 606
Loss allowance (R'000)	(R'000)	19	252	241	115	54	43	724
<b>Local debtors at 31 December 2020</b>								
Expected loss rate (%)	(%)	-	0.1	1.6	( 0.9)	25.7	44.5	
Gross carrying amount (R'000)	(R'000)	395 657	99 631	10 395	( 448)	4 260	17 678	527 173
Loss allowance (R'000)	(R'000)	11	88	170	4	1 097	7 864	9 234

The loss allowance as at 31 December 2019 was determined as follows for trade receivables:

		Current	30 days	60 days	90 days	120 days	More than 120 days	Total
<b>Export debtors at 31 December 2019</b>								
Expected loss rate (%)	(%)	-	0.3	1.2	1.9	1.8	-	
Gross carrying amount (R'000)	(R'000)	378 502	113 161	13 213	7 242	3	122	516 243
Loss allowance (R'000)	(R'000)	20	289	164	137	73	-	683
<b>Local debtors at 31 December 2019</b>								
Expected loss rate (%)	(%)	-	0.3	0.6	7.1	37.9	65.1	
Gross carrying amount (R'000)	(R'000)	175 506	46 164	29 903	2 367	3 769	6 715	264 424
Loss allowance (R'000)	(R'000)	17	154	174	169	1 429	4 375	6 318

The closing loss allowance for trade receivables as at 31 December 2020 reconciles to the opening loss allowance as follows:

	2020	2019
	R'000	R'000
<b>Opening balance</b>	<b>7 001</b>	5 271
Increase in loss allowance recognised in profit or loss during the year	<b>5 068</b>	1 906
Receivables written off during the year as uncollectible	<b>(2 110)</b>	( 176)
<b>Closing balance</b>	<b>9 959</b>	7 001

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 4. Working capital: measures used to assess liquidity continued

#### 4.3 Trade and other receivables continued

##### (d) Credit risk of trade receivables

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. Customer credit risk is managed by each business unit subject to the group's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on an extensive credit rating scorecard and individual credit limits are defined in accordance with this assessment. Outstanding customer receivables are regularly monitored and any shipments to major customers are generally covered by letters of credit or other forms of credit insurance. The group's credit risk exposure to customers is mainly influenced by individual customer characteristics and there is no significant concentration of risk related to industry segments. In addition to significant exposures arising from specific customers, credit exposures to both local and overseas customers are detailed below. The establishment and subsequent maintenance of credit limits is, in the majority of cases, based on the specific amount of credit insurance that can be secured for each new customer. The percentage of all trade receivables covered by insurance is detailed below.

As at 31 December 2020, the ageing analysis of trade and sundry receivables, which constitute financial assets, is as follows:

	2020 R'000	2019 R'000
Receivables that are not overdue and remain within credit limits	889 948	502 678
Receivables which have exceeded credit terms and are:	74 859	199 482
Overdue by less than 60 days	53 853	194 851
Overdue by more than 60 days	21 006	4 631
<b>Total financial assets, net of provision for credit losses</b>	<b>964 807</b>	<b>702 160</b>

	2020 R'000	2019 R'000
Local trade receivables	475 416	155 659
– Balance subject to credit insurance (%)	95	92
Export trade receivables	442 291	333 585
– Balance subject to credit insurance (%)	100	92
	<b>917 707</b>	<b>489 244</b>

At 31 December 2020, the group had 22 debtors that owed it more than R10 million each and accounted for approximately 78% of all receivables outstanding (the prior year included 22 debtors that owed it more than R10 million each and accounted for approximately 68% of all receivables outstanding). There is no other significant concentration of risk related to a particular customer or industry segments. As at 31 December 2020, the exposure of the group to trade receivables neither overdue nor impaired (excluding sundry receivables), in local and overseas markets, and the extent to which these are subject to credit insurance cover is as follows:

Individual trade receivables covered by credit insurance are subject to 20% excess on local and export debtors.

Trade and other receivables with a carrying value of R790 million (2019: R757.2 million) have been ceded as security for borrowing facilities (note 3.2).

The group is exposed to exchange rate fluctuations on the following uncovered export trade debtors at year-end. This exposure arises due to the early closure of financial institutions on 31 December.

	2020 Foreign amount '000	2020 Rand amount R'000	2019 Rand amount R'000
Euro	2 124	38 170	-
US Dollar	4 657	68 071	219 069
		<b>106 241</b>	<b>219 069</b>

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 4. Working capital: measures used to assess liquidity continued

#### 4.4 Trade and other payables

	2020 R'000	2019 R'000
Trade payables	876 535	769 568
Bonus accrual	15 946	9 363
Termination benefits**	-	9 209
Leave pay*	67 669	65 438
Current leave obligations expected to be settled after 12 months	18 693	16 704
Current leave obligations expected to be settled within 12 months	48 976	48 734
Outstanding Isizinda settlement value (note 6.1(d))	-	15 000
Sundry accruals and other payables***	154 638	136 543
	<b>1 114 788</b>	<b>1 005 121</b>

\* The entire amount of the leave pay accrual is presented as current, since the group does not have an unconditional right to defer settlement. However, based on past experience, the group does not expect all employees to take the full amount of accrued leave or require payment within the next 12-months.

\*\* Termination benefit provisions are recognised only when the group has a constructive obligation, which is when: (i) there is a detailed formal plan that identifies the business or part of the business concerned, the location and number of employees affected, the detailed estimate of the associated costs, and the timeline; and (ii) the employees affected have been notified of the plan's main features. Refer note 2.4.1(b) for more detail.

\*\*\* Sundry accruals and other payables include provisions, employee benefit obligations and accrued interest and is due to be settled within 12-months.

Provisions are recognised when the group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and the amount can be reliably estimated. Provisions are not recognised for future operating losses. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognised as interest expense.

Due to the short-term nature of the current payables, the carrying amount approximates their fair value.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 5. Long-term assets: utilisation of fixed and intangible assets

#### 5.1 Property, plant and equipment

##### (a) Accounting policies and significant judgements

Capital works under construction is stated at cost, net of accumulated impairment losses. Plant and equipment is stated at cost, net of accumulated depreciation and accumulated impairment losses. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects.

##### (i) Useful lives and residual values

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets, as follows:

Buildings	30 to 50 years
Plant and machinery	4 to 50 years
Vehicles	4 to 10 years
Equipment	5 to 20 years
Furniture	5 to 10 years

Depreciation commences when the assets are ready for their intended use. Where significant parts of an item have different useful lives to the item itself, these parts are depreciated over their estimated useful lives. The methods of depreciation, useful lives and residual values are reviewed annually. During the current year, the useful lives and residual values were assessed by the Asset Management team who have appropriate skills and expertise to make such assessments. No adjustments have been made to these.

##### (ii) Derecognition

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit or loss when the asset is derecognised.

##### (iii) Borrowing costs

Borrowing costs include interest and other costs incurred in connection with the borrowing of funds.

Borrowing costs directly attributable to the acquisition, construction or production of assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are expensed in the period in which they are incurred.

The capitalisation rate used to determine the amount of borrowing costs to be capitalised is the weighted average interest rate applicable to the entity's general borrowings during the year. The amount of borrowing costs capitalised during the year ended 31 December 2020 was R7.6 million (2019: R6.2 million). The weighted average interest rate used for borrowing costs capitalised is 7.5% (2019: 9.23%).

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 5. Long-term assets: utilisation of fixed and intangible assets continued

#### 5.1 Property, plant and equipment continued

##### (b) Property, plant and equipment movement schedule continued

A register of land and buildings is available for inspection at the company's registered office.

Moveable items with a carrying value of R12.9 million (2019: R17.2 million) and land and buildings, largely production buildings located at the Campsdrift site, with a carrying value of R65.6 million (2019: R67.1 million) are encumbered as security for borrowing facilities (note 3.1).

The total depreciation charge is included in cost of sales, R66.8 million (2019: R78.7 million), and inventory, R9.4 million (2019: R28.9 million).

Included in property, plant and equipment are assets with a carrying amount of R21.8 million (2019: R21.8 million) which are currently mothballed and not classified as held-for-sale.

#### 5.2 Right-of-use assets

The group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

The group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and

lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

Land and buildings	5 to 20 years
Vehicles, equipment and other	5 to 10 years

The group applies the short-term lease recognition exemption to its short-term leases (i.e. those leases that have a lease term of 12 months or less from the commencement date). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value, which would generally include rental of printers etc. Lease payments on short-term leases and leases of low value assets are recognised as expense on a straight-line basis over the lease term.

The lease liabilities relating to the right of use assets are disclosed in note 3.3.

Set out below are the carrying amounts of right-of-use assets recognised and the movements during the year:

	Total R'000	Land and buildings R'000	Vehicles, equipment and other R'000
01 January 2019	47 299	7 617	39 682

### 5. Long-term assets: utilisation of fixed and intangible assets continued

#### 5.3 Intangible assets

##### (a) Accounting policies and significant judgements

The group's only intangible asset is computer software. Acquired computer software licences are capitalised on the basis of the costs incurred to acquire and bring into use the specific software. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. These costs are amortised over their estimated useful lives, as follows:

Internally generated	3 to 15 years
Other external	3 to 10 years

Maintenance costs are recognised as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the group are recognised as intangible assets when all the asset recognition criteria are met. Directly attributable costs that are capitalised as part of the software product comprise mainly software development employee costs.

An intangible asset is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit or loss when the asset is derecognised.

Computer software costs recognised as assets are amortised over their estimated useful lives.

Total amortisation is included in cost of sales in the statement of profit or loss.

The weighted average interest rate used for borrowing costs capitalised is 7.5% (2019: 9.23%).

Capital work in progress ("CWIP") included within the total software cost above is R5.7 million (2019: R14.7million).

### 5. Long-term assets: utilisation of fixed and intangible assets continued

#### 5.4 Finance Lease Receivable

The group entered into a lease arrangement as a lessor in the current year which is considered to be a finance lease. The group leases property, plant and machinery and as they transfer substantially all of the risks and rewards of ownership of the assets they are classified as finance leases.

The lease receivable arises due to a leasing agreement entered into with Bingelela Alloys. This lease represents a finance lease under the requirements of IFRS 16 and the related property, plant and machinery item subject to the lease was derecognised and the lease receivable recognised. This lease is over a period of years.

The following reconciliation reflects the anticipated cash receipts over the period of the lease:

	2020 R'000
<b>Opening balance</b>	-
Additions in the current year	14 204
Interest income	933
Other income statement charges	818
Proceeds	(2 950)
<b>Closing balance</b>	<b>13 005</b>

The information relating to the finance lease receivable is disclosed below:

#### Finance Lease Receivable

	2020
Current	4 523
Non current	8 482
	<b>13 005</b>

#### Finance lease arrangements

	2020
Less than 1 year	4 523
1-2 years	9 046
2-3 years	7 814
3-4 years	-
<b>Gross Investment in lease receivable</b>	<b>21 383</b>
Unearned future interest	(8 378)
<b>Net Investment in lease receivable</b>	<b>13 005</b>

#### Profit and loss information

	2020
Profit or loss impact	1 183
Finance income on the net investment in the lease	933

#### 5.5 Capital expenditure commitments

Significant capital expenditure contracted for at the end of the reporting period but not recognised as liabilities is as follows:

	2020 R'000	2019 R'000
Property, plant and equipment	52 681	84 824

Capital expenditure will be funded by a combination of external borrowings and cash flows from operations.

### 6. Investments: investments in subsidiaries, associates and joint ventures

#### 6.1 Details of investments in subsidiaries, associates and joint venture

##### (a) Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries as at 31 December 2020. Control exists where the group is exposed, or has rights, to variable returns from its involvement with the subsidiary and has the ability to affect those returns through its power over the subsidiary. Specifically, the group controls an investee if, and only if, the group has:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure, or rights, to variable returns from its involvement with the investee; and
- The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the group has less than a majority of the voting or similar rights of an investee, the group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement(s) with the other vote holders of the investee;
- Rights arising from other contractual arrangements; and
- The group's voting rights and potential voting rights

The group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. The results of entities controlled by the group acquired or disposed of during the year are included in the group statement of profit or loss from the date the group exercised control, or up until the point it ceases to exercise control. Inter-company transactions, balances and unrealised gains and losses on transactions between group entities are eliminated on consolidation.

The group treats transactions with non-controlling interest as transactions with equity holders of the group. Gains or losses arising from these transactions are recorded in equity.

##### (b) Investment in joint ventures

The group applies IFRS 11, "Joint Arrangements" to all joint arrangements. Investments in joint arrangements are classified as either joint operations or joint ventures, depending on the contractual rights and obligations of each investor. The group has assessed the nature of its joint arrangement and determined it to be a joint venture. Joint ventures are accounted for applying the equity method.

Under the equity method of accounting, interest in joint ventures is initially recognised at cost and adjusted thereafter to recognise the group's share of the post-acquisition profits or losses and movements in other comprehensive income. When the group's share of losses in a joint venture equals or exceeds its interest in the joint venture (which includes any long-term interest that, in substance, forms part of the group's net investment in joint venture), the group does not recognise further losses, unless it has incurred obligations or made payments on behalf of joint ventures.

Unrealised gains/losses on transactions between the group and its joint ventures are eliminated to the extent of the group's interest in the joint venture. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the assets transferred.

During the current year, the group obtained a 38.7% investment in joint venture, Isizinda through the loss of control over Isizinda as detailed in note 1.6(v) and 6.1(e).

- Imbewu SPV 14 (Pty) Ltd (note 8.1(d)(i))
- The 2015 Hulamin Employee Share Ownership Trust (note 8.1(d)(ii))

Structured entities have no material individual assets or liabilities. All transactions with structured entities eliminate on consolidation. No financial guarantees are provided on behalf of structured entities.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 6. Investments: investments in subsidiaries, associates and joint ventures continued

#### 6.1 Details of investments in subsidiaries, associates and joint venture continued

##### (d) Interests in Joint Ventures

##### 1. Loss of control

The shareholders of Isizinda, namely Bingelela Capital Proprietary Limited ("Bingelela") and Hulamin Operations Proprietary Limited ("Hulamin Operations"), agreed on a restructure of Isizinda during the 2019 financial year, whereby, inter alia:

- (i) Hulamin acquired the rolling slab casting business and assets from Isizinda, effective 1 January 2020, and entered into a lease agreement with Isizinda to continue operating this casting facility. All funds derived by Isizinda from the proceeds of the rolling slab casting business and assets shall be applied in the reduction of Isizinda's indebtedness to Hulamin.
- (ii) Hulamin, in the prior year, advanced the sum of R50 million to Isizinda, who used these funds to declare and pay a dividend of R35 million to Bingelela. The balance of R15 million was paid into an escrow account and will be declared as a dividend and paid to Bingelela upon conclusion of a new metal agreement between Hulamin and the Hillside operation of South32. This is considered probable.

The sale of the slab assets from Isizinda to Hulamin results in a change in the relevant activities of Isizinda to that of a property management company for which unanimous consent is required to make any decisions with regards to the relevant activities.

Accordingly, upon the effective date of sale, the "relevant activities" of Isizinda, in terms of IFRS 10, have changed materially. and, as of 1 January 2020, management assessed that Hulamin no longer controls Isizinda in terms of the requirements of IFRS 10. Management considered the disposal group in terms of IFRS 5 Non-current assets held for sale and discontinued operations, and concluded that as the operating activities "disposed of" in the loss of control were re-acquired by the group through the purchase of the rolling slab casting business that this did not meet the definition of a discontinued operation and hence no additional disclosure was required.

The loss on loss of control represents the difference between the net assets deconsolidated and the fair value of the investment in joint venture.

	R'000
Total disposal consideration (see point 2 (iii) below)	84 373
Carrying amount of net assets deconsolidated	(95 580)
<b>Loss arising from loss of control before and after income tax</b>	<b>(11 207)</b>

##### 2. Fair value of remaining investment

The fair value of the identifiable assets and liabilities of Isizinda held by the group as at the date of derecognition were:

	R'000
Property, plant and equipment	77 798
Trade debtors	228 787
Cash and cash equivalents	7 346
Income tax asset	2 757
<b>Total assets</b>	<b>316 688</b>
Deferred tax liabilities	15 280
Trade creditors	207 384
Current borrowings	94 024
<b>Total liabilities</b>	<b>316 688</b>
<b>Total identifiable net assets at fair value</b>	<b>–</b>

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 6. Investments: investments in subsidiaries, associates and joint ventures continued

#### 6.1 Details of investments in subsidiaries, associates and joint venture continued

##### (d) Interests in Joint Ventures continued

##### 2. Fair value of remaining investment continued

Calculation of fair value:

- (i) Land and buildings: The recoverable value was determined with reference to market-related rental prices per square meter, accepted vacancy rates and maintenance cost per square meter to determine a value in use of unoccupied land and buildings. Inputs were obtained from third party property market reports. Inputs are ranked as level 3 on the fair value hierarchy. The fair value measurement is non-recurring.

The following significant unobservable inputs have the greatest impact in determining the fair value:

Rental price per square meter	R20.18
Maintenance cost per square meter R5.65	R5.65
Vacancy rates	4.00%
Capitalisation rate	12.50%

- (ii) Plant and machinery: The fair value of idle plant and machinery was determined with reference to the selling price of similar items of plant and machinery adjusted for the cost to dispose. Inputs are ranked as level 3 on the fair value hierarchy. The fair value measurement is non-recurring.

- (iii) The fair value of the remaining investment in joint venture and the loan granted to Isizinda recognised on 1 January 2020 was:

	Fair value at derecognition R'000
<b>Fair value of Hulamin Operation's share of the equity component (38.7%)</b>	
Fair value Hulamin Operation's loan to Isizinda, classified as follows:	
Current	45 643
Non-current	38 730
	<b>84 373</b>

The fair value of the loan to Isizinda was determined with reference to a value in use model of the business and the future cash flows have been estimated using a discount rate of 15.73%. Inputs are ranked as level 3 on the fair value hierarchy. The fair value measurement is non-recurring.

The fair value is sensitive to changes to these unobservable inputs. Changes to these inputs might result in a significantly higher or lower fair value measurement.

##### 3. Joint arrangements

##### (a) Initial recognition and subsequent measurement

The group applies IFRS 11, "Joint Arrangements" to all joint arrangements. Investments in joint arrangements are classified as either joint operations or joint ventures, depending on the contractual rights and obligations of each investor. The group has assessed the nature of its joint arrangement and determined it to be a joint venture. Joint ventures are accounted for applying the equity method.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 6. Investments: investments in subsidiaries, associates and joint ventures continued

#### 6.1 Details of investments in subsidiaries, associates and joint venture continued

##### (d) Interests in Joint Ventures continued

##### 3. Joint arrangements continued

###### (a) Initial recognition and subsequent measurement continued

Under the equity method of accounting, interests in joint ventures are initially recognised at cost and adjusted thereafter to recognise the group's share of the post-acquisition profits or losses and movements in other comprehensive income. When the group's share of losses in a joint venture equals or exceeds its interest in the joint venture (which includes any long-term interest that, in substance, forms part of the group's net investment in joint venture), the group does not recognise further losses, unless it has incurred obligations or made payments on behalf of joint ventures.

Unrealised gains/losses on transactions between the group and its joint ventures are eliminated to the extent of the group's interest in the joint venture. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the assets transferred.

###### (b) Investment in Isizinda Aluminium Proprietary Limited ("Isizinda")

During the current year, the group obtained a 38.7% investment in joint venture, Isizinda through the loss of control over Isizinda as detailed in note 6.1(d). Isizinda is a separate structured vehicle incorporated and operating in South Africa. The primary activity of Isizinda is the management of properties, including the maintenance thereof, disposal of properties and other assets, sourcing, vetting and ongoing maintenance of tenants, and determining the terms for lease agreements.

In determining whether an entity has control or joint control over an investee, one needs to determine what the investee's relevant activities are and who can direct those activities. The relevant activities are those that significantly impact the economic performance or returns over the investee entity. The memorandum of incorporation and shareholders agreement requires that the management and decision-making over Isizinda's operations requires unanimous consent of all shareholders. Hulamin Operations holds a protective right to prevent dividend payments before settlement of its loan by Isizinda. This protective right does not prevent the counterparty from exercising its rights regarding the management of Isizinda's operations and decision-making thereon.

IFRS 11.8 provides guidance that all parties control an arrangement when they must act together to direct the activities that significantly affect the returns of the arrangement. As the decision-making over Isizinda's relevant activities requires unanimous consent of both Hulamin Operations and Bingelela, neither party can make decisions on Isizinda's operations independently of the other party. Therefore, Isizinda is jointly controlled by Hulamin Operations and Bingelela.

The contractual arrangement provides the group with only the right to the net assets of the joint arrangement, with the voting rights to the assets and obligation for liability of the joint arrangement resting primarily with Hulamin Operations Proprietary Limited. Under IFRS 11, this joint arrangement is classified as a joint venture and has been included in the consolidated financial statements using the equity method.

The summary of financial information in relation to the joint venture as presented below is disclosed at Hulamin Operations' proportional shareholding of 38.7 percent.

Loan balance attributable to joint ventures *	63 924	
Impairment on loans to joint ventures	(3 724)	
<b>Carrying value</b>	<b>58 635</b>	
Interest in joint venture	<b>38.7</b>	

\* The loan to Isizinda was subordinated in favour of other creditors and as such at year-end the full loan was non-current.

#### 6.2 Non-current assets held-for-sale

The group classifies non-current assets and disposal groups as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. Non-current assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Costs to sell are the incremental costs directly attributable to the disposal of an asset (or disposal group), excluding finance costs and income tax expense.

Property, plant and equipment and intangible assets are not depreciated or amortised once classified as held for sale.

for the year ended 31 December 2020

### 6. Investments: investments in subsidiaries, associates and joint ventures continued

#### 6.2 Non-current assets held-for-sale continued

##### (i) Almin Metal Industries Limited ("Almin")

During the 2018 financial year, the group received an offer from a third party to acquire the 49% interest which it holds in Almin. The sale was approved by the Board and was expected to be completed within 12 months from year-end. All conditions of sale have since been satisfied and the associate was disposed of in 2019. The difference between the carrying amount of the associate of R6.5 million and the proceeds from disposal amounting to R8.7 million (after the payment of an amount of R0.4 million in capital gains tax) was recognised in profit or loss as a gain on disposal (note 2.4.3).

##### (ii) Extrusions Olifantsfontein plant

In May 2019, Hulamin Extrusions announced the proposed restructuring of its business operations which included the intended disposal of the property, plant and equipment of its Olifantsfontein operation (refer to note 2.4.1(b) for further details).

It was further determined that the assets relating to the Olifantsfontein plant were going to be recovered principally through sale rather than through use. The sale of these assets was highly probable. Hulamin Extrusions entered into an agreement of sale of these assets with a third party. The sale of these assets was expected to realise within one year from 30 June 2019 (classification date). At classification date, the carrying amount was lower than its fair value less costs to sell, thus no impairment loss was recognised. Subsequently the fair value less costs to sell was determined with reference to a binding sale agreement, which indicated that the carrying amount exceeded the fair value less costs to sell by R6 million and consequently an impairment charge of that amount was booked in profit or loss (refer note 2.4.4 (a)(ii)). The sale of this asset was realised in 2021.

### 7. Financial risk management: measures to mitigate risk

#### Financial risk factors

This note explains the group's exposure to financial risks and how these risks could affect the group's future financial performance.

The group's risk management is predominantly controlled by a central treasury department (group treasury) under policies approved by the board of directors. Group treasury identifies, evaluates and hedges financial risks in close co-operation with the group's operating units. The board provides written principles for overall risk management, as well as policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk and use of derivative financial instruments.

#### 7.1 Market risk

##### (a) Foreign exchange risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. The group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the US Dollar and the Euro.

Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities that are denominated in a currency that is not the group's functional currency, which is South African Rand. The group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the US Dollar and the Euro. The group's risk management policy is to hedge its currency exposure related to import and export transactions, foreign currency assets and liabilities.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 7. Financial risk management: measures to mitigate risk continued

#### 7.1 Market risk continued

##### (a) Foreign exchange risk continued

The group uses foreign exchange contracts, transacted with commercial banks, to manage these risks.

For every 5% weakening or strengthening of the South African Rand against the group's foreign currency exposure at 31 December, the after-tax profit for the year would have been higher or lower by R4 043 089 (2019: R720 405) based on the group's exposure at the balance sheet date. The sensitivity of profits to changes in exchange rates is a result of foreign exchange gains or losses on translation of foreign currency denominated trade receivables and payables and financial assets and liabilities at fair value through profit or loss that are offset by equivalent gains or losses in currency derivatives. There were no currency cash flow hedges at the end of 2020 and therefore for currency cash flow hedges the above change in currency exchange rates would have resulted in equity being lower or higher by RNil (2019: R18 360 107).

##### (b) Commodity price risk

The group purchases and sells aluminium at prices that fluctuated with movements on the London Metal Exchange and as a result the group is exposed to commodity price risk from the time the aluminium is purchased to when it is sold to a customer (Metal Price Lag). The group uses LME future contracts to manage the commodity price risk. Due to this commodity price risk having opposing effects on cash flows and profit, the strategy was to hedge 50% of the risk using futures contracts. The group suspended the hedging strategy for LME futures in the first quarter of 2020. The group has additional hedges in place for customer orders where the price has been fixed for a future delivery date fixed price contracts (FPC).

Due to hedge accounting for commodity hedges, for every 5% weakening or strengthening of the price of aluminium at 31 December, after tax profit for the year would have been lower or higher by RNil (2019: RNil) based on the group's exposure to firm customer commitments (FPC) at the balance sheet date. The above change in aluminium prices would have had a R1 550 628 effect on equity (2019: R23 177 081)

##### (c) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The group has no significant interest-bearing assets and interest rate risk is solely related to borrowings. The group's borrowings bear interest at variable rates and the group has not fixed the interest rate on any of its borrowings. Consequently, every 0,5 percentage point increase or decrease in the interest rate at 31 December would have no fair value effect on after-tax profit (2019: nil) and no effect on equity (2019: nil).

The group is also exposed to future cash flow risks on borrowings. Had interest rates for the year been 0,5 percentage points higher or lower and been applied to the period end net debt, the interest expense for the year would have been higher or lower by R4 million (2019: R1.4 million).

The group analyses the impact on profit and loss of defined interest rate shifts – taking into consideration refinancing, renewal of existing positions, alternative financing and hedging. The analysis is only for liabilities that represent the major interest-bearing positions.

##### (d) Hedge accounting

Hedge effectiveness is determined at the inception of the hedge relationship, and through periodic prospective effectiveness assessments, to ensure that an economic relationship exists between the hedged item and hedging instrument.

There is an economic relationship between the hedged items and the hedging instruments as the terms of the foreign exchange and commodity forward contracts match the terms of the expected highly probable forecast transactions (i.e., notional amount and expected payment date). The group established a hedge ratio of 1:1 for the hedging relationships as the underlying risk of the foreign exchange and commodity forward contracts are identical to the hedged risk components. To test the hedge effectiveness, the group used the hypothetical derivative method and compares the changes in the fair value of the hedging instruments against the changes in fair value of the hedged items attributable to the hedged risks.

The group uses forward exchange contracts, FPCs and LME future contracts to hedge its exposure to foreign currency and commodity risk. When hedge accounting is applied, the group only designates the spot component of foreign currency forwards in hedge relationships. The spot component is determined with reference to relevant spot exchange rates. The differential between the contracted forward rate and the spot market exchange rate is defined as the forward points. The changes in the forward element of the foreign currency forwards that relate to hedged items is recorded in profit or loss and the forward element of the LME future contracts that relate to hedged items are recorded in equity.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 7. Financial risk management: measures to mitigate risk continued

#### 7.1 Market risk continued

##### (d) Hedge accounting continued

###### (i) Classification of derivatives

Derivatives are only used for economic hedging purposes and not as speculative investments. However, where derivatives do not meet the hedge accounting requirements, they are classified as 'fair value through profit or loss'. They are presented as current assets or liabilities to the extent they are expected to be settled within 12-months after the end of the reporting period.

The fair value of derivative assets and derivative liabilities are calculated as the difference between the contracted value and the value to maturity at the year-end date. The value to maturity of forward foreign exchange contracts is determined using quoted forward exchange rates at the balance sheet date. The value to maturity of commodity futures is determined by reference to quoted prices at the balance sheet date.

###### (ii) Derivatives and hedging activities

As part of its risk management strategy, the group has identified a series of risk categories with corresponding hedging strategies using derivatives.

Hedge accounting is adopted when all the IFRS requirements are fulfilled, which includes documenting at the inception of the transaction the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedging transactions. In addition, the group documents the assessment, both at hedge inception and on an ongoing basis, of the hedge effectiveness. Transactions that are entered into in accordance with the group's hedging objectives, but which do not qualify for hedge accounting, are referred to in these financial statements as economic hedge relationships.

A cash flow hedge is the hedge of the exposure to variability in cash flows that is attributable to a particular risk associated with an asset or a liability that could affect profit or loss or a highly probable forecast transaction that could affect profit or loss. If a cash flow hedge meets the conditions for hedge accounting, the portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised in the statement of comprehensive income and accumulated in equity and the ineffective portion is recognised in profit or loss. A hedge of the foreign currency risk of a firm commitment is designated and accounted for as a cash flow hedge.

If an effective hedge of a forecast transaction subsequently results in the recognition of a financial asset or financial liability, the associated gains or losses accumulated in equity are transferred to income in the same period in which the asset or liability affects profit or loss.

If a hedge of a forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability, the associated gains or losses accumulated in equity are included in the initial measurement of the acquisition cost or other carrying amount of the asset or liability.

On the implementation of the hedging component of IFRS 9, 'Financial Instruments' during the current year, When a hedging instrument expires, or is sold or terminated, or when a hedge no longer meets the criteria for hedge accounting, any cumulative deferred gain or loss and deferred costs of hedging in equity at that time remains in equity until the forecast transaction occurs, resulting in the recognition of a non-financial asset such as inventory. When the forecast transaction is no longer expected to occur, the cumulative gain or loss and deferred costs of hedging that were reported in equity are immediately reclassified to profit or loss.

The hedging reserve accumulates all movement in the fair value of financial instruments designated as hedges of transactions that have yet to be recognised on the balance sheet. When the underlying transaction is recognised, the related accumulated hedging reserve is released to the income statement and reflected in revenue. The release of the hedge reserve follows the hedged item represented by probable forecast sales transactions.

### 7. Financial risk management: measures to mitigate risk continued

#### 7.1 Market risk continued

##### (d) Hedge accounting continued

##### (v) Hedge ineffectiveness

Hedge effectiveness is determined at the inception of the hedge relationship, and through periodic prospective effectiveness assessments, to ensure that an economic relationship exists between the hedged item and hedging instrument.

There is an economic relationship between the hedged items and the hedging instruments as the terms of the foreign exchange and commodity forward contracts match the terms of the expected highly probable forecast transactions. The Group established a hedge ratio of 1:1 for the hedging relationships as the underlying risk of the foreign exchange and commodity forward contracts are identical to the hedged risk components. To test the hedge effectiveness, the Group uses the hypothetical derivative method and compares the changes in the fair value of the hedging instruments against the changes in fair value of the hedged items attributable to the hedged risks. Hedge ineffectiveness can arise from:

- Differences in the timing of the cash flows of the hedged items and the hedging instruments.
- Different indexes (and accordingly different curves) linked to the hedged risk of the hedged items and hedging instruments.
- The counterparties' credit risk differently impacting the fair value movements of the hedging instruments and hedged items.
- Changes to the forecasted amount of cash flows of hedged items and hedging instruments.

The loss recognised in profit/(loss) as a result of hedge ineffectiveness amounts to R146.2m (2019: profit of R3.8m), refer note 7.1 (d) (vi).

**A summary of the group's financial instruments used to mitigate foreign exchange and commodity price risk is shown below**

	2020 R'000	2019 R'000
Foreign currency management – probable forecast sales	-	41 551
Foreign currency management – firm commitments, trade debtors, creditors and import orders	5 313	16 727
Commodity price management	2 395	(13 643)
	<b>7 708</b>	<b>44 635</b>
Grouped as:		
Financial assets	7 708	88 661
Financial liabilities	-	(44 026)
	<b>7 708</b>	<b>44 635</b>

The credit quality of all derivative financial assets is sound and there have been no defaults in past years. None are overdue nor impaired and the group does not hold collateral on derivatives. The group's maximum exposure to counterparty credit risk on derivative assets at 31 December 2020 is R7.7 million (2019: R58.3 million).

The fair value measurement classification of the above financial instruments is level 2 (observable inputs) in accordance with the fair value hierarchy prescribed by IFRS 13. Key inputs used in the determination of fair value relate to London Metal Exchange aluminium prices and currency exchange rates.

Grouped as:						
Financial assets			-			47 204
Financial liabilities			-			( 5 653)
			-			41 551

#### Cash flow hedges

The group uses FECs to hedge US Dollar exposure of probable forecast sales. These FECs are hedge accounted and are designated as cash flow hedges, accounted for in accordance with the accounting policy detailed in this note. When assessing the effectiveness of the hedges during hedge effectiveness testing, the group compares the change in the fair value of the forecast sales transaction attributable to movements in exchange rates to the change in the fair value of the FECs.

for the year ended 31 December 2020

### 7. Financial risk management: measures to mitigate risk continued

#### 7.1 Market risk continued

##### (g) Commodity price management

The following futures contracts cover commodity price risk on future sales. The requirement for hedge accounting were met in 2020 and 2019:

	2020			2019		
	Tons	Contracted value R'000	Fair value asset/(liability) R'000	Tons	Contracted value R'000	Fair value asset/(liability) R'000
Net aluminium futures purchases/(sales) maturing in*:						
2020				( 18 575)	32 389	( 13 643)
2021	1 075	( 28 910)	2 394			
	<b>1 075</b>	<b>( 28 910)</b>	<b>2 394</b>	( 18 575)	32 389	( 13 643)
Grouped as:						
Financial assets			<b>2 394</b>			6 194
Financial liabilities			-			( 19 837)
			<b>2 394</b>			( 13 643)

The group may enter into London Metal Exchange (LME) futures to hedge the metal price exposure on firm commitments with customers and probable forecast sales. These LME futures were hedge accounted for the period ended 2020 and 2019.

\* Derivative instruments on average hold a maturity of three-months or less.

#### 7.2 Credit risk

Credit risk arises from cash and cash equivalents, derivative financial instruments and deposits with banks and financial institutions, as well as credit exposures to customers, including outstanding receivables and committed transactions. All deposits are held with major South African banks and all foreign exchange hedging transactions are undertaken with these banks. All aluminium futures are undertaken with Category 1 London Metal Exchange brokers. Hulamin will only enter into currency hedges with the four major South African banks.

Quantitative data on credit risk is disclosed in the notes to the annual financial statements on derivative financial instruments (under the hedging section of this note) and trade and other receivables (note 4.3).

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 7. Financial risk management: measures to mitigate risk continued

#### 7.3 Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. Due to the dynamic nature of the underlying businesses, flexibility in funding is maintained through ensuring availability under committed credit lines. Management monitors rolling forecasts of the group's liquidity reserve, being the excess of available facilities over forecast net borrowings and available cash balances.

The group's facility utilisation (including cash reserves) at the period end was:

	2020 R'000	2019 R'000
Revolving working capital facility	1 000 000	1 000 000
General short term facility	500 000	500 000
Term loan	-	54 000
<b>Current facilities</b>	<b>1 500 000</b>	<b>1 554 000</b>
Non-current facilities	-	-
<b>Total borrowing facilities</b>	<b>1 500 000</b>	<b>1 554 000</b>
Less: indirect facilities allocated to letters of credit	<b>( 300 000)</b>	<b>( 300 000)</b>
	<b>1 200 000</b>	<b>1 254 000</b>
Utilised by:		
Non-current borrowings (note 3.1)	-	-
Current borrowings (note 3.2)	<b>( 789 053)</b>	<b>( 352 083)</b>
Cash and cash equivalents (note 4.1)	<b>38 045</b>	<b>126 207</b>
<b>Committed undrawn direct facilities and cash</b>	<b>448 992</b>	<b>1 028 124</b>

In the prior period end, current facilities included a term loan of R54 million used to fund the upgrade of the aluminium recycling plant in 2015. The loan facility was repayable quarterly in arrears starting on 31 March 2016 and was fully repaid at 31 December 2020.

In addition to the term loan, Hulamin's borrowing facilities include a general short-term facility of R500 million (2019: R500 million), of which R300 million has been allocated to a letter of credit facility and revolving working capital facilities of R1 000 million (2019: R1 000 million).

Financial liabilities with maturity dates within the next twelve months comprise current borrowings, trade and other payables, sundry accruals and derivative liabilities.

Current borrowings*	<b>789 053</b>	-	-	-	<b>789 053</b>
Trade and other payables (excluding employee benefit payables)	<b>989 171</b>	-	-	-	<b>989 171</b>
Lease liabilities	<b>20 514</b>	<b>28 526</b>	<b>4 282</b>	<b>54 240</b>	<b>107 562</b>
Derivative financial liabilities	-	-	-	-	-
	<b>1 798 738</b>	<b>28 526</b>	<b>4 282</b>	<b>54 240</b>	<b>1 885 786</b>

\* Borrowing facilities incur interest at variable rates. As fixed contractual terms are not known in future periods, management has estimated interest charges using a best estimate of the forecast rate and applied this to the average balance for the year.

Included in the above amounts payable within a period of less than one year, are financial liabilities in the amount of R789 million (2019: R1 024 million) which are payable within a period of three months, including trade payables in the amount of R877 million (2019: R770 million). Trade receivables amounting to R893 million (2019: R688 million) are recoverable within a period of three months.

#### 7.4 Capital risk management

For the purpose of the group's capital management, capital includes issued capital, convertible preference shares, share premium and all other equity reserves attributable to the equity holders of the parent. The primary objective of the group's capital management is to maximise the shareholder value and to safeguard its ability to continue as a going-concern and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

These objectives result in varying capital ratios, with current and future borrowings being evaluated against the group's expected operating cash flows and capital investment needs. Capital adequacy and liquidity are managed by monitoring gearing ratios, interest cover and debt service ratios.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

## 7. Financial risk management: measures to mitigate risk continued

### 7.4 Capital risk management continued

The group's gearing ratio at the period end was as follows:

	Notes	2020 R'000	2019 R'000
Non-current borrowings	3.1	-	-
Current borrowings	3.2	789 053	352 083
Lease liabilities (current and non-current)		67 764	46 493
Total borrowings		856 817	398 576
Less: Cash and cash equivalents	4.1	( 38 045)	( 126 207)
Net debt		818 772	272 369
Total equity		2 368 447	2 570 308
Total capital		3 187 219	2 842 677
Gearing ratio percentage (net debt over total capital)		25.7	9.6

In order to achieve this overall objective, the group's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no breaches of the financial covenants of any interest-bearing loans and borrowing in the current period.

No changes were made in the objectives, policies or processes for managing capital during the years ended 31 December 2020 and 2019.

The gearing ratio increased to 25.7% (2019: 9.6%) at 31 December 2020. Both net debt and gross assets increased following the recognition of right-of-use assets and lease liabilities on 1 January 2019.

## 8. Benefits and remuneration: our investment in our people

### 8.1 Share-based payments

#### (a) Employee schemes

The group's employee share incentive schemes are accounted for as equity-settled share-based payments. Equity-settled share-based payments are measured at fair value at the date of grant and recognised in profit or loss on the straight-line basis over the vesting period, based on the estimated number of shares that will eventually vest and adjusted for the effect of non-market vesting conditions.

Fair value is measured using the Monte Carlo Simulation, Black-Scholes and binomial tree valuation models.

#### (b) BEE transactions

BEE transactions where the group receives or acquires goods or services as consideration for the issue of equity instruments of the group are treated as share-based payment transactions.

BEE transactions where employees are involved are measured and accounted for on the same basis as share-based payments, as disclosed above.

Transactions in which share-based payments are made to parties other than employees are measured by reference to the fair value of equity instruments granted if no specific goods or services are received. Vesting of the equity instrument occurs immediately and an expense and related increase in equity is recognised on the date that the instrument is granted. No further measurement or adjustments are required as it is presumed that the BEE credentials are received upfront. Incremental costs that are directly associated with the BEE transaction are expensed immediately in the determination of profit or loss.

### 8. Benefits and remuneration: our investment in our people continued

#### 8.1 Share-based payments continued

##### (c) Information relating to employee share scheme grants

###### (i) Hulamin Limited Share Appreciation Right Scheme 2007

Under the Share Appreciation Right Scheme, participating employees are awarded the right to receive shares equal in value to the difference between the exercise price and the grant price.

The vesting of the right is conditional on the achievement by Hulamin of performance conditions over a three-year period.

Grant price	Estimated weighted average fair value per right	Expiring seven years from	Number of rights at December 2019	Rights exercised in 2020	Rights forfeited/lapsed in 2020	Number of rights at Dec 2020	Rights time constrained
R6.90	R2.73	24 April 2014	2 505 966	-	1 152 531	1 353 435	-
R6.50	R2.59	26 April 2017	7 333 187	-	7 333 187	-	-
			9 839 153	-	8 485 718	1 353 435	-

The volume-weighted average share price during the year for Hulamin shares was R1.32 (2019: R2.86).

The estimated fair value of these share appreciation rights at grant date was determined using a binomial tree valuation model, based on the following significant inputs:

		2017	2014
Share price at grant date	(R)	6.50	6.90
Risk-free interest rate	(%)	7.74	8.17
Expected volatility	(%)	42.09	42.22
Expected dividends	(%)	0.55	0.05
Expected remaining life (Months)	(months)	-	4
Contractual life (Months)	(months)	84	84

Vesting conditions:

- Time Three years
- Non-market An increase in Hulamin Limited headline earnings per ordinary share as determined by the Remuneration Committee.
- Market None

###### (ii) Hulamin Limited Long Term Incentive Scheme 2007 (without performance conditions)

Under the Long-Term Incentive Plan, participating employees are granted conditional awards. The vesting of the award is conditional on the employee continuing employment with the company or any other employer company until the vesting date.

Grant price	Estimated weighted average fair value per right	Expiring three years from	Number of conditional awards at December 2019	Conditional awards exercised in 2020	Number of conditional awards at December 2020	Conditional time constrained
Nil	R 6.44	15 May 2017	78 577	78 577	-	-
			78 577	78 577	-	-

The volume-weighted average share price during the year for Hulamin shares was R1.32 (2019: R2.86).

Expected remaining life	(months)	7
Contractual life	(months)	36

Vesting conditions:

- Time Three years
- Non-market None
- Market None

##### (d) BEE Equity Transactions

###### (i) Strategic Partners

On 22 December 2015, Hulamin concluded agreements with BEE partners to facilitate the acquisition of an equity interest in Hulamin. The BEE partners consist of Eligible Employees and long-standing Strategic Partners.

The Strategic BEE partners, through Imbewu SPV 14 (Pty) Ltd, subscribed for 9 018 000 B1 ordinary, 9 018 000 B2 ordinary shares, and 18 036 000 B3 ordinary shares at a total cost of R361 000. The fair value of the transaction at grant date is R20 000 000, which was expensed in full in the 2015 financial year. The share-based payments charge is based on the number of B1 and B2 ordinary shares. The fair value of the B1 share-based payments considers an effective grant price of 50% of the 30-day volume-weighted average price (VWAP) (R5.83) of the group's ordinary shares on grant date, while the fair value of the B2 share-based payments is based on an effective grant price of 100% of the same VWAP.

On the 17 December 2020, Hulamin concluded an extension to the BEE Transaction detailed above. In terms of the BEE Extension Transaction, the BEE Transaction was extended for a further five years and two months. In terms of IFRS2, Hulamin treated the BEE Extension Transaction as a modification of the existing BEE Transaction and the valuation of the BEE Extension Transaction reflects the market observables at the modification date as noted below. The determined fair value of the BEE Extension Transaction at grant date was R10 100 000 and was expensed in full in the 2020 financial year.

The fair value of the transaction was determined using a Black Scholes valuation model using the following significant inputs:

	BEE Transaction	BEE Extension Transaction
Share price at grant date	R5.49	R1.76
Expected option life	Five years	Five years and two months
Lock in period	Three years	N/A
Risk free rate	8.58%	5%
Expected volatility	43.15%	54.90%
Expected dividends	0.50%	Nil
Expected remaining life	0 months	62 months
Contractual life	60 months	62 months

Vesting conditions:

- Time Five years
- Non-market None
- Market Share price

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 8. Benefits and remuneration: our investment in our people continued

#### 8.1 Share-based payments continued

##### (d) BEE Equity Transactions continued

###### (ii) 2015 Hulamin Employee Share Ownership Plan (ESOP)

On 22 December 2015, the ESOP Trust subscribed for 4 721 600 A1 ordinary and 26 755 733 A2 ordinary shares. Under the scheme, participating employees are granted conditional awards. The vesting of the award is conditional on the employee continuing employment with the company until the vesting date and the employee must fall within stipulated Patterson Bands.

The fair value of the share-based payments considers an effective grant price of RNil for the A1 shares and an effective grant price of the 30-day VWAP of the group's ordinary shares on grant date (R5.83) for the A2 shares, with the grant price reduced by dividends accruing to those shares over the vesting period.

On the 17 December 2020, Hulamin concluded an extension to the BEE Transaction detailed above. In terms of the BEE Extension Transaction, the BEE Transaction was extended for a further five years and two months for the 26 755 733 A2 ordinary shares and an additional 4 721 600 A3 ordinary shares were authorised. These shares were issued to the ESOP Trust in January 2021. In terms of IFRS2, Hulamin treated the BEE Extension Transaction as a modification of the existing BEE Transaction and the valuation of the BEE Extension Transaction reflects the market observables at the modification date as noted below. Under the scheme, participating employees are granted conditional awards. The vesting of the award is conditional on the employee continuing employment with the company until the vesting date and the employee must fall within the stipulated Patterson Bands.

On the 22 December 2020 and in terms of the BEE Transaction, the 4 721 600 A1 ordinary shares vested as ordinary issued shares of Hulamin. At the 31 December 2020, these shares are held by the ESOP Trust pending distribution and have been treated as treasury shares. This resulted in a release of R25 900 000 from the group employee share based payment reserve into retained earnings.

The estimated fair value costing of these conditional share awards at the grant date was based on the following significant inputs:

	BEE Transaction	BEE Extension Transaction
Share price at grant date	R5.49	R1.76
Risk free rate	8.58%	5%
Expected volatility	43.15%	54.90%
Expected dividends	0.50%	Nil
Expected remaining life	0 months	62 months
Contractual life	60 months	62 months

Vesting conditions:

- Time Five Years and Two months
- Non-market None
- Market Share price

###### (iii) Isizinda Aluminium (Pty) Ltd (Isizinda)

###### Bingelela Capital (Pty) Ltd (Bingelela)

On 1 July 2015, Isizinda acquired the Bayside casthouse business for a purchase consideration of R100.2 million funded by a loan from Hulamin to Isizinda. At the time, Bingelela had a 60% interest and Hulamin had a 40% interest in Isizinda. The interest held by Bingelela is accounted for as a grant of an equity option. The fair value of the option at the grant date was R27.2 million, which was determined on an indirect basis with reference to the intrinsic value of the business. This was determined on an indirect basis with reference to the bargain purchase gain (R51.9 million) and the contributed capital of R4 million from the outside shareholder. The time value component was deemed to be nominal.

During the 2019 financial year, Bingelela and Hulamin Operations agreed on a restructure of Isizinda whereby, *inter alia*, payments totalling R65 million were agreed to be made to Bingelela. This constitutes a settlement of the equity-settled share-based payment. The fair value of Bingelela's 60% interest in Isizinda was determined to be RNil immediately before settlement.

#### 8.1 Share-based payments continued

##### (d) BEE Equity Transactions continued

###### (iii) Isizinda Aluminium (Pty) Ltd (Isizinda) continued

###### Isizinda Employee Share Incentive Scheme Trust (the Trust)

On 2 February 2016, the Trust purchased a 2.53% interest in Isizinda, in equal portions from Bingelela and Hulamin. The interest held by the Trust is treated as a grant of an equity option. The fair value of the option at the grant date was R 1.1 million, which was determined on an indirect basis with reference to the intrinsic value of the business. As at 31 December 2019, Bingelela owned 117 472 shares (58.74%) in Isizinda and the Trust owned 5 056 shares (2.53%). The fair values of these share-based payments take into account an exercise price of RNil.

#### 8.2 Retirement benefits

##### (a) Accounting policies and significant judgements

###### (i) Pension obligations

The group provides retirement benefits to employees in the form of defined contribution plans. Certain benefits to some employees accrue with service and are therefore accounted for as a defined benefit plan. The assets of all retirement schemes are held separately from those of the group and are administered and controlled by trustees.

Contributions to defined contribution schemes are charged to profit or loss when incurred. The cost of providing benefits to the group's defined benefit plan are determined and provided using the projected unit credit actuarial valuation method. Remeasurements, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding interest), is reflected immediately in the statement of financial position with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss.

The retirement benefit obligation recognised in the group statement of financial position represents the actual deficit or surplus in the group's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans. The plan remains in a sound financial position and is governed by the Pension Funds Act, 1956 (Act No. 24 of 1956).

###### (ii) Post-retirement medical aid benefits and retirement gratuities

Provisions for post-retirement medical aid benefits and gratuities payable on retirement are calculated on an actuarial basis. Actuarial gains or losses are recognised in the same manner as those of pension obligations.

###### (iii) Retirement Benefit Schemes

The group contributes towards retirement benefits for substantially all permanent employees who are required to be a member of one of the retirement benefit plans, either pension fund or provident fund, elected by the group. These schemes are governed by the relevant fund legislation. Their assets consist primarily of listed shares, fixed income securities, property investments and money market instruments and are held separately from those of the group. The scheme assets are administered by boards of trustees, each of which includes elected representatives.

##### (b) Provident fund

The group's contributions to the Metal Industries Provident Fund scheme, a defined contribution plan, amounted to R14.4 million (2019: R14.8 million) and were expensed during the year.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 8. Benefits and remuneration: our investment in our people continued

#### 8.2 Retirement benefits continued

##### (c) Hulamin Pension Fund

During 2012, members and pensioners accepted an offer made by the fund to convert the benefits of all in-service members from defined benefit to defined contribution and to transfer the liabilities for the payment of pensions to an insurer. The group has no further exposure to actuarial or investment risk relating to the defined contribution section of the fund.

In addition to an enhancement of benefits granted by the fund to members and pensioners on conversion, the fund also provided certain members with a further benefit which targeted (but provided no guarantee of), at the date of conversion, equivalent benefits on retirement in terms of the defined contribution basis as would have been obtained had the member remained on the defined benefit basis (the "retirement benefit equalisation value").

The assets relating to the retirement benefit equalisation value are held in the employer surplus account and there is no cross-subsidisation between the retirement benefit equalisation value and the assets held by the fund in terms of the defined contribution section of the fund. In addition to the assets relating to the retirement benefit equalisation value, assets relating to the surplus apportionment to the company are held in the employer surplus account.

The company provides no guarantee in terms of the investment returns that are earned on members' retirement benefit equalisation values. The retirement benefit equalisation value benefit accrues with service and is therefore accounted for as a defined benefit plan in terms of IAS 19 (revised). The group holds no actuarial or investment risk relating to the retirement benefit equalisation value benefit.

An actuarial valuation of the group's defined benefit obligation (in relation to the retirement benefit equalisation value) and assets in the employer surplus account was performed in accordance with IAS 19 (revised) at 31 December 2020. The next valuation will be performed at 31 December 2021.

Sensitivity of discount rate:		
1% increase in discount rate – effect on current service cost	( 295)	( 368)
1% increase in discount rate – effect on the obligation	( 2 514)	( 2 761)
1% decrease in discount rate – effect on current service cost	358	451
1% decrease in discount rate – effect on the obligation	3 044	3 378

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity, the same method has been applied as when calculating the liability recognised within the statement of financial position. The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous year.

### 8. Benefits and remuneration: our investment in our people continued

#### 8.2 Retirement benefits continued

##### (d) Post-retirement Medical Aid Benefits

The group has undertaken to contribute to the medical aid costs after retirement of employees engaged prior to 30 June 1996. The obligation is unfunded.

	2020 R'000	2019 R'000
<b>(i) Amounts recognised in the statement of financial position are as follows:</b>		
Present value of unfunded obligations	175 644	195 739
Liability in the balance sheet	175 644	195 739
<b>(ii) The liability can be reconciled as follows:</b>		
Balance at beginning of year	195 739	208 915
Total expense accrued	15 082	23 757
Remeasurements:		
Actuarial gains arising from changes in financial assumptions	( 11 509)	( 18 151)
Actuarial gains arising from experience adjustments	( 9 655)	( 6 674)
Benefit payments	( 14 013)	( 12 108)
Balance at end of year	175 644	195 739
<b>(iii) Amounts recognised in the statement of profit or loss are as follows:</b>		
Interest costs	19 583	21 531
Current service costs	1 464	2 226
	21 047	23 757
<b>(iv) Amounts recognised in other comprehensive income are as follows:</b>		
Remeasurements:		
Actuarial gains arising from changes in financial assumptions	( 11 509)	( 18 151)
Actuarial gains arising from experience adjustments	( 9 655)	( 6 674)
	( 21 164)	( 24 825)

##### (i) Principal risks

Through its post-retirement medical aid subsidy benefit, the group is exposed to several risks, principally changes in:

###### Financial assumptions:

- Discount rate, which is set having regard to the market yield on suitable government bonds considering the estimated duration of the liability.
- Long-term price inflation rate, which is measured by the relationship between the yields of conventional and inflation-linked government bonds, considering the estimated duration of the liability.
- Medical inflation rate

###### Demographic assumptions:

- Withdrawal, pre-retirement mortality and ill-health retirement rates
- Post-retirement mortality
- Family statistics

The demographic assumptions used in the valuation of the liability are consistent with those of the prior year.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 8. Benefits and remuneration: our investment in our people continued

#### 8.2 Retirement benefits continued

Principal actuarial assumptions at the end of the reporting period are as follows:

	2020 R'000	2019 R'000
Discount rate (%)	11.20	10.30
Future company subsidy rate – in service (%)	5.70	5.50
Future company medical subsidy increase – pensioners (%)	7.45	7.25
<b>Sensitivity of future company subsidy rate:</b>		
1% increase in future company subsidy rate – effect on the aggregate of the service and interest costs	2 177	2 526
1% increase in future company subsidy rate – effect on the obligation	17 563	21 528
1% decrease in future company subsidy rate – effect on the aggregate of the service and interest costs	( 1 872)	( 2 145)
1% decrease in future company subsidy rate – effect on the obligation	( 15 173)	( 18 383)
<b>Sensitivity of discount rate:</b>		
1% increase in discount rate – effect on current service cost	( 242)	( 343)
1% increase in discount rate – effect on the obligation	( 14 527)	( 17 704)
1% decrease in discount rate – effect on current service cost	244	348
1% decrease in discount rate – effect on the obligation	17 024	21 005

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity, the same method has been applied as when calculating the liability recognised within the balance sheet. The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous year.

The average duration of the benefit obligation at 31 December 2020 is 10.0 years (2019: 10.9 years). This number is analysed as follows:

- active members 16.8 years (2019: 17.3 years)
- retired members 8.2 years (2019: 8.7 years)

	2020 R'000	2019 R'000
Estimated benefits payable by the group in the next financial year	14 356	14 152

### 8. Benefits and remuneration: our investment in our people continued

#### 8.2 Retirement benefits continued

##### (e) Retirement gratuities

The group has in the past made discretionary payments, on retirement, to eligible employees who have remained in service until retirement age and have completed a minimum service period. This constructive obligation is unfunded.

	2020 R'000	2019 R'000
<b>(i) Amounts recognised in the statement of financial position are as follows:</b>		
Present value of unfunded obligations	27 255	29 268
Liability in the balance sheet	27 255	29 268
<b>(ii) The liability can be reconciled as follows:</b>		
Balance at beginning of year	29 268	42 823
Total expense accrued	4 881	7 206
Remeasurements:	(4 270)	(10 653)
Actuarial gains arising from changes in financial assumptions	(1 874)	(3 377)
Actuarial (gains)/losses arising from experience adjustments	(2 396)	(3 753)
Curtailed (gain)/loss	-	(3 523)
Gratuity payments	(2 624)	(10 108)
Balance at end of year	27 255	29 268
<b>(iii) Amounts recognised in the statement of profit or loss are as follows:</b>		
Interest costs	3 111	4 666
Service costs	1 770	2 540
	4 881	7 206
<b>(iv) Amounts recognised in other comprehensive income are as follows:</b>		
Actuarial gains arising from changes in financial assumptions	(1 874)	(3 377)
Actuarial (gains)/losses arising from experience adjustments	(2 396)	(3 753)
Curtailed (gain)/loss	-	(3 523)
	(4 270)	(10 653)

##### (i) Principal risks

Through its retirement gratuity benefit, the group is exposed to several risks, principally changes in:

###### Financial assumptions:

- Discount rate, which is set having regard to the market yield on suitable government bonds considering the estimated duration of the liability.
- Long-term price inflation rate, which is measured by the relationship between the yields of conventional and inflation-linked government bonds, considering the estimated duration of the liability.
- Salary inflation in excess of price inflation

###### Demographic assumptions:

- Withdrawal, pre-retirement mortality and ill-health mortality rates
- Post-retirement mortality
- Family statistics

The demographic assumptions used in the valuation of the liability are consistent with those of the prior year.

# NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## CONTINUED

for the year ended 31 December 2020

### 8. Benefits and remuneration: our investment in our people continued

#### 8.2 Retirement benefits continued

##### (e) Retirement gratuities continued

Changes in the principal financial assumptions are detailed below.

Principal actuarial assumptions at the end of the reporting period are as follows:

	2020 R'000	2019 R'000
Discount rate (%)	11.20	10.30
Future salary inflation rate (%)	5.70	5.50
Sensitivity of future salary inflation rate:		
1% increase in future salary inflation rate – effect on the aggregate of the service and interest costs	549	599
1% increase in future salary inflation rate – effect on the obligation	2 864	3 190
1% decrease in future salary inflation rate – effect on the aggregate of the service and interest costs	(477)	(518)
1% decrease in future salary inflation rate – effect on the obligation	<b>(2 523)</b>	(2 799)

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity, the same method has been applied as when calculating the liability recognised within the statement of financial position. The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous year.

The average duration of the benefit obligation at 31 December 2020 is 10.5 years (2019: 10.9 years).

Estimated retirement gratuities, payable by the group during the next financial year are R2 393 000 (2019: R1 671 000).

## CONTINUED

for the year ended 31 December 2020

### 9. Other: detailed disclosure requirements continued

#### 9.2 Deferred tax

Deferred tax is provided on temporary differences arising between tax bases of the assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised. The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on the tax laws that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current income tax liabilities, and the deferred taxes relate to the same taxable entity and the same taxation authority.

for the year ended 31 December 2020

### 9. Other: detailed disclosure requirements continued

#### 9.2 Deferred tax continued

For the year ended 31 December 2020, the group had both assessed losses and deductible temporary differences for which a deferred tax asset was not recognised as there was significant uncertainty that there would be sufficient taxable temporary differences and sufficient taxable profits in future to absorb the tax asset.

Income tax expense is recognised based on management's estimate of the weighted average effective annual income tax rate expected for the full financial year. During the 31 December 2020 period, based on an assessment of future cash flows and taxable profits, management is of the view that there remains insufficient future taxable profits and taxable temporary differences to utilise the deferred tax asset and, as a result, the group has not recognised any deferred tax assets and reversed the previously recognised deferred tax asset relating to assessed losses in 2019 from Hulam Operations of R76 million.

The group's unrecognised assessed loss as at 31 December 2020 is R272 million.

#### 9.3 Taxation

The charge for current taxation is based on the results for the year as adjusted for income that is exempt and expenses that are not deductible using tax rates that are applicable to taxable income. Deferred taxation is recognised in profit or loss except when it relates to items credited or charged directly to equity, in which case it is also recognised in equity.

An income tax asset arises as a result of provisional tax payments made during the year being in excess of the current tax charges. The income tax asset in the current year includes overpayments of tax made both in the current year and 2019.

	2020 R'000	2019 R'000
South African normal taxation:		
<b>Current</b>

		<b>34 405</b>	<b>-</b>	<b>-</b>	<b>34 405</b>

The group's exposure to various risks associated with the financial instruments is discussed in note 7. The associated inputs to the fair value calculation, where applicable, is provided in note 7. The maximum exposure to credit risk at the end of the reporting period is the carrying amount of each class of financial assets mentioned above.

### 10. Adoption of new and amended accounting standards

Several new or amended standards became applicable for the year ended 31 December 2020 as described in note 1.2 (a). The group did not have to change its accounting policies or make retrospective adjustments as a result of adopting these standards.

# NOTES TO THE COMPANY FINANCIAL STATEMENTS

for the year ended 31 December 2020

## 1. General

### 1.1 Basis of preparation

The company financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS), IFRIC interpretations, SAICA Financial Reporting guides, the requirements of the Companies Act, no. 71 of 2008, as amended, and the Listing Requirements of the JSE Limited.

The basis of preparation is consistent with the prior year, except for new and revised standards and interpretations adopted per note 1.2 to the group financial statements all of which had no material impact on the company's reported results or financial position.

The separate financial statements are prepared using the historical cost basis except as set out in the accounting policies which follow (see the accounting policy relating to share based payments).

The financial statements are prepared on the going-concern basis using accrual accounting (refer to note 1.10 of the Group financial statements for reference to the going-concern assessment).

Assets and liabilities and income and expenses are not offset unless specifically permitted by an accounting standard. Financial assets and financial liabilities are offset and the net amount reported only when a legally enforceable right to set off the amounts exists and the intention is either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Accounting policies are the specific principles, bases, conventions, rules and practices applied in preparing and presenting financial statements. Changes in accounting policies resulting from the initial application of a standard or an interpretation are accounted for in accordance with the transitional provisions in the accounting standard. If no such guidance is given, they are applied retrospectively.

### 1.2 New accounting standards

New and revised standards and interpretations have been highlighted in note 1.2 to the Group financial statements. These standards and interpretations have had an immaterial impact on the company financial statements.

New and revised IFRS in issue but not yet effective have been highlighted in note 1.2 of the Group financial statements. These standards and interpretations are expected to have an immaterial impact on the company financial statements.

### 1.3 Accounting for assets and liabilities

#### Recognition of assets and liabilities

Assets and liabilities are recognised when it is probable that future economic benefits associated with them will flow to and from the company respectively, and when their costs or fair values can be measured reliably.

Financial instruments are recognised when the company becomes a party to the contractual provisions of the instrument. Financial assets are recognised based on trade dates.

#### Derecognition of assets and liabilities

Financial assets or parts thereof are derecognised when the contractual rights to receive the cash flows have expired, been transferred and or control has passed.

All other assets are derecognised on disposal or they no longer meet the definition of an "asset" as prescribed by the Framework. Financial liabilities are derecognised when the relevant obligation has either been discharged, cancelled or has expired.

### 1.4 Judgements made by management

The key judgements, assumptions and sources of estimation uncertainty at the statement of financial position date that could have a significant risk of causing material adjustment to the carrying amounts of the assets and liabilities within the next financial year are:

#### 1.4.1 Post-employment benefit obligations

Actuarial valuations of post-employment benefit obligations are based on assumptions which include employee turnover, mortality rates, discount rate, expected long-term rate of return on retirement plan assets, healthcare costs, mortality rates, family statistics, inflation rates and salary increments. Management experts are used to assist with valuations of post-employment benefit obligations. Refer note 5.1.

#### 1.4.2 Share-based payment transactions

The critical estimates and assumptions used in the IFRS 2 calculations are disclosed in note 8.1 of the group financial statements. Management experts are used to determine the grant date fair value of options granted. Management assesses the likelihood of achieving non-market performance measures based on approved budgets and business plan.

# NOTES TO THE COMPANY FINANCIAL STATEMENTS

for the year ended 31 December 2020

## 1. General continued

### 1.4 Judgements made by management continued

#### 1.4.3 Provision for expected credit losses of intercompany loans

The company determines the maximum period over which expected impairment losses should be measured as the longest contractual period where an entity is exposed to credit risk. In the case of loans repayable on demand, the contractual period is the very short period needed to transfer cash once demanded.

In a scenario where the borrower has sufficient highly available liquid assets to repay the loan, the credit losses are likely to be very close to zero. Judgement is required to determine whether a borrower has available facilities at reporting dates to determine the magnitude of the allowance which should be raised.

If the borrower is unable to immediately repay the loan if demanded by the lender, the lender might expect that it would maximise recovery of the loan by allowing the borrower time to pay, instead of forcing the borrower to liquidate or sell some or all of its assets to repay the loan immediately. Management considers the general 3-stage general impairment model in determining the magnitude of the impairment:

- Probability of default: The likelihood that the borrower would not be able to repay in the very short-term payment period.
- Loss given default: That is, the loss that occurs if the borrower is unable to repay in that very short payment period.
- Exposure at default: That is, the outstanding balance at the reporting date.

If the borrower at reporting date does not have sufficient liquid assets available, the lender will need to determine what its recovery scenarios are to determine the exposure at default. Management has considered that they will not require a 'fire sale' of the borrowers' assets but would allow the borrower time to settle the debt based on the free cash flows generated from the latest business plan for the entity.

Management will adopt a 'repay over time' strategy. Management will utilise future cash flow forecasts to determine the necessary time required to repay the loan and as such, the loss given default would be limited to the effect of discounting the amount due on the loan.

### 1.5 Events after the reporting period

Events after the reporting period are those events, favourable and unfavourable, that occur between the end of the reporting period and the date when the financial statements are authorised for issue. Management has considered the relevant events during this period and concluded that they are non-adjusting events as determined in accordance with IAS 10, 'Events after the reporting period'. Details of material non-adjusting events are provided below.

These have been highlighted in note 1.9 of the group financial statements.

## 2. Performance

### 2.1 Measures used to assess performance

#### 2.1.1 Revenue from contracts with customers

Revenue of the company comprises management fees and agency fees earned from related companies within the group. Management and agency fees are earned from Hulamin Operations Proprietary Limited.

Management fees are earned on expenditure incurred such as consulting fees, directors' fees, etc. Revenue is measured at the fair value of the consideration received or receivable.

Management and agency fees are recognised as the services are performed.

#### 2.1.2 Interest income

Interest income comprises interest earned on loan to subsidiary. Interest income is accrued on a time basis using the effective interest rate method. When a loan and receivable is impaired, the company reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument and continues unwinding the discount as interest income. Interest income on impaired loans and receivables is recognised using the original effective interest rate.

# NOTES TO THE COMPANY FINANCIAL STATEMENTS

for the year ended 31 December 2020

## 2. Performance continued

### 2.2 Expenses by nature

	2020 R'000	2019 R'000
Post-employment medical aid costs	4 786	5 225
Other costs	8 828	16 955

# NOTES TO THE COMPANY FINANCIAL STATEMENTS

for the year ended 31 December 2020

## 3. Debt/equity: Measures to assess group leverage continued

### 3.1 Share capital and share premium continued

#### A and B ordinary shares

All A ordinary shares and B ordinary shares have voting rights which rank pari passu with ordinary shares.

4 721 600 A3 ordinary shares were authorised in terms of the BEE Extension transaction prior to 31 December 2020 and were issued on 13 January 2021.

4 721 600 A1 ordinary shares vested and were converted into issued ordinary shares on 22 December 2020.

A3 ordinary shares are entitled to dividends whilst all A2 and B ordinary shares have no entitlement to dividends.

#### Unissued

Under option to employees:

Details of the employee share incentive schemes including the share options outstanding at the end of the year, the range of exercise prices and the weighted average contractual lives related thereto, are set out in note 8.1 of the group financial statements.

Under the control of the directors:

At 31 December 2020, 6 801 529 unissued ordinary shares (2019: 6 801 529) were under the control of the directors, for the purpose, *inter alia*, of existing employee share incentive schemes.

#### Issued shares movement schedule

	2020 No.	2019 No.

No dividend was declared in respect of the 2020 financial year.

# NOTES TO THE COMPANY FINANCIAL STATEMENTS

for the year ended 31 December 2020

## 4. Investments: Investments in subsidiaries and joint venture

### 4.1 Investment in subsidiaries and joint venture

Subsidiaries are all entities over which the group has control, generally accompanying a shareholding of more than one half of the voting rights.

The company financial statements recognise interests in subsidiaries, which include loans granted to subsidiaries by the company, at cost, except in the case of certain limited group reorganisations where net assets are disposed. In these instances, interests in subsidiaries will be based on the carrying amount of the net assets disposed.

The company applied the expected credit loss model in considering the loss allowance required at the respective year end. The maximum period over which expected loss allowances should be measured is the longest contractual period over which the company is exposed to credit risk. As the loan is repayable on demand, the exposure to credit risk is the period between an assumed demand at the financial year-end and the period it would take the subsidiary to settle the outstanding balance. Hulamin Operations Proprietary Limited has sufficient facilities available at financial year-end to repay the full loan balance on demand. The company is therefore not exposed to credit risk and no loss allowance has been provided for on the outstanding loan balance.

	2020 R'000	2019 R'000
Investment in shares in subsidiaries	1 641 814	1 631 576
Loan to subsidiary	958 482	918 791
	<b>2 600 296</b>	<b>2 550 367</b>

Included in the investment in shares in subsidiaries is an investment in cumulative redeemable preference shares issued by Hulamin Operations Proprietary Limited.

No impairment (2019: R859 million) was recognised in the current year as a result of the carrying amount of the investee's assets exceeding the carrying amount of the investment.

The effective interest rate on the loan to subsidiary for the year was 10.12% variable interest (2019: 12.9%). No repayment terms have been set, and consequently no portion of the loan is considered past due.

The loan to subsidiary is subordinated in favour of Nedbank as security for group borrowings.

The company holds the following direct and indirect investments:

	Country of incorporation	Percentage equity interest 2020	Percentage equity interest 2019	Principal activities
<b>Subsidiaries</b>				
Hulamin Rolled Products (Pty) Ltd*	South Africa	100	100	Dormant
Hulamin Containers (Pty) Ltd*#	South Africa	100	100	Container fabricator
Hulamin Operations (Pty) Ltd	South Africa	100	100	Semi-fabrication and fabrication of rolled aluminium products
Hulamin Extrusions (Pty) Ltd*	South Africa	100	100	Semi-fabrication of extruded aluminium products
Hulamin North America LLC*	United States of America	100	100	Sales office
<b>Joint venture</b>				
Isizinda Aluminium (Pty) Ltd (note 6.1(d))	South Africa	38.7	38.7	Property owning company

\* Subsidiaries of Hulamin Operations (Pty) Ltd.

# Formerly known as Hulamin Systems (Pty) Ltd and into which the Containers division was sold on 1 November 2020.

# NOTES TO THE COMPANY FINANCIAL STATEMENTS

for the year ended 31 December 2020

## 5. Benefits and remuneration: Our investment in employees

### 5.1 Post-retirement medical aid benefits

The company has undertaken to contribute to the medical aid costs after retirement of employees engaged prior to 30 June 1996. The obligation is unfunded.

	2020 R'000	2019 R'000
Amounts recognised in the statement of financial position are as follows:		
Present value of unfunded obligations	53 446	58 479
Liability in the statement of financial position	53 446	58 479
The liability can be reconciled as follows:		
Balance at beginning of year	58 479	60 902
Total expense accrued	5 660	6 038
Remeasurements:		
Actuarial gains arising from changes in financial assumptions	(2 370)	(2 444)
Actuarial gains arising from changes in experience adjustments	(1 680)	453
Benefit payments	(6 643)	(6 470)
Balance at end of year	53 446	58 479
Amounts recognised in the statement of profit or loss are as follows:		
Interest costs	5 660	6 038
	5 660	6 038
Amounts recognised in other comprehensive income are as follows:		
Remeasurements:		
Actuarial gains arising from changes in financial assumptions	(2 370)	(2 444)
Actuarial gains arising from experience adjustments	(1 680)	453

#### Principal risks

Through its post-retirement medical aid subsidy benefit, the group is exposed to several risks, principally changes in:

- Financial assumptions:
  - Discount rate, which is set having regard to the market yield on suitable government bonds, taking into account the estimated duration of the liability.
  - Long-term price inflation rate, which is measured by the relationship between the yields of conventional and inflation-linked government bonds, taking into account the estimated duration of the liability.
  - Medical inflation rate
- Demographic assumptions:
  - Post-retirement mortality
  - Family statistics

The demographic assumptions used in the valuation of the liability are consistent with those of the prior year. Changes in the principal financial assumptions are detailed below.

#### Principal financial assumptions:

		2020	2019
Discount rate	(%)	11.20	10.30
Future company subsidy rate – in service	(%)	6.70	6.50
Future company subsidy rate – pensioners	(%)	7.45	7.25

# NOTES TO THE COMPANY FINANCIAL STATEMENTS

for the year ended 31 December 2020

## 5. Benefits and remuneration: Our investment in employees continued

### 5.1 Post-retirement medical aid benefits continued

#### Sensitivity of future medical inflation rate

	2020 R'000	2019 R'000
1% increase in future medical inflation rate		
– effect on the aggregate of the service and interest costs	401	426
1% increase in future medical inflation rate – effect on the obligation	3 574	4 132
1% decrease in future medical inflation rate		
– effect on the aggregate of the service and interest costs	(360)	(381)
1% decrease in future medical inflation rate – effect on the obligation	(3 219)	(3 071)
The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity, the same method has been applied as when calculating the liability recognised within the statement of financial position. The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous year. The average duration of the benefit obligation at 31 December 2020 is 7.2 years (2019: 7.2 years).		
Estimated benefits payable by the company in the next financial year	6 850	7 051

## 6. Other: Other detailed disclosure requirements

### 6.1 Deferred tax

Deferred tax is provided on temporary differences arising between tax bases of the assets and liabilities and their carrying amounts in the financial statements.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on the tax laws that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current income tax assets against current income tax liabilities, and the deferred taxes relate to the same taxable entity and the same taxation authority.

	2020 R'000	2019 R'000
Deferred tax asset		
At beginning of year	16 375	17 060
Deferred tax in the statement of profit or loss:		
Current year charge	(276)	(126)
Deferred tax credit on other comprehensive items	(1 134)	(559)
At end of year	14 965	16 375
Comprising:		
Post-retirement medical aid provision	14 965	16 375
Other	–	–
	14 965	16 375
Deferred tax asset to be recovered after more than 12 months	14 965	16 375
Deferred tax asset to be recovered within 12 months	–	–
	14 965	16 375

# NOTES TO THE COMPANY FINANCIAL STATEMENTS

for the year ended 31 December 2020

## 6. Other: Other detailed disclosure requirements continued

### 6.2 Taxation

The charge for current taxation is based on the results for the year as adjusted for income that is exempt and expenses that are not deductible using tax rates that are applicable to taxable income. Deferred taxation is recognised in profit or loss except when it relates to items credited or charged directly to equity, in which case it is also recognised in equity.

		2020 R'000	2019 R'000
<b>South African normal taxation:</b>			
Current			
Current year		27 302	31 720
Prior year under/(over) provision		195	-
Deferred			
Current year		276	126
		<b>27 772</b>	<b>31 846</b>
<b>Tax rate reconciliation</b>			
Normal rate of taxation	%	28.0	28.0
Adjusted for:			
Allowances not included in the statement of profit and loss	%	0.2	
Expenses not deductible for tax purposes	%	1.9	( 23.7)
Effective rate of taxation		<b>30.1</b>	<b>4.3</b>

### 6.3 Related party transactions

During the year the company, in the ordinary course of business, entered the following related party transactions:

		2020 R'000	2019 R'000
Interest received from subsidiary		103 277	118 375
Agency fees received from subsidiary		104	104
Management fees received from subsidiary		9 249	15 857
Transactions with non-executive directors are detailed in the group annual financial statements.			
The following balances were outstanding at the end of the reporting period:			
Loan balance owing by subsidiary (note 4.1)		958 482	918 791

### 6.4 Trade and other receivables

During the year the company, in the ordinary course of business had the following trade and other receivables. This primarily consists of sundry debtors in the form of accrued interest receivable on the shareholders loan and the VAT receivable. Refer to disclosure below:

#### Financial and non-financial assets

		2020 R'000	2019 R'000
<b>Financial assets</b>			
Sundry receivables		24 295	-
<b>Non-financial assets</b>			
Value-added taxation receivable		65	-
		<b>24 360</b>	<b>-</b>

## 7. Financial risk management

The company's risk management is incorporated in the group's risk management process and is predominantly controlled by a central treasury department (group treasury) under policies approved by the board of directors. Group treasury identifies, evaluates and hedges financial risks in close co-operation with the group's operating units. The board provides written principles for overall risk management, as well as policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk and use of derivative financial instruments. Further detail can be obtained in Note 7 of the consolidated annual financial statements.

# ANNEXURE C: REMUNERATION REPORT

# REMUNERATION REPORT

CHARLES ALEXANDER BOLES

## PART A

The chairperson's statement 1

## PART B

The forward-looking remuneration policy 3

## PART C

The implementation of the 2019 remuneration policy 9

## PART A

### The chairperson's statement

#### Dear Shareholders

It is with pleasure that I present to you the remuneration report for the 2020 financial year, on behalf of the Remuneration and Nomination Committee (Remco). The purpose of this report is to provide stakeholders with a detailed summary of the organisation-wide philosophy and policy pertaining to remuneration at Hulamín. In accordance with Hulamín's dedication to being a responsible corporate citizen, this report has been aligned to follow best practice reporting standards, incorporating the King IV Report on Corporate Governance (King IV™) and the Johannesburg Stock Exchange (JSE) Listings Requirements.

In almost all areas of the business, 2020 was a challenging year for Hulamín. In this context, no short-term incentive (STI) bonus was paid due to the business not achieving financial performance targets. Employees outside the bargaining unit were not awarded salary increases on the back of the restructuring exercise undertaken in 2019, and as a result of the focus on cost containment. The 2016 Share Appreciation Rights scheme ("SARs") award scheduled to vest in 2020 also did not vest as a result of financial performance targets missed in 2019.

Mrs NNA Matyumza retired from the Hulamín Board in 2020. Mrs Matyumza had been a Board member since March 2010, had been a member of the Remco since January 2012, and had chaired the Remco since October 2012. The Remco would like to express its appreciation for her service to the committee during this time.

### REMCO focus areas during 2020

In addition to Remco's normal responsibilities, the Board requested that it find ways of harnessing additional employee discretionary effort to increase sales volumes, which have declined so notably during the Covid-19 pandemic months.

In the first quarter of 2020, with the rapid spread of Covid-19 and governments around the world introducing lockdowns, it became clear that 2020 production and sales targets would not be achieved. Accordingly, Remco took the decision that the STI targets could not be achieved. Business focus during the first half of the year was primarily on efforts to reduce costs and return to profitability through increasing sales, and on protecting employee well-being during the second and third quarters.

During the third quarter the Remco responded to the Board's request, and proposed offering employees a simplified, scaled-down incentive based loosely on the existing STI rules, and applicable to the fourth quarter of 2020 only. The primary objective of this incentive was to return the business to profitability in the fourth quarter through increased sales volumes.

### Composition of the committee:

#### Chairman (Remuneration)

NNA Matyumza  
(retired 30 July 2020)

CA Boles  
(appointed from 1 August 2020)

#### Chairman (Nominations)

TP Leeuw

#### Other member

GH Watson

# REMUNERATION REPORT CONTINUED

The performance measure used for the incentive was actual sales volume achieved versus the agreed target, with the pay-out value limited to 10% of profit (EBIT) earned in the fourth quarter. In this way, the incentive was self-funding and served to drive shareholder value.

The Remco has obtained the support, advice and opinions of external advisors on various remuneration-related matters. The Remco is satisfied with the constructive, objective and independent advice received.

## Management remuneration – a dynamic context

Issues around executive remuneration, disparities in pay, and transparent disclosure remain topics that stimulate widely diverse opinions in South Africa. Cognisant of these issues, the Remco has continued to implement initiatives and policy changes in line with King IV™ and the JSE Listings Requirements.

In addressing the requirements of the Employment Equity Act 55 of 1998 in relation to the principle of equal pay for work of equal value, the Remco has developed a Fair and Ethical Pay framework. In addition, when annual salary (inflationary) increments are applied, adjustments are weighted in favour of employees at lower remuneration levels.

In line with best practice, King IV™ and the JSE Listings Requirements, we will continue to submit the remuneration policy (Part B) and the implementation report (Part C) for separate, non-binding advisory votes at AGMs.

## Shareholder engagement

In line with best practice and our value of remuneration being aligned with shareholders and their interests, we regularly engage with shareholders, as and when required.

## Appreciation

The Remco is satisfied that we properly executed our duties in terms of our mandate for the FY2020. At the AGM held on 30 July 2020, Hulamin received a 95.90% non-binding advisory vote in favour of its remuneration policy and 96.10% in favour of its implementation report. We would therefore like to thank our shareholders for their ongoing support as we continually seek to align shareholder interests and remuneration. We at Hulamin and, particularly, the Remco, are steadily continuing on the journey of implementing best practice standards in our remuneration reporting and disclosure.

**CA Boles**

*Chairman of the Remuneration and Nomination Committee*

25 March 2021

## PART B

### The forward-looking remuneration policy

The Remco is a sub-committee of the board of Hulamín (the “Board”) with delegated authority. Hulamín’s remuneration policy is reviewed annually by the Remco and submitted for approval by the Board. The Remco’s responsibilities and actions are set out and governed in its terms of reference, read together with Hulamín’s remuneration policy and other applicable documents.

The Remco meets at least three times per annum. The Remco members and their meeting attendance record for FY2020 is detailed below:

Member	2 March Scheduled	11 August Special	20 August Scheduled	6 October Scheduled	17 November Special
NA Matyumza	✓				
CA Boles	✓	✓	✓	✓	✓
TP Leeuw	✓	✓	✓	✓	✓
GH Watson	✓	✓	✓	✓	✓

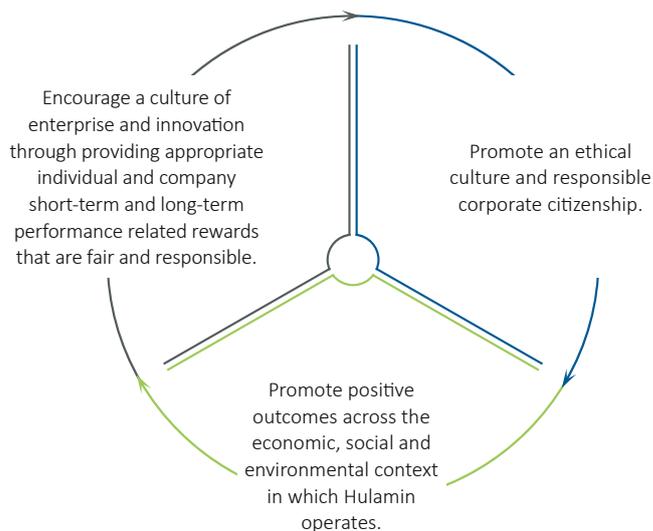

In 2020, scheduled Remco meetings were held on 2 March, 11 August, and 17 November, with two additional special meetings on 20 August and 6 October.

Management members who are invited to attend Remco meetings are excused when their remuneration is discussed, and do not participate in any vote at the meeting.

### Remuneration philosophy

The purpose of the remuneration policy is to provide principles and guidelines on an organisation-wide remuneration structure. This includes the management of remuneration practices that enable Hulamín to attract, motivate, retain and reward the most talented employees – a key component of the integrated human resources strategies that support the achievement of Hulamín’s strategic objectives. The philosophy serves to align the interests of management and shareholders, and is communicated clearly to employees concerned.

Hulamín’s remuneration philosophy through the application of this policy, aims to:

Hulamín’s remuneration philosophy is geared towards pay for performance within the boundaries of the company’s risk appetite, and is cognisant of the need to guard against windfalls or undue penalisation due to factors outside of employees’ control. Variable pay should not be unduly affected by the performance of a particular operation in which an employee works, where factors outside the employee’s control affect the company’s financial results (e.g. commodity price or currency fluctuations).

### Fair and responsible remuneration

The Board, supported by the Remco, gives due consideration to the principle of fair and responsible remuneration. As there is no one-size-fits-all solution, the Remco must review and approve initiatives, policies and arrangements to give effect to this principle, in line with best practice and bearing in mind the company’s strategic objectives.

The Remco must ensure that executive remuneration (including the remuneration of prescribed officers) is justifiable in the context of overall employee remuneration. The Remco may make recommendations to the Board and assist in taking the following actions:

Investigating and assessing the internal pay disparities within the Company.

Examining the underlying reasons for pay disparities, if any.

Reviewing Hulamín’s internal Gini coefficient to assess the level of income disparity in Hulamín.

Conducting an assessment of pay conditions between employees in line with the principle of equal pay for work of equal value.

In striving to be a responsible corporate citizen, Hulamín continuously considers initiatives to nurture the principle of fair and responsible remuneration, and to improve the employment conditions of all employees within the company. Hulamín will adopt progressive measures to address identified pay disparities, as deemed necessary from time-to-time.

# REMUNERATION REPORT CONTINUED

## Remuneration mix

### STRUCTURE OF PACKAGES

The quantum, structure, composition and mix of remuneration packages supports Hulamin's strategic objectives, is market related, and is aimed at being competitive in our industry. To this end, market surveys are conducted annually and used as input where action is required to ensure that the above principles are applied fairly to all stakeholders.

The appropriate mix between guaranteed and variable pay (including the short- and long-term elements of remuneration) are reviewed by the Remco and the Board from time to time, taking market trends into consideration. The Remco ensures that the variable components of remuneration are designed to ensure an appropriate level of risk to the company and its long-term objectives, avoiding any possible over-dependence on its variable components.

Note that at lower salary levels, variable pay constitutes a smaller proportion of total remuneration.

### TOTAL GUARANTEED PAY (TGP)

<b>Cash salary</b>	The major portion of guaranteed pay consists of a cash salary. Regular benchmarking exercises are conducted to ensure that Hulamin employees' cash salary is market related and appropriately competitive.
<b>Employer contributions</b>	Guaranteed pay also includes an employer contribution to a company-approved retirement fund and medical aid, as well as a cellular phone allowance based on the employee's grade, and a 13 <sup>th</sup> cheque amounting to 10% of the annual basic salary for all employees from lower E-band and below.
<b>Premiums</b>	It is recognised that market premiums may be necessary to attract and retain scarce skills and members of designated groups. These are incorporated into the employee's cash salary.
<b>Other benefits</b>	In addition to retirement funding and medical aid, Hulamin offers a gratuity to retiring staff with a minimum of 10 years' service, based on the length of their service and their final salary. Middle and senior management are offered general accident insurance.
<b>Positioning</b>	Hulamin's aim is for guaranteed pay to be in line with the market median, recognising that there are cases of differentiation (i.e. within a range of the market median) based on individual performance and value to the business.
<b>Salary reviews and increases</b>	Annual cash salary increases for individuals are largely inflationary adjustments. Other factors taken into consideration include an individual's pay relative to the market, their performance, and their anticipated future value to the business. Performance ratings are normalised both within an employee's department, and between departments, to ensure that ratings approximate a normal distribution. In cases where pay anomalies are identified, attention is given to adjusting the employee's pay in line with the market, their value to the business and their performance.  The aggregate of all annual increases is adopted as a firm upper limit not to exceed the average overall increase approved by the Board. The salary increases of executives are considered individually by the Remco when determining the average increase for other employees.
<b>Performance</b>	Performance below expectations is not tolerated and actions (such as performance counselling or disciplinary actions) are taken to ensure that poor performers either improve their performance or exit the company. During the period in which under-performance is being addressed, the employee's salary increases would be below average for their grade.

## Variable pay

### SHORT-TERM INCENTIVE BONUS (STI)

The primary purpose of the STI is to serve as a motivator of performance over the short term. Refinements to the STI are considered from time to time to improve the efficacy of the scheme.

The STI is based on a combination of corporate financial targets, divisional operational targets, and individual performance.

<b>Financial capital</b>	Encourages employees to meet Hualamin's liquidity profile and future cash requirements for a more profitable business, ultimately increasing shareholder value.
--------------------------	---

Financial performance conditions are based on an equal weighting of Board-approved annual budgets by division:

- Earnings before interest and taxes (EBIT); and
- Operational cash flow.

<b>Manufacturing capital</b>	Encourages employees to meet Hualamin's operational objectives, aligning employees' discretionary efforts with company goals, ultimately increasing shareholder value.
------------------------------	--

Operational performance targets are based on the Board-approved annual budget by division:

- Sales volumes measured in tons, intended to increase total sales;
- Manufacturing costs and employee costs, including overtime, discretionary costs and a "metals" component, to encourage recycling of scrap metals;
- Rolling margins measured in US\$ per ton, as a measure to improve the quality of sales volumes;
- Overall recoveries as a percentage of throughput, intended to improve efficiencies;
- Working capital as a percentage of revenue, used to drive down working capital, specifically inventory;
- Safety performance, measured in total recordable case frequency rate.

Individual key performance areas (KPIs) address the achievement of strategic business objectives across the following general areas:

- Financial performance
- Budgetary/cost control
- Transformation
- Safety, and
- Risk management.

The STI scheme consists of six different levels. The percentage of TGP payable for on-target performance under the six levels is reflected in the table below:

Position	Grade	STI on-target % of TGP	STI stretch % of TGP
CEO	FU	60	150
CFO	FL	50	125
Other executives	FL	40	100
Senior management	EU	33	82.5
Senior management	EL	25	52.6
Middle management	DU – DL2	15	37.5

In the event of early termination of employment due to resignation or dismissal, there is no entitlement to a bonus payment. In the case of retirement, retrenchment and death in service, there is a *pro rata* entitlement, paid to the participant at year end, along with all other participants.

The payment of bonuses for each component of the respective awards is determined independently from the other components.

The weightings of the targets are as follows:

Position	Grade	% Financial performance	% Operational performance	% Safety performance	% Individual performance
CEO	FU	60	10	10	20
CFO	FL	50	20	10	20
Executives	FL	40	30	10	20
Senior Management	EU	30	40	10	20
Senior Management	EL	20	40	10	30
Middle management	DU – DL2	10	40	10	40

The Remco and the Board have the discretion to decide on the payment or non-payment of performance-incentive bonus awards.

### LONG-TERM INCENTIVES (LTIS)

The variable-pay component of Hualamin's remuneration packages is structured to include LTIs for executives and senior management that are market-related and linked to Hualamin's performance.

The primary purpose of the LTIs is to incentivise employees to achieve the long-term objectives of the company, specifically objectives that have multi-year durations, and to retain key talent.

Financial performance conditions are included in order to align with shareholder interests.

<b>Financial capital</b>	Performance measures drive increases in the value and return on the investments made by Hualamin's shareholders.
--------------------------	--

# REMUNERATION REPORT CONTINUED

## ECSP – EQUITY-SETTLED CONDITIONAL SHARE PLAN

The ECSP provides for three types of conditional shares, each with three-year vesting periods.

Retention Shares (RS). Awarded selectively by the Remco to attract and retain executive and senior management, the vesting of which is subject to the satisfaction of the conditions of employment. The value of these shares is limited to 25% of any employee's TGP.

Performance Shares (PS). Awarded only to executives and senior management, the vesting of which is subject to satisfying performance conditions and conditions of employment in line with the Group's approach to performance-related incentives.

Bonus Shares (BS). Awarded to executives, senior and middle management, the value of which is determined as a percentage of the STI based on performance in the previous financial year, and the vesting of which is subject only to meeting the conditions of employment.

In line with best practice, regular annual awards of Bonus Shares and Performance Shares are made to ensure long-term shareholder value creation and alignment with acceptable market norms. In addition, the award of Retention Shares is for use in cases where there is a specific need to attract or retain talent.

Annual awards target a market-related level of remuneration, whilst considering the overall affordability of these awards to the company.

Bonus Shares are not subject to additional performance conditions. This is due to the fact that they have an "entry performance requirement", where the quantum of the Bonus Shares is determined with reference to the actual STI paid to the participant based on the prior financial year's performance.

The extent and nature of performance conditions applicable to the Performance Shares awarded in terms of the ECSP are approved by the Remco annually and are included in the award letter to participants.

Performance Share awards made to the participants are subject to the following performance conditions, measured over a three-year performance period:

### Total Shareholder Return (TSR)

- Weighted 1/3.
- Measured against the JSE Small Cap Index over the three-year vesting period, including dividends declared over the vesting period.

### Return on Capital Employed (ROCE)

- Weighted 2/3.
- Measured against the accumulated ROCE, based on the prior year's Board-approved business plan.
- The Board has discretion to adjust the base ROCE for major changes in capital employed during the vesting period.

Executives and senior managers may be offered annual LTI awards in terms of the annual allocation levels (as a percentage of TGP), based on the benchmarks set out below:

Position	Grade	ECSP		Total ECSP Award face value as % of TGP
		BS as % of TGP	PS as % of TGP	
CEO	FU	24	36	60
CFO	FL	20	30	50
Other executives	FL	16	24	40
Senior management	EU	13	20	33
Senior management	EL	10	–	10
Middle management	DU	6	–	6

### Dilution limit applicable to the ECSP

The ECSP is implemented within the shareholder-approved dilution limit. The maximum aggregate number of shares that may be acquired by participants may not exceed 15 650 000 shares (5% of issued share capital), with the maximum for any one participant being 3 130 000 shares (1% of issued share capital).

The Remco reviews the dilution limit usage and the headroom before an LTI award is made to ensure that neither the company limit nor the individual limit is exceeded. The current share usage is set out in Part C of this report.

### Manner of settlement of LTI awards

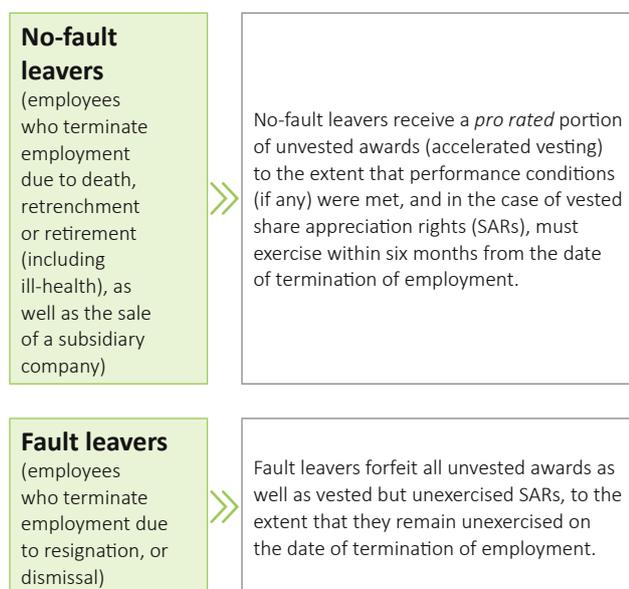

The rules provide for the following methods of settlement:

- Purchase shares off the market;
- Use of Treasury shares;
- Issue of new shares (within the dilution limit); and/or
- Cash settlement.

The company generally settles the awards through the purchase of shares in the market. The exact method of settlement is determined by the Remco with reference to the dilution limits and the business cycle.

### Early termination of employment

Employees may be classified as either a “fault” leaver or a “no-fault” leaver, depending on the circumstances under which their employment is terminated. The provisions below apply to the ECSP, as well as the legacy Share Appreciation Rights (SARs) scheme.

### Legacy plans

Following the introduction of the ECSP in 2018, for the time being there still remain a number of residual awards from Hulamín’s legacy plans, the SARs and the Long-Term Incentive Plan (LTIP). No further grants will be made under the legacy plans.

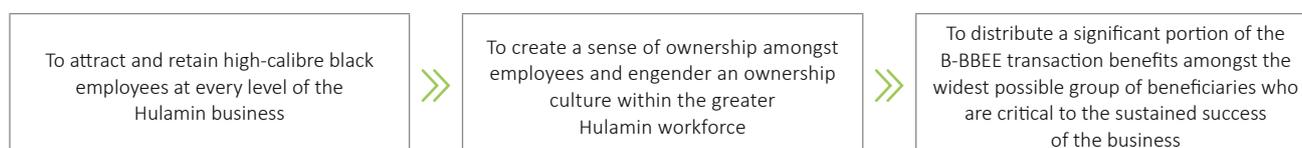

The overall quantum of awards granted under the SARs and/or LTIP is determined by the Remco annually, based on the LTI allocation methodology and considering relevant market trends, current business issues, and the limits contained in the rules and guidelines of the schemes.

The SARs were offered in the form of performance-based conditional awards to eligible executives and senior managers. The performance conditions governing the vesting of the SARs were related to growth in headline earnings per share (relative to targets that were intended to be challenging but achievable), linked to the company’s medium-term business plan, over three-year performance periods.

Under the LTIP, once-off shares were offered to executives and eligible senior employees in order to attract and retain top talent. These LTIP awards did not bear performance conditions, vested over a three-year period based on tenure, and were specifically approved by the Remco.

### 2015 Employee Share Ownership Plan (2015 ESOP)

The objectives of the 2015 ESOP are primarily:

As Hulamín values its employees as key contributors to the ongoing performance and success of the business, all permanent South African-based employees up to middle management (up to Paterson lower D Band) and all permanent black South African middle and senior management (Paterson upper D band and above) participate in the 2015 ESOP.

Participation has been through two classes of “A” ordinary shares, 15% of which were issued with no strike price (“A1”) and 85% of which are appreciation rights (“A2”). During the vesting period, both classes of share participated in dividends declared by the company. The A1 ordinary shares were entitled to a cash dividend, but for the A2 ordinary shares the dividend is to be utilised to reduce the strike price of the right at the time of vesting.

Both classes of shares were scheduled to vest after five years (22 December 2020). The A1 ordinary shares did vest and were converted to Hulamín ordinary shares on a one-for-one basis. On vesting, the appreciation of the A2 ordinary shares will be converted to Hulamín ordinary shares and the balance of the unvested portion of A2 ordinary shares bought back by the company at a nominal value.

At special general meetings of shareholders of the company in December 2020, the terms of the ESOP were changed along with the terms of the broader BEE transaction. In summary, the changes approved at this meeting were as follows:

- The vesting period of the A2 ordinary shares was extended another five years to vest in February 2026; and
- A new class of A3 ordinary shares were approved for distribution to qualifying employees. These A3 shares are scheduled to vest in five years, in February 2026.

### Executive conditions of employment

With the exception of notice periods, executives are employed under the same employment conditions as other staff.

The notice period for the CEO is three months and the notice period for other executives is two months. Hulamín reserves the right to terminate an executive’s employment, without notice, for any cause deemed sufficient by law.

Succession planning for the CEO is in place.

Executive employment contracts do not allow for payment of any additional benefits or balloon payments on termination, other than those that apply to all staff employees.

In the event of early termination there is no automatic entitlement to bonuses or share-based incentives. Executives may, however, receive *pro rata* payment as allowed in terms of the “no-fault” provisions contained in the early termination clauses of the company’s incentive scheme rules.

In terms of executives’ employment contracts, there is no automatic severance compensation to executives due to a change of control. In such cases, Hulamín’s retrenchment policy will apply.

# REMUNERATION REPORT CONTINUED

## Non-executive directors' (NEDs) fees

NEDs receive fees for serving on the Board and Board committees, and do not have service agreements with the company. NED fees are paid in cash on the basis of a fixed retainer and an attendance fee per meeting. The Board typically holds five Board meetings per year and there are usually three meetings for each of the sub-committees of the Board throughout a financial year.

Attendance at additional sub-committee meetings is remunerated at the standard remuneration rate for attendance at scheduled meetings of such committees. Attendance fees for *ad hoc* Board committee meetings are equivalent to those earned by members of the Remco. Disbursements for reasonable travel and subsistence expenses are reimbursed to NEDs in line with the reimbursement policy for employees.

Fees for NEDs are reviewed on an annual basis, taking into account the responsibilities borne by NEDs as well as relevant external market data. Fees are recommended by the Remco, submitted to the Board for approval, and finally recommended to the shareholders for approval at each AGM. NED fees were not increased during 2020.

NEDs are to retain their independence, and as such they neither receive payments linked to the company's performance nor do they participate in the company's incentive schemes.

The proposed fees will be tabled before shareholders for approval by special resolution at the 2021 AGM:

Figures in Rand	Present fees to 31 July 2021		Proposed fees from 1 August 2021		% change
	Annual retainer	Attendance per meeting	Annual retainer	Attendance per meeting	
Chairman of the Board	477 410	40 920	491 730	42 150	3

## Voting and shareholder engagement

### VOTING ON THE REMUNERATION POLICY AND IMPLEMENTATION REPORT

In line with King IV™ and the JSE Listings Requirements, the remuneration policy and the implementation report (as contained in the annual integrated report) will be tabled for two separate non-binding advisory votes by shareholders at the AGM.

### SHAREHOLDER ENGAGEMENT

Hulamin is committed to fair, responsible and transparent remuneration, and as such invites shareholders to engage with the company on remuneration-related matters.

In the event that 25% or more of the shareholders vote against the remuneration policy and/or the implementation report, the Remco will commence engagement with dissenting shareholders to ascertain the reasons and legitimate concerns underlying their votes. In order to do so, the Remco will extend an invitation to dissenting shareholders in the Stock Exchange News Service (SENS) announcement together with the results of the AGM, setting out the manner, date and timing of the engagement.

#### Method of engagement may include:

Emails, written correspondence, telephone calls, video conference calls, one-on-one meetings, investor roadshows and other methods of communication to the relevant contact persons at the shareholders, after the AGM concerned (and throughout the financial year) regarding the reasons for the dissenting votes.

Responses to shareholder queries explaining, in more detail, the elements of the remuneration policy that caused concern. Where appropriate, the Board may resolve to amend certain elements of the remuneration policy to align the policy to market norms.

## PART C

### The implementation of the remuneration policy

This implementation report is subject to an advisory vote by shareholders at the AGM dated 27 May 2021.

#### Total guaranteed pay

The Remco approved a three percent annual salary increase for both the executive and non-bargaining unit employees in 2020 (effective January 2021). No salary increases were granted to these employees during 2020. The Remco is satisfied that the increase levels for the executive directors are in line with increase levels throughout the company. The weekly paid and artisan employees are subject to wage negotiations with the bargaining council.

#### Short-term incentive outcomes

Due to the impact of Covid-19 lockdowns in the second quarter of 2020, the Remco took the decision that the short-term incentive targets could not be achieved and did not implement the annual short-term incentive (STI) bonus.

In the fourth quarter, in response to the Board's request to find ways to harness employee discretionary effort, the Remco proposed a simplified, scaled-down incentive based loosely on the existing STI rules and applicable to the fourth quarter of 2020 only. This Quarter 4 Performance Bonus ("Q4PB") replaced the annual STI scheme.

The table below sets out the performance bonuses that the executive directors were paid in Quarter 4 2020, based on the achievement of company operational performance and limited by the fourth-quarter company profit:

Participant	On-target Fourth Quarter Bonus			Actual Fourth Quarter Bonus			
	TGP <sup>1</sup> Rand	On-target Q4PB Rand	Q4PB as % of TGP	Q4PB based on operational performance <sup>2</sup> Rand	Q4PB as % of On-target bonus <sup>3</sup>	Actual Q4PB paid <sup>4</sup> Rand	% of TGP
RG Jacob (CEO)	1 463 403	878 042	60	994 788	24.1	211 320	14.4
LM Farquharson (Acting CFO)	757 025	302 810	40	341 363	17.5	59 727	7.9

<sup>1</sup> For Mr RG Jacob, TGP covered October, November and December. For Mr LM Farquharson, who was acting CFO with effect from 1 November 2020, the values reported are for the period 1 November 2020 to 31 December 2020.

<sup>2</sup> Operational performance (sales volumes) exceeded target performance by 6% for the Group.

<sup>3</sup> The final bonus paid was limited to 10% of Group profits (EBIT).

<sup>4</sup> The actual bonus paid is included in the single-figure remuneration table below.

#### Long-term incentive (LTI) outcomes

The 2017 SARs was due to vest in 2020, and consequently the performance condition was measured over the three-year performance period that ended 31 December 2019. The actual 2019 HEPS of -8cps did not meet the required HEPS target of 143cps, and consequently the 2017 SARs award lapsed.

#### Unvested LTIs

The table below discloses the value of each executive director's LTIs, whether allocated, settled, or forfeited, as well as the indicative value of awards not yet settled.

Executive	LTI scheme	Date awarded	Vesting date	Grant price Rand	Opening number	Awarded during the year	Lapsed during the year	Closing number	Indicative value Rand <sup>1</sup>
RG Jacob (CEO)	SARs	24 Apr 2014	23 Apr 2017	6.90	633 100		–	633 100	–
	SARs	26 Apr 2017	25 Apr 2020	6.50	604 005		604 005	–	–
	ECSP – PS	26 Jul 2018	25 Jul 2021	6.22	321 279		–	321 279	722 878
	ECSP – BS	26 Jul 2018	25 Jul 2021	6.22	117 649		–	117 649	264 710
	ECSP – PS	20 Aug 2020	19 Aug 2023	0.99	–	932 150	–	932 150	2 097 338
LM Farquharson (Acting CFO)	ECSP – PS	26 Jul 2018	25 Jul 2021	6.22	65 942			65 942	148 370
	ECSP – BS	26 Jul 2018	25 Jul 2021	6.22	25 183			25 183	56 662
	ECSP – PS	20 Aug 2020	19 Aug 2023	0.99		261 341		261 341	588 017

<sup>1</sup> Indicative value of outstanding LTI: This column reflects the number of outstanding instruments x vesting probability (%) x year end share price (R2.25).

# REMUNERATION REPORT CONTINUED

## Executive remuneration

The table below sets out the single-figure remuneration, i.e., TGP (basic salary and company contributions), STI and LTI received by executive directors and prescribed officers.

Executive	Cash salary Rand	Company contributions Rand	STI Rand	LTI Rand	Total Rand
<b>2020</b>					
RG Jacob	5 139 420	761 905	211 320	633 862	6 746 507
AP Krull <sup>1</sup>	3 159 820	522 619	–	–	3 682 439
MZ Mkhize <sup>2</sup>	589 518	7 935 985	–	–	8 525 503
LM Farquharson <sup>3</sup>	421 000	83 683	59 727	177 712	742 122
Total	9 309 758	9 304 192	271 047	811 574	19 696 571
<b>2019</b>					
RG Jacob	5 139 420	793 886	–	–	5 933 306
AP Krull	3 791 784	621 114	–	–	4 412 898
MZ Mkhize	3 537 108	605 192	–	–	4 142 300
DR Weisz (prescribed officer)	1 697 185	3 437 040	–	–	5 134 225
Total	14 165 497	5 457 232	–	–	19 622 729

<sup>1</sup> AP Krull resigned with effect from 31 October 2020. Ten months' remuneration reported.

<sup>2</sup> MZ Mkhize was retrenched on 29 February 2020. Two months' remuneration (including severance of R7 838 779) reported.

<sup>3</sup> LM Farquharson was appointed Acting CFO from 1 November 2020. Two months' remuneration reported.

## NED fees

The table below sets out the fees paid to NEDs in 2020:

Non-executive	Retainer fees 2020 Rand	Attendance fees 2020 Rand	Total fees 2020 Rand
TP Leeuw	572 570	444 270	1 016 840
VN Khumalo	261 140	198 000	459 140
NNA Matyumza	194 886	97 560	292 446
SP Ngwenya	222 030	150 430	372 460
GHM Watson	723 231	495 696	1 218 927
N Maharajh	347 580	222 340	569 920
CA Boles	311 276	217 800	529 076
B Mehloakulu	300 006	213 440	513 446
RL Larson	570 350	404 868	975 218
Total	3 503 069	2 444 404	5 947 472

## Approval

This report was approved by the Remco on 2 March 2021 and the Board on 25 March 2021. The Remco, as well as the Board, are satisfied that there were no material deviations from the 2019 remuneration policy during the 2020 financial year.

[www.hulamin.com](http://www.hulamin.com)
